I'm not necessarily convinced that broadcasting is messed up. Small owners retired, died, or sold out for big bucks to the larger owners, as happens in just about any industry (drug stores, car dealerships, auto parts). The larger owners have notes to pay down, and have the choice of either boosting revenue or cutting expenses to do it.

And while all this was happening, along came the Internet, which took both its advertising base and its entertainment base in just a matter of a few years.

The new world order isn't just happening to broadcasting. 2006 was the Postal Service's biggest year. 2009 was one of its worst. The USPS has to turn its huge passenger liner around on a dime in order to keep from sinking in a mountain of debt (forgive the mixed metaphors).

I think the radio industry is trying to give the audience what it wants. Certainly, Clear Channel spent a lot of resources with their Format Lab website, trying to see what music formats would work for what demographics and then trying to incorporate them into those stations that weren't doing well.

But the audience is moving on to other media. If stations can establish a presence in those other media, fine, but they might not be able to do it the same way as they've done as broadcasters.

Some radio stuff works well in the transition.  I know lots of folks who listen to "Fresh Air" and "This American Life" via podcasts instead of or in addition to via their local NPR station.  But I don't know if KPIG's subscription service will work -- I think it's $5.95 a month for unlimited streaming of what is a remarkable playlist.  It's clear that many people listen to KGO's talkshows online in real time, but is it enough to compensate for the number of listeners they lose by being an AM station in the days of diminishing AM listening?

A six-figure income from broadcasting is still fairly common these days,
even since the big bust. Sales reps, talent, management, and engineers
all typically make six-figure incomes in the Bay Area.

Haveing been a Radio broadcaster in many forms for a long time and seen the birth,growth,evolution and eventual de-evolution of radio not only as a hobby but as a career I have learned that the real problem with "radio" today is the cheeky*******s that are in it for the money!

"RADIO" weather it be engineering,production,or talent Is an art and a labor of love. When invented the thing all we really wanted to do was play some music to our friends,tell them what the weather was doing where we are and in a way all be in the same place at the same time regardless of the acual distance between us.

Sure, the greedy and grossly OVERSIZED commercial interests fueled by the FCC's pressure to pay more money for every second of RF emission has all but destroyed everything that radio was soppposed to be. Turning the "dial" in to a sea of noise and pandering to pursuit of the dollar almighty to a point that now the snake is eating its tail.  no more DJs just harddrive babysitters,no more fun for the listener and in most stations today forget about the thrill and excitement of "THE SHOW"!
.....

Well HA HA HA HA!  The story doesnt end here....Much to the contrary!

People with disabilities you ask? Well if you are hopeing to make a living in radio then the game is up, But if you willing to LIVE radio then i see no better oppertunity for a disabled individual to make a difference in the world of RADIO.

Yes you are going to have to start at the begining in a sense.
Re-invent the wheel which shouldnt be to hard today since it seems that it has been forgotten that blocks dont roll.

What i suggest to you start your own station as if you invented RADIO.

NO! not pirate radio at least not in the sense of stepping on toes or troubleing the failing "industry" with formitable competition.

There is nearly unlimited radio spectrum all you have to do is find a piece that suits the need. Stay away from the comercial AM&FM bands that ship is sinking for now. In stead Set sail on your own ship even if that means you have to start with a raft.

If you want radio then you are going to have to make radio by any means nessasarry.  You may have to market radios directly to your listeners that receive your frequency since its not going to the mainstream. Hmmm kinda sounds like the early days of broadcasting...

I dont want to tell you what to do after all its your radio station but i will offer this :HF,shortwave,CB radio,Part 15,(analogue of course).Stay out of HAM bands and DO NOT USE ANY FREQUENCY THAT IS BEING USED BY OTHERS find a clear channel. Courtesy is formost

Of course If you win the lottery or have a million dollars you could buy your way into mainstrean radio. But who wants to listen to that crap?

What ever you choose to do make sure you do it well and without causeing harmfull interference to any other communications or public safety. Use proper Engineering practices and keep the content clean but not sterile. Act only in the public's interest and service to the public and you will be amazed how your efforts will satisfy the thirst of radio listeners that has been unquenched for decades.

Radio is to amuse,entertain and inform both the broadcaster and listener! Not to lay golden eggs!  Keep that in mind as you have now been welcomed in to the world of Radio Broadcasting

"HEY!, Whos on the air?"

In my opinion, many commercial stations have gone well above and beyond the image of radio broadcasting, and insert themselves into their communities at many levels, beyond playing "some music" and talking about the weather. Some generate interest in local affairs, entertainment venues, social interactions, and some even participate in improving the overall business climate. In other words, some stations are as much a part of their communities as the town square.

> Sure, the greedy and grossly OVERSIZED commercial interests fueled by the FCC's pressure to pay more money for every second of RF emission has all but destroyed everything that radio was sopposed to be.

Broadcasters pay less for their spectrum than just about any other radio service. This is in exchange for having a mandate to provide services and assume a public trust that goes along with the spectrum they acquire.

> Turning

There was a time when radio listeners said, "We're tired of all this talk; just play the music." Sometimes it pays to be careful what you which for. Confining nostalgia to the days of the DJs is not only not thinking out of the box, it ignores reality, since we still have many

DJs, both syndicated and local.

> People with disabilities you ask? Well if you are hopeing to make a

You can do both. My life for over forty years has been radio. I have made a good living doing radio. These are not mutually exclusive endeavors.

> Radio is to amuse,entertain and inform both the broadcaster and
> listener! Not to lay golden eggs!  Keep that in mind as you have now
> been welcomed in to the world of Radio Broadcasting

Once again, these states are not mutually exclusive. Some of the most successful stations in existence in terms of informing and entertain audiences have also been among to most lucrative for their owners.

I, for one, have no trouble compensating those who do good work...and compensating them well.

There was a mention of KING in an article about classical-music
public-radio stations in yesterday's NY Times:

http://www.nytimes.com/2010/04/26/business/media/26radio.html

Most of the article is about, no surprise, WNYC. But a few other
stations are also discussed.

Patty

Radio broadcasting is a mature industry.  Of COURSE people will be in it for the money, just as home building is a mature industry and you no longer see many homes being built as do-it-yourself projects as you saw in the 1930s.

Today you see home building companies putting up homes for the money.

Radio is no different.

So, get over it. If you want to do radio as a hobby, talk to your local non-commercial station and see if they have some time available. Jad from NPR's "Radio Lab" started about 10 years ago using throwaway time at 3:00am on WNYC, and now he's created an award-winning series that even Ira Glass from "This American Life" envies. It's THAT good. But he started with a garbage slot on a public station.

```

As of Friday, ABC (the TV people, who also provide coverage to Citadel's ABC Radio network) laid off 1/3 of its workforce.

I could never understand why ABC had to have separate bureaus from their O&O stations.  Now, I guess they won't.  A 1/3 cut in staff is dramatic.  Even Brian Rooney was let go.  The NY Times reports that their London bureau, which covers much of Europe has gone from 100 people to about a dozen today.

I'm reading a story from a 1934 radio magazine when the networks began building their news staffs.  Prior to that time, the networks didn't have much of a news presence.  Newspapers hated the competition so much that they began de-listing the networks from their daily radio program listings. There was actualy a time when newspapers dropped radio coverage except for their own stations if they had them.  My how times have changed.

Why do we need "networks" anymore when we have one giant amorphous Inter-network to distribute just about any kind of media you want?  I noticed the latest market ratings for SF & Sac show some audio streams creeping in on the bottom of the ratings.  I assume that is a relatively recent phenomenon.

Now I realize that is heresy to old school broadcasters but times are indeed changing.  It wasn't but a few years ago we were reading "Media Monopoly" by Ben Bagdikian now anybody can put out any content they want to just about anywhere in the global cloud.

Look at Leo LaPorte.  He still has his radio connections otherwise he is pretty well self contained.  Can't Art Bell (for example) or anyone else with a following do the same thing?

But I'm not a visionary.  It does seem like we are in a huge state of flux.  Where is it all going?  How does anyone make money at it?  If it's like music then we are in serious trouble!

I wonder if there were any changes that might explain the technical
difficulty which had KGO repeating insurance ads and promos at the
beginning of Brian Copeland's Sunday show...They tried to start the
bumper music a bunch of times, with no host voice following, and a few
times with someone mumbling of technical difficulty, then lots of
repeated spots....took 25 minutes to get the show started.

As recently as 1980, the news staff at KMJ, Fresno was forbidden from reporting any local news that had not already appeared in the co-owned Fresno Bee.  By a year or two later, some stiff competition had put an end to that.  McClatchy Newspapers later sold off its broadcast holdings.

>Why do we need "networks" anymore when we have one giant amorphous
>Inter-network to distribute just about any kind of media you want?

Funding is the only reason I can think of.  Programs such as "This American Life" couldn't be produced without the backing of the 500 Public Radio International member stations carrying the program.

>I noticed the latest market ratings for SF & Sac show some audio streams
>creeping in on the bottom of the ratings.  I assume that is a

Or it may be an anomaly due to one PPM user happening to listen to a stream from time to time.

>Look at Leo LaPorte.  He still has his radio connections otherwise he
>is pretty well self contained.  Can't Art Bell (for example) or anyone
>else with a following do the same thing?

But both Leo and Art are distributed by a network, Premiere, the distribution arm of Clear Channel.

I'm reminded of a time when KXL in Portland was running Talknet (this goes back a few years obviously).  Apparently they only part of an hour of the show and no backup, so they filled over 40 minutes with PSAs and ads.

With no backup to a live program and no music in the format, what's a board op to do?  At least in a music format you can play tunes and nobody's the wiser. But a dozen spots and people do notice.

That was a problem (or perhaps a cluster of problems) at KGO. It
had nothing to do with the ABC Radio network news.

Patty

If they are just talking heads, well sad but maybe not the end of the
world. If they were actually doing journalism, then it is a loss.

You look at the women on Fox News and that Sex Pistols hit comes to
mind: We're so pretty, oh so pretty, pretty vacant.

Yeah, Tom *did* know what he was doing, as evidenced by the book after the staff was fired, not unlike what happened at KMPX... 1968 was a watershed year, with the infamous radio strike at KMPX (Leon Crosby discovered a bunch of barefoot, longhaired *hippies* were the "air personallities" )...The movie "FM" *very loosely* depicted the staike at KMPX...and in 1968 Tom then went on to run KSAN (The Jive 95) for many years before he died (as mentioned in theSammy Hagar song "The

Fillmore Shuffle - "face down on the hallway")...and a scab crew was installed at KMPX at a new location near Fisherman's Wharf...

In those days you could catch a PSA flight between SF & LA for $12.oo...so it was easy for Tom to run both stations using the non formula he devised for KMPX...

And as an update, Dusty Street is now a drug councelor (!!!)...I remember her first day at KMPX engineering for the (late) Bob Prescott Show

What a long, strange trip it's been...

David Kaye <sfdavidkaye2@yahoo.com> had written:

> I could never understand why ABC had to have separate bureaus from their O&O stations.

I never understood why the networks had to have their own bureaus and their own correspondents when their affiliate stations, in most areas, had perfectly capable news departments. I guess the network felt it got a better quality product that way. Somehow, on the radio side of things, it could be somewhat different. I remember contributing quite a few stories to the CBS network when I was a reporter in KTRH in Houston. Those stringer checks were a nice little bonus.

> I'm reading a story from a 1934 radio magazine when the networks began building their news staffs.  Prior to that time, the networks didn't have much of a news presence.  Newspapers hated the competition so much that they began de-listing the networks from their daily radio program listings. There was actualy a time when newspapers dropped radio coverage except for

|  their own stations if they had them.  My how times have changed.

Now newspapers don't cover radio at all.

During the days of NBC Monitor, there were lots of reports from affiliate stations. Likewise with Mutual. But CBS and ABC seemed to not like dealing with the affiliates much at all, stringers yes, but not affiliates.

>I guess the network
>felt it got a better quality product that way.

I remember when ABC Radio had Peter Cleaveland stationed at KGO specifically to do network takes on Bay Area stories. We never heard him except on the network news. I'm sure he was a nice guy and all, but I don't remember his news coverage being any better than that of Ray Tannehill or others of the day who did news locally at KGO.

>
>Now newspapers don't cover radio at all.

Well, times have changed, of course. The newspapers do cover TV to an annoying degree.

ailuropoda melanoleuca torontonensis <chris.ambidge@utoronto.ca> wrote:

>today is the anniversary (1937) of the destruction of the *Hindenberg*
>by fire.

What's most remarkable about this explosion and fire is that it is probably the first documented case of news media hype for the sake of hype.

While it's true that it was a terrible loss of 35 lives, there are also a few things to note:

(1) The story wasn't done live.  It was recorded on a wire recorder and the commentator, Herb Morrison, asks a couple times of his assistant, "Get this, Charlie, get this, Charlie" to make sure he was getting a recording.

(2) It was not "one of the worst catastrophes in the world," either.

(3) Though 36 people died, it was not the heaviest loss of life during the decade, nor even the heaviest loss of life due to airship disasters.  The

U.S.S. Akron disater 4 years earlier took more than twice as many lives. What made it remarkable was that it was recorded for posterity.

The Hindenberg disaster should be a lesson to all of us that what is on the news is not the sum total of what's happened in the world that day. Another example is the quake of 1989. It looked like San Francisco was being burnt to a crisp, and yet it was only a couple buildings fed by a gas line that nobody knew how to turn off. The shots were shown over and over again because ABC happened to have a helicopter in the sky for World Series coverage. Far more loss of life and destruction happened in communties such as Santa Cruz, Watsonville, and Oakland that day.

In Virginia, I believe we had a couple or three hours of non-dated Clark Howard shows burned to a CD.  We also had a CD filled with station promos and PSAs, but for short-term fill.

David Kaye <sfdavidkaye2@yahoo.com> wrote:

>(1) The story wasn't done live.  It was recorded on a wire recorder and the commentator, Herb Morrison, asks a couple times of his assistant, "Get this, Charlie, get this, Charlie" to make sure he was getting a recording.

Actually, it wasn't a wire recorder; it was recorded to lacquer disc. The engineer, Charlie Nehlsen, had to work quickly to ensure the shock wave of the explosion didn't cause the cutting stylus to dig into the disc's aluminum base.  If it had, the stylus would've been ruined, and there wouldn't have been anything recorded after Morrison said, "It burst into flame...".

The following is a link to a discussion of the recording and its later broadcast (apologies for the line wrap):
http://web.archive.org/web/20070814144201/http://members.aol.com/jeff1070/hindenburg.html

The version of the recording that most people have heard runs at too high a speed; poor Herb Morrison almost sounds like a chipmunk.  A corrected speed version of the recording is a revelation; it can be

found about halfway down this page:

It seems odd that a Chicago station would send someone to New Jersey to record what should've been a routine event (the Hindenburg had been making transatlantic flights for a year prior to its last flight, and other Zeppelins had been flying the route for years). The reason for Morrison being there, though, becomes clear when one listens to the full recording (36 minutes, though not speed-corrected) at http://www.otr.com/hindenburg.shtml .

Seems that the recording was intended to promote American Airlines' service from Chicago to Lakehurst (via Newark), which would then connect with the Hindenburg to provide transatlantic service all the way from the heartland. Obviously, the recording never got used as originally intended...

This is one of the worst-written blog entries I have ever seen.  People who put up blogs that purport to be news should at least take English classes so that they will be able to write sentences that won't embarrass them.

>From Dr. Demento Website

June 6, 2010

A SPECIAL ANNOUNCEMENT...

This weekend, the Dr. Demento Show will have its final broadcast on KIYU, KLOO, WLVQ (QFM96), WRKH (The Rocket) and KOZT (The Coast).

This was a very painful decision for the Doctor...he really hates to let it go after almost 40 years...but he has come to agree with his manager and his family that it's necessary. The broadcast has been losing money for some time.

THE GOOD NEWS -- Dr. Demento intends to continue producing new shows every week for www.drdemento.com for the foreseeable future. A new one will be available Saturday morning, June 12, and more new shows will be posted every Saturday thereafter.

Also...if you live in or around Amarillo, TX, you're in luck...by special agreement and due to contractual considerations, a version of the internet show will be heard weekly on KACV-FM there, at least through the summer.

The Doctor wishes to express his grateful appreciation to everyone who's been listening in Alaska, Oregon, Ohio, Alabama and California, and hopes all of you will give the www.drdemento.com broadcast a try.

Stay deeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeemented!

http://www.drdemento.com/index.html

Seems that the recording was intended to promote American Airlines'
service from Chicago to Lakehurst (via Newark), which would then
connect with the Hindenburg to provide transatlantic service all
the way from the heartland. Obviously, the recording never got used
as originally intended...

I have some questions for anyone that remembers the station.  Thanks in advance.

The station was originally licensed in Barberton, but why?  The transmitter was always in Medina (Seville actually).

Why locate the station in Medina (Seville) to begin with?  Seems like an odd location to serve Cleveland & Akron.

I was told that the tower was 430 feet, but is that true?  I know that they did have problems with Cleveland reception, despite the almost 120 KW ERP.  That would suggest the tower was actually shorter than 430 feet.

Is the tower at 41.051347,-81.813555 (8165 Tower Rd Seville, OH 44273) the original WDBN tower and is it still used for broadcasting?

What was it that passed for studios before the building was used by WDBN?  As I recall it was a small block building, about the size of a 4 car garage,  that looked like it was built for some other purpose.

Did WQMX ever actually broadcast from that location, or was it moved to the WAKR-TV tower on Copley hill first?

Anyone know of a complete history of the station with pictures?

Thanks,
Dave

Sorry I don't know the answers to your questions, but I have always been interested in this sort of thing.  When you say "Copley hill", where do you mean?  The old WAKR-TV tower (later WAKC, now WVPX) isn't where WQMX is located.  WONE is on that tower, but WQMX is on channel 49's tower (which is in Copley).

If KMJ had any such policy in the '80's it had changed from the '60's.  From 1961 to 1966 the KMJ-Bee cooperation was total.  I did McMahon's 5:15PM local cast during that time and the final thing I would do when I had it written was to go up to the 4th floor and take the latest dupes of tomorrow's copy, which I would either re-write,

read or ad lib from.  So listeners got tomorrow's Bee today from me.
TV had the same privileges and I assume they did the same thing for
their six o'clock news.

How're things there in Bakersfield?

Gil Haar

It was owed by Bob & Pam Miller of Medina and the station was out on
Gateway drive by I-71, Bob has pasted away but Pam still ownes and
runs Gramercy Gallery just off the square, If you stop in there she
might help you.

Hello

This is my first posting here. I was wondering if there are other then
FCC databases (http://www.fcc.gov/mb/databases/cdbs/) about radio
stations in the USA. I'm trying to create a web site and graph the
radio towers on it.

I was also wondering if there is an easy way of calculating the reach
of the station - like you can see here
http://www.radio-locator.com/cgi-bin/pat?call=KFI&service=AM&status=L&hours=U

I would appreciate any help thanks.

>I would appreciate any help thanks.

Bob Carpenter makes useful PC-based applications to visually present the FCC radio and TV databases and display signal contours:

http://home.earthlink.net/~lvehorn/

as well as generate KML overlay files that can be viewed on Google Earth:

http://earth.google.com/

The applications run in a full-screen DOS window, but should work on most versions of Windows (the author recommends using an x86 DOS emulator with Vista). They can also be updated against the most current FCC databases.

I hadn't heard this commercial, which has now been taken off the air:

http://www.sbe.org/pub_sc.php#BPCommercial

Did anyone here run across it, or hear about any stations that had
trouble when their local EAS primary station aired it?

Patty

Back in the mid 70's I had a similar situation in Battle Mountain Nevada. At the time I was the county counselor. I talked it over with the school board and got them to agree to help fund the first High School owned and operated FM Stereo Educational radio station in the state of Nevada. It required additional contributions from the community. We applied for a 10 watt educational license and got it at 88.1 FM.

In town was a 1st class licence operator who volunteered time to be the station engineer. We bought a reasonably inexpensive remote board and the 10 watt transmitter. Mounted the antenna on top of a telephone pole the shop class erected next to the school and "studio". Some of the high school kids were interested and were the announcers after school. I spent a lot of time recording daytime and late evening shows on tape that could be played before the kids were on and after.

Had reasonable town support and contributions. Fit into the school fairly well with the student DJ's.

That was a long time ago, but it can be done. Something to consider

Yes

On the production computer you can install a Shoutcaster server (Free download)

Then us this to create streams. The number of streams depends on the power of your computer.

Then computers link to your production server and the port you have put the shoutcaster server on.

say 192.168.1.50:8000 where 192.168.1.50 is the IP address on your network of your PC and 8000 is the port for the shoutcaster server.

Read the docs at http://www.shoutcast.com/

Radio Limerick One is a web based radio station broadcasting from Limerick City in the Midwest region of Ireland and can be heard on the internet and on WI-FI radio. The station aims itself at Limerick people at home and abroad and has succesfully captured and retained this audience for many years.

RLO is committed to providing a generous mix of music and chat, 24 hours a day and places strong emphasis on creating a forum for Limerick based musicians to have their music heard globally via our webstream service.

Our music mix is purely 100% Irish with a strong emphasis on Limerick singers and entertainers.Our aim is to feature a Limerick song in every 3 we air. Our chat shows, of which we broadcast an estimated 25% of our daily output are strictly focused on local affairs and are aimed exclusively at our local based audience regardless of geographical location in the world.

In the last 2 years RLO has reinvented itself since it was taken over by new management and crew. Our policy is to cater exclusively to the 40+ age group who are seeking to listen to a locally based service, presented by local people for local people and featuring a heavy emphasis on local singers and entertainers

We also aim to offer full access to local listeners to the airwaves and our LIVE phone in shows allow our listeners the freedom of the airwaves with due respect to all listeners and participants.

Our station aims to respect all faith traditons but there is an emphasis on a predominantly Catholic audience and we do offer religious programming to cater to this audience.

But, at the end of the day we are a group of dedicated Irish Music Lovers all doing what we love to do and want you to have fun with us.

We hope you enjoy our service.

The basic story: back when this group was more active, it was moderated
by Bill Pfeiffer, who was a hell of a guy and made this group a unique
and wonderful thing.  Bill died a few years back, I am sorry to report.

Much as the current moderation staff tries, I fear they aren't able to
do the kind of job Bill did.  But for that matter, nobody in any other
forum anywhere has ever come close to doing the kind of job Bill did.
He is greatly missed.

Sure, but that's just internet broadcasting under a different name.  Or
maybe intranet broadcasting if you want to maintain an independant wifi
network for the job.

>I was thinking of an earlier thread from someone who was looking for a way
>to broadcast to his neighbors in a small town.

The problem is that you're now paying royalties for the music, which is
more than you'd be paying as a noncomm broadcaster for ASCAP and BMI
licensing.  Also the audio quality isn't so hot.

>What would be involved and how many people could tune in the stream at a
>time?

It's multicast, so as many people can tune in as can get within range.
That last bit, though, is a real bear.

A podcast might be a good idea, too, come to think of it.
For small town broadcasting many times it doesn't have to be live. They
could start a commnity web page with local news and weather and links to
podcasts on different topics.

> He is greatly missed.

Staff? If I have lackeys running around anywhere, I sure don't know about them. :) Mine is a staff of one. :)

Thanks for the kind words. I try, but I don't think I will ever be able to be as dedicated as Bill was. I was a reader of RRB long before I ever considered moderating the forum. His level of dedication was way beyond incredible.

My problem has primarily been that work keeps me busy, and the group has recently gone long periods of time without any new submissions being pushed through. That's my fault, and I finally just set up my server to email me every day to remind me to check the moderator's mailbox. I swear I have a mind like a sieve... and that's on my good days.

I would love to have feedback on how we can make this a better and livelier place. The email address I use to post to Usenet is valid. Feel free to email me any and all suggestions, or post them here.

The newly revised updated edition of

Creating Powerful Radio:
Getting, Keeping and Growing Audiences for News, Talk,
Information & Personality
from Focal Press
Order your copy now from www.amazon.com.

"This is the book I wish someone had given me..."
-David G. Hall
VP/Programming CBS Radio
KNX & KFWB Los Angeles

"Filled with the essential tricks of the
trade that take an entire career to learn"
-Lee Harris
1010 WINS/ New York

"My copy keeps getting stolen off my desk."
- Cathy Hughes
CEO Radio One

"Now I've got the help I need to find and develop hit talent."
-David Gleason
Vice President of Programming
Univision Radio

For Managers, Programmers and Talent

* GROW AUDIENCES - Increase your ratings! LifeStage Demographics: Know your audience and how they listen.

* PROGRAMMING Build exciting programming - even on dull news days - with proven techniques to guide programmers and talent to the next level of performance.

* NEWS Write and deliver powerful news. Learn multiple version techniques and much more.

* PERSONALITY Identify winning talent. Develop strong air personalities. Learn to
manage high ego talent and motivate your staff to do their best.

* TALK Secrets to improve your show. Learn powerful radio interview techniques and ways to make the talk win big.

* INFORMATION Break down the walls between news and entertainment radio. Creative methods to easily write and deliver complex, detailed stories or issues using the multi-version method.

* PROMOTIONS Learn methods to spread the word about your station and write powerful copy for more effective promos and commercials

* AIRCHECKING A comprehensive step-by-step guide to show prep and effective airchecking.

What people are saying about
Valerie Geller's Creating Powerful Radio

"A tremendous work!"
- Scott Shannon
program director/air personality
WPLJ, New York

"This is the book I hope my competitors don't read.
It's required reading for my staff."
- Jerry Bell
managing news editor,
KOA/KTLK, Denver

"If you want to understand what makes radio work, read this,
then read it again."
- Jon Faine
air personality,
774 ABC Radio
Melbourne, Australia

"It should be a textbook."
- Chris Berry
general manager,
WMAL, Washington, DC

"If you want to achieve compelling radio and increase
audiences, read this book immediately! Station 97.3 in London
has experienced massive growth using its methods."
- Scott Solder
programme controller
LBC Radio, London

"This book helped me create Britain's most successful local
radio station, with a 40 percent market share and number one
in the UK. Buy it. It works!"
- Keri Jones,
CEO/Radio Pembrokeshire
Wales, UK

"Making it in broadcasting takes more than just luck.
Creating Powerful Radio is your 'Road Guide' to success in
radio."
- Andy Vierra
program director
KNUU, Las Vegas

"This book will help your show get better."
- Al Rantel
talk show host
KABC, Los Angeles

"Wonderful."
- Paul Fisher,
vice president, Rogers Radio
Vancouver, BC, Canada

"Valerie Geller's first book was a triumph. It has proved to be an excellent primer for my staff. Valerie is an inspiration. If you can't get her for your station, buy this book."
- John Ryan
managing director
BBC Radio. Manchester, UK

"This should be required reading in every newsroom and every radio station."
- Radio World

Note: A complete and full instructor's manual, by Prof. Melissa McConnell Wilson with contributions from Prof. LInwood Hagin, will be provided upon request from FOCAL PRESS if you are interested in using Creating Powerful Radio for your class curriculum.

Valerie Geller is an internationally acclaimed broadcast consultant working with stations that emphasize news, talk, information and personality radio.

www.gellermedia.com

Valerie Geller's
Principles of Creating Powerful Radio:

1. Speak visually, in terms your listener can "picture."
2. Find, and start with, your best material.
3. Tell the truth.
4 Never be boring.
5. Listen to your station, even when you are not on.
6. Make it matter.
7. Always address the individual, use "you."
Talk to ONE listener at a time.
8. Do smooth and engaging transitions & handoffs.
9. Promote, brag about your stuff.
10. Brag about other people's stuff
11. Be who you are on the radio.
12. Take risks. Dare to be great.

"Creating Powerful Radio is a fine guide for people inside the radio biz and an explanation of that biz to people outside, including the people who would like to get in. It's the kind of book where the reader thinks, 'Oh that's why they do that.' "
- David Hinkley
New York Daily News

"Creating Powerful Radio might eventually make an executive's job at a satellite formatted affiliate much tougher."
- Professor Peter Hunn
Communications Studies Department
State University of New York, Oswego

"It's great. Read it!"
- Kim Komando
syndicated air personality

"I recommend it to everyone and I use it in my classes. I love this book."
- Jo Maeder (The Rock 'N Roll Madame)
air personality and instructor
New York University

"Packed with insights, well written, and fun to read. It's
obvious why so many radio people consider this book 'a must!'
"
- John Sawatsky
professor of journalism
Carleton University, Ottawa, ON, Canada

"Brilliant."
- Phil Taylor
BBC, Scotland

"Creating Powerful Radio contains valuable tips and
information for presenters, managers, and programmers."
- Julia Sullivan,
Music & Media

"Useful and practical."
- Jan Orskov
journalist,
Danmarks Radio, Denmark

"It's my bible!"
- Asa Paborn
program director,
SBS Radio, Stockholm, Sweden

"We gave copies to the entire staff."
- Viktor Worms
Antenne Bayern
Munich, Germany

"Anyone even considering a career in radio should read this!"
- Adele Scheele, Ph.D,
Career Strategist, author: "Skills for Success"

Our company is basically into radio services and news bulletins for radio stations and also programming for basically.you guessed it. Radio stations! :-)

Putting all this to work and after lots of developing time, we created and released our latest software which we call e-Weather client and we believe that it will be very helpful to Radio Stations and broadcasting.
e-Weather Client gets current weather conditions for any given city (set in the options menu) in the world (from various meteorological sites) and then it creates 2 MP3 files with human voice (not synthesized) with an option for male or female voice.
The first MP3 file speaks the local temperature for example "Local temperature now is 67 degrees." and the second MP3 file has wind information "The Winds are coming from North-West at 14 miles per hour.". All temperature/wind units and measurement types can be set at the options menu.
It also creates a text file with the above info that can be fed directly to an RDS system, so the radio listeners can also see the weather data in their radio displays.
It checks various weather sites for local weather conditions every 5 or 10 or whatever minutes we want (also set via the Options menu) and of course a radio administrator can set their On Air software to broadcast the 2 MP3 files at any given time, every half hour, after the news bulletin, after the hour announcement etc. All they have to do is place the 2 MP3 files

"Temperature.mp3? and "Wind.mp3? on rotation.
The RDS works like a charm and also features fully programmable prompts as well, so you can customize your weather message.

e-Weather client is available as a monthly subscription service at a really low cost.

If you think that you might be interested please feel free to visit :
http://www.datamax.gr/eng/n_wclient.htm

The English demo files can be found at the aforementioned url :
or better yet hear male and female

Thank you

Ted

Hi gang,

It has been a very long time since I've posted to the broadcasting group. I've been a very busy boy!

I'm starting a new radio show (first on XM and then other stations to follow) based on Ben Ohmart and Jim Harmon's excellent books: IT'S THAT TIME AGAIN: NEW STORIES OF OLD-TIME RADIO.  I am writing many of the new scripts myself, some based on the short stories in the books, most original.

For example, I have adapted THE FRED ALLEN MURDER CASE by Laura Wagner and HONEST HAROLD: ATTACK OF THE CRAWLING THINGS FROM OUTER SPACE by Justin Felix, into scripts that read exactly like a JACK BENNY PROGRAM and HAROLD PERRY show.

We have some big stars lined-up, none of whom I am allowed to announce yet :-(

We are recording our first pilot with an audience next Tuesday.  See the press write up we got below:

THE NEW OLD TIME RADIO HOUR *Live On Stage*
March 20, 2007, 7:30pm, Poughkeepsie, NY
Dutchess Community College's James and Betty Hall Theatre presents radio personalities and voice impressionists Joe Bevilacqua and Lorie Kellogg (Napanoch, NY) of XM radio's "Comedy-O-Rama Hour" who will be recording newly scripted tales using OTR characters of the past: "Fibber McGee and Molly in The House of Wax") and "Duffy's Tavern: If We All Talked Like Allen Jenkins" for their new radio series: "The New Old-Time Radio Hour," before a live audience.  The shows will feature a full sound-effects table, live music, and five radio actors. OTR CDs, DVDs, and books will be raffled. Free. (845) 431-8612. www.comedyorama.com

Finally, you can check out our previous demo, which was done without an audience, for HONEST HAROLD.  Yes, that's me as Harold Perry and Marshal Pete.  My wife, Lorie Kellogg essayed the rest of roles, even Harold's boss!  We will be redoing this show with an audience in the future.  But we plan on running this version on our COMEDY-O-RAMA HOUR on XM's Sonic Theater Channel 163.

By the way, you should check out our show.  We are not only doing new radio theater in the old style but we often play very rare OTR from the 1940s, 50s, and 60s, from the Daws Butler estate.

Any way, check out my HAROLD PERRY impression in:

HONEST HAROLD: ATTACK OF THE "CREEPY" CRAWLY THINGS!

online now at:

http://www.comedyorama.com/xm/cor-radio-online-listen.htm

And if you live in the New York City or Hudson Valley, NY area, come to our show! Our guest stars will be... EDWARD G. ROBINSON, ALLEN JENKINS, and VINCENT PRICE! (Well, it is 1953, ain't it?)

Best to you all,

Joe Bev.

RADIO FREE OZ GOES FROM FM TO AM RADIO:

40 years ago, Peter Bergman and his Radio Free Oz program, which was then on KPFK/fm, began broadcasting Easter Sunday March 26th, 1967 on KRLA/am the night of the First Los Angeles Love-In with Firesign Theatre members and Phil Austin, Peter Bergman, David Ossman and Phil Proctor. The phrase Love-In was coined for that event by Peter Bergman..

March 26th 2007 is the 40th Anniversary of the First Los Angeles LOVE-IN

1967 Easter Sunday LOVE-IN:

Los Angeles Elysian Park LOVE-IN, Easter Sunday 1967 (March 26, 1967), 6AM (Sunrise Service) through 9PM

Announced by The L.A. Free Press and on KPFK/fm and Radio Free Oz, which began broadcasting on KRLA/am that night, with The Firesign Theatre (Phil Austin, Peter Bergman, David Ossman, Phil Proctor).

[from the event poster] "an offering to the city of los angeles"; "All Los Angeles Rock Groups"; "Bring Bells, Flutes, Flags, Drums & Flowers"; "Bring Tangerines, Food, Incense, Candles & Joy"

The Human Be-In had taken place January 14, 1967 in Golden Gate Park, San Francisco.

Firesign Theatre Roots

WGN is reporting that x-morning man and Sat radio jock Eddie Hubbard died in a car accident in Texas earlier in the month.

His wife Lilli, a native Chicagoan, sustained injuries and is in the hospital, expected to recover.

Eddie joined WGN in 1956, later moved to Mokena, IL and Texas for Satellite radio.

Eddie Hubbard's broadcast career began in his hometown of Baltimore, Maryland, but it was here in Chicago where Hubbard became a radio legend.

Hubbard came to WGN in 1956, where he co-hosted a talk show with another radio legend, Jack Brickhouse.

Hubbard moved on eventually to satellite radio in the 1980s, which took him from Chicago to Texas. Since then, Hubbard hosted programs heard on radio stations from coast to coast.

Hubbard and his wife, Lill, were injured in an auto accident in their adopted home of Grand Prairie, Texas on March 19th. Lill is recovering, but Eddie Hubbard died from his injuries on Monday.

Eddie Hubbard was 89.

Terrible.  He was truly a legend.  I listened to him in the '50s and later used him as a role model when went into broadcasting. He's one of a kind and will be missed.

To make a long story short, a producer that has previously set up shows for VoiceAmerica (http://www.voiceamerica.com/) has pitched them a sports show for their upcoming sports channel.  The show would be hosted by me and is an interview show.  The producer has already lined up one sponsor for the show but he needs to get at least another one to make it a go.  If the producer gets sponsors to cover 25% of the production cost, VoiceAmerica will cover the remaining 75%.  I am not being asked to give them money or get a sponsor.  That's the producer's job.  The producer did ask if I knew of a potential sponsor but when I said I didn't, he went ahead and got the first one.  If I did pay money to get the show off the ground, VoiceAmerica would pay me back all such money with future ad revenue.  I have no interest to paying anything to VoiceAmerica so if the producer can get and additional one or more sponsors, the show will be a go.  As the show's host, I would own all rights.  Even odder is that I would not get paid for hosting but receive 50% of all ad revenue brought in by the show.

Another odd thing is that VoiceAmerica apparently will not cover travel expenses incurred by the show.  That would come out of my pocket.  But to do my show, I would need to travel to do the interviews in which the show would specialize.  I told the producer I wouldn't eat this cost.  He said VoiceAmerica wouldn't either.  I said then I will not do the show.  He did give me a bit of a song and dance on how much producing a show costs VoiceAmerica, but I pointed out how much travel expenses would cost.  But when I again said I wouldn't eat the travel expenses, the producer said he'll talk to other producers and see if something can be worked out.

I am curious to know if the above is basically how radio shows are started.  The producer said this was the case with all broadcast and Internet radio shows.  That seems real odd to me.  Very odd.  But maybe I'm wrong.  Am I?  If you know how radio shows are started up, please tell all.

Thanks in advance!

Scott

Subject: [Airwaves] Is this how radio shows are started?  Questions about V=
oiceAmerica

To make a long story short, a producer that has previously set up
shows for VoiceAmerica (http://www.voiceamerica.com/) has pitched them

a sports show for their upcoming sports channel.  The show would be hosted by me and is an interview show.  The producer has already lined up one sponsor for the show but he needs to get at least another one to make it a go.  If the producer gets sponsors to cover 25% of the production cost, VoiceAmerica will cover the remaining 75%.  I am not being asked to give them money or get a sponsor.  That's the producer's job.  The producer did ask if I knew of a potential sponsor but when I said I didn't, he went ahead and got the first one.  If I did pay money to get the show off the ground, VoiceAmerica would pay me back all such money with future ad revenue.  I have no interest to paying anything to VoiceAmerica so if the producer can get and additional one or more sponsors, the show will be a go.  As the show's host, I would own all rights.  Even odder is that I would not get paid for hosting but receive 50% of all ad revenue brought in by the show.

Another odd thing is that VoiceAmerica apparently will not cover travel expenses incurred by the show.  That would come out of my pocket.  But to do my show, I would need to travel to do the interviews in which the show would specialize.  I told the producer I wouldn't eat this cost.  He said VoiceAmerica wouldn't either.  I said then I will not do the show.  He did give me a bit of a song and dance on how much producing a show costs VoiceAmerica, but I pointed out how much travel expenses would cost.  But when I again said I wouldn't eat the travel expenses, the producer said he'll talk to other producers and see if something can be worked out.

I am curious to know if the above is basically how radio shows are started.  The producer said this was the case with all broadcast and Internet radio shows.  That seems real odd to me.  Very odd.  But maybe I'm wrong.  Am I?  If you know how radio shows are started up, please tell all.

Thanks in advance!

Scott

I agree, I accept full responsibility, and I would ask what I can do
to make things better, besides remembering to check the mailbox every
day (but I've already addressed that problem).

TUNED IN RADIO, THE NEW RHYTHM OF THE NATION IS FOR SALE!

THE WEBSITE (www.tunedinradio.com).......ALL THE SHOWS (678).......ALL THE INTERVIEWS (over 400).......ALL THE CONTACTS...

Only $7000.00 for everything!

FOR COMPLETE INFORMATION EMAIL ME OR CALL
1-905-883-5773

Approximately 1,000 hits per day!

Tuned In Radio, The New Rhythm Of The Nation is a one hour syndicated dance radio show that was on the air from Nov. 1991 - Nov. 2004. It started off as a Top 5 CHR show that was aimed at the 9 - 15 year old demographic and evolved into a Top 10 Dance Show that was aimed at the 16 - 24 age demographic. There are hundreds of interviews from independent and major artists including Alphaville, Third World, Alice Deejay, Simply Red,

George Clinton, Inner Circle, Big Mountain, and the late
Barry White and James Brown to name a few.
The first 420 shows are on cassette and the rest are
on CD. For the last couple of years of the show we
were charging $50.00 per show. I am still publishing
the Top 10 Dance Chart every other week that is emailed to
over 200 people, faxed to about 50 people in the
industry, posted on over 90 newsgroups and on the
website.
If you would like any more information please email me
or call 1-905-883-5773.

Sincerely,
Dave Aptheker

*Pacific Radio Heritage #16*
*April 2007*

*Latest news from the team at the Radio Heritage Foundation [ www.radioheritage.net], the non-profit organization sharing stories of radio from around the Pacific region. *
Now that Easter is over, here's an update on what's new at the website, some of our projects, and an invitation to think about ways you can get involved, even if it's just for a few hours here and there.

*We get asked 'what do you mean by sharing stories', or 'I'm a DJ on a contemporary FM station, what's this history stuff got to do with me?' *
It's simple...we provide a single place online where anyone in the world can start looking for anything to do with radio broadcasting in the Pacific.
We're a free virtual archive. Instead of putting old tapes, recordings, photos, cards and letters into a vault and demanding you make an appointment and physically travel thousands of miles to come visit us, we want to serve them up digitally for free.

So 'sharing stories' can mean anything to do with radio. It might be writing a few words about a station you once worked at or listened to. It may be sending some photos, or some promotional items that you've kept. Sending us an old magazine article. Copying a newspaper clipping. Sending a CD or tape recording.

If you work in radio today, think ahead 10 years. When your 'old' station celebrates an anniversary, who's going to produce the old on air clips and airchecks, the old photos, the old station letterhead? Especially in these digital days. Who cares? You'll be surprised how important today's unimportant little memories and items will suddenly become!

Why not bundle some material up now, and send it to us before you forget...our address is Radio Heritage Foundation, PO Box 14339,

Wellington
6241, New Zealand.

*Vintage takes on a new meaning for today's audience*
In Newsletter #15 we talked about nostalgia, babyboomers and 'Sentimental Journeys' and how this all relates to radio. From Philip Knighton in the UK we got this response:

*I run a vintage wireless shop in the UK. After trading for 25 years, I've seen the market change completely. In the first 15 years, buyers were collectors. In more recent times, buyers say it's because they want a radio just like their parents and grandparents used to have. It seems that as the world becomes seemingly more complex and dangerous, many folk want to have personal reminders of more comfortable days around them. They actually want to sit at home listening to the warm sound of a vintage radio because it's calming and offers reassurance. *
**
So, there you have it. People who buy vintage radios are increasingly younger people, the same way that nearly everyone involved in commercial radio around the Pacific today is aged under 40. Listeners range from the Radio Disney audience of under 10 year olds in Los Angeles, to the 50+ market targeted by the highly successful Coast brand in New Zealand.

*What's new at the website www.radioheritage.net*
Earlier this year, the woman imprisoned and later pardoned by the US as 'Tokyo Rose' passed away, and we've got *Tokyo Rose Broadcasts *and *Radio Tokyo at War *as an introduction to these WWII propaganda broadcasts.

>From the same era, check out *OWI Central Pacific* for Part 1 of a photo essay about KRHO Honolulu and KSAI Saipan...and the personal story of how *Radio Eniwetok WXLE* was built back in 1944...along with the *original* artwork for the station logo that's now in our collection.

*Vietnam Village Radio* is an inside look at local community radio, whilst *Nelson's Fifeshire* explores the visual and audio history of a small town radio dream that grew into part of the multinational Canwest media empire in New Zealand...and, some great old artwork to celebrate the *70th Anniversary of 2ZB Wellington [NZ] * that began broadcasting in 1937.....

Also check out the *3YA Christchurch [NZ]* opening day photo, which came from a wonderful afternoon spent with Winstone Harris, son of the 3YA founder in the mid 1920's. There's also a nice photo of *WDJD American Samoa.*
**
*Coming Soon* to www.radioheritage.net is the *ANZAC Salute *featuring a photo gallery of the WWII Australian Army Amenities Service stations in the SW Pacific and the NZBS Middle East Mobile Unit...an inside look at *1ZB Auckland *in 1936 [with many thanks to Bill Francis of NewstalkZB]....more from our popular *Long Lost Australian Radio Stars Series*.....* *how radio began in the *Cook Islands*......photos and audio of *Radio Manukena FM Easter Island*.....and some *Great 'ham' Shacks *as we open the vaults to look at some of the 30,000 amateur radio QSL cards we recently began processing into the archive.

*Our bookstore and more.......*
A small means of raising funds for us involves our online book store with great selections of radio and media related books, and vintage radio books...and **NEW** we've recently added *Pacific Radio Shack* our new online store with hundreds of radio related books, magazines, electronics, CD's and DVD's...so visit www.radioheritage.net soon and support us whilst stocking up on your favorite radio items.

*Special Book Offers*
We've got just a couple of *Pirate Years* Radio Hauraki 40th Anniversary books left...only 500 are being printed...and you get your name printed in the book..but, you must be quick as we sold out of our original allocation!
Full details right here at www.radioheritage.net.

The original *Shoestring Pirates* story of Radio Hauraki and the CD *Fresh Pacific Wind* [full of Hauraki jingles, interviews and more] are almost out of stock, but we have a few left and full details are again, at the

website.
Well worth collecting.

Not only was Radio Hauraki inspired by the British pirate radio stations of the 1960's, but Australians and NZers featured as financial backers and DJs for a number of them and some, such as Radio Veronica, were even heard in the Pacific!
Mike Leonard's classic *'Beat Fleet' *guide to the UK pirates will soon be available from us as well...and keep an eye out for *Don't Touch That Dial*the story of Australian commercial radio that you'll also be able to get directly from us soon.

*Art of Radio*...your votes are still coming in for the next exhibition you want to see online at www.radioheritage.net and you can still cast your vote until May 1. Leading choices are NZ [24%], Country Australia [17%] and Pacific Islands [14%] and, a reminder that our latest *RNZI Radio Heritage Documentary* looks at Australian Country Radio in 1962, and is available as audio-on-demand from www.rnzi.com under 'more audio' for the April 2 edition of Mailbox. Listen for our next documentary on April 16.

*Radio Guides.......*our free access radio guides are used by hundreds of listeners and station personnel each week..with *Pacific Asia Log Mediumwave *and *Pacific Asia Log Shortwave *[both compiled in Seattle by Bruce Portzer] full of useful data, *NZ Low Power FM* [and *LPFM Blog*] gaining in popularity and the *ONLY *database of its kind available...and *NZ @ a Glance* for station brands and formats on AM. All easy to use and, best of all, free!

*Great Australian Vintage Radio DVD*...is a double DVD with 90 minutes of exclusive coverage of Australia's greatest vintage radio collections, interviews, rare models and makes, and the only DVD of its kind...produced by Steve Savell from Perth....it's an absolute must for any vintage or classic radio collector. Available right now, visit www.radioheritage.netfor all the details of how to make sure of your copy whilst stocks last! Let your friends know too!

*Radio Stories from Malaysia, Hawaii, Vietnam, Australia, NZ, Los Angeles, India, Fiji, Samoa, New Caledonia, Japan, Philippines, Papua New Guinea and many many more....*all available online right now, plus direct links to all major *Pacific *and *Asian radio broadcasters!*

*Newsletter #17* follows shortly and features our new *'Celebrating our Sounds' *heritage campaign details...and how you can get involved whether you live in Auckland, NY, Nice or Tokyo!  We'll also have details about the *Pacific Radio Conference* planned for September 2008.

*Volunteers* already support us in many ways and from many places. Do you have a few hours a month to do some online research? Will you help write press releases for local newspapers and magazines in your area about our programs and activities? Can you monitor your local radio dial for a few minutes each week and help keep our radio guides accurate?
This global platform of www.radioheritage.net means you can live anywhere in the world and support us! Email us today.

*Radio. How could we live without it?*

The Radio Heritage Foundation is an independent and registered non-profit charity supported by individuals and businesses with donations of funds and materials. We share the vision to collect, protect and celebrate the radio heritage of the Pacific.

The Imus ranch is a brilliant scam. He persuaded a bunch of corporate donors to build him a multi million dollar estate in New Mexico. Imus uses the property as his private residence. Getting the project classified as a charity makes everything tax free. The cancer kids are only allowed on the ranch ten weeks per year, they cannot be accompanied by their parents and they are not allowed to sleep over. The dying tykes show up in the morning, muck out the stalls and leave by nightfall. Imus created The Perfect Con.

Also, Usenet in particular seems to be going by the wayside, as new users flock to the web-based forums (Radio-Info, et. al) This has happened with a lot of Usenet groups that I used to hang out in....nothing but some spam blowing around like trash at an abandoned subway station.

If you will pardon the "cattle' reference, bullshit. The ranch is NOT owned by Imus, but by Hackensack Med center. Imus plowed a lot of his personal finances to build it, even with corporate donations, which are a tax write off for them.  Parents DO come with their kids, if they needed to...they DO stay in  a separate residence on the ranch. Ever been there? If not, how in hell do you know so much misinformation? Ah, maybe it's your imagination...

Those "dying" kids come out a hell of a lot better that anything you can do ...and you HAVE done something for the kids haven't you? No?

I would like to invite anyone who has an interest in the rich history of Georgia radio to visit our website at www.grhof.com. You may also become a voting member for inductees into the Georgia Radio Hall Of Fame, a Georgia non profit organization dedicated to honoring the men and women of Georgia radio. The inaugural induction dinner will be held Saturday September 22, 2007 at the Marietta Conference Center & Resort. There are a lot of vintage photos form Georgia stations on the website also.

As I'm certain you haven't been to the ranch, you've obviously been mislead:

WKRP  was based on WQXI-AM.  Dr Johnny Fever was Skinny Bobby Harper and
Venus Flytrap was Night Train Lane.

In 1979, a station is Dallas, Ga got the callsign WKRP.  (The wanted WDLS
but WKLS objected), so Mitch Lepord got that call.

I worked there in 1981-1982. Still have some airchecks.

First record play on WKRP in Dallas, GA was Lonsome Loser, and it was
started off at the wrong speed! LOL 33 1/3 instead of 45.

http://english.pravda.ru/opinion/columnists/89728-0

"In a clear sign of its intent to reign in dissident American media personalities, and their growing influence in American culture, US War Leaders this past week launched an unprecedented attack upon one of their most politically 'connected', and legendary, radio hosts named Don Imus after his threats to release information relating to the September 11, 2001 attacks upon that country.

According to European reports of the events surrounding Don Imus that have gripped the United States this past week, it was during an interview with another American media personality, Tim Russert, who is the host of a television programme frequently used by US War Leaders, wherein while decrying the state of care being given to American War wounded stated, "So those bastards want to keep these boys [in reference to US Soldiers] secret? Let's see how they like it if I start talking about their [in reference to US War Leaders] secrets, starting with 9/11."

Unable to attack such a powerful media figure as Don Imus, directly, the US War Leaders, and as we have seen many times before, resorted to a massive media attack against him using as the reason a racial slur against a US woman's basketball team, but which has been pointed out by other media outlets was not by any means a rare occurrence for the legendary radio icon to make.

But, to the US War Leaders, Don Imus represented the most serious threat, to date, of the growing assault against them by America's media personalities threatening to expose the truths behind the events of September 11, 2001 and the Iraq/Afghanistan Wars; and to such an extent that another American media personality, Rosie O'Donnell, has expressed concern that US Military Leaders could actually imprison Mr. Imus.

>From our past research of the tactics used against those threatening America's War Leaders, the likelihood of imprisonment for Don Imus would only occur should he persist in his threats to undermine their authority, and which appears, at this time, unlikely after the public disgrace he has had to endure.

It is expected, also, that the US War Leaders actions against Don Imus will have a further chilling affect upon other American media personalities questioning their authority, such as the popular US movie actor, Charlie Sheen, and who was one of the first to question the events of September 11, 2001, and as we can read as reported by New Zealand Herald News Service in their article titled "Charlie Sheen may voice 9/11 documentary", and which says:

"US actor Charlie Sheen is reportedly in talks to narrate an internet documentary that suggests elements of the US government were behind the September 11 attacks on the World Trade Centre.

Sheen's representatives say he was involved in the production of a new version of Loose Change, a 90-minute conspiracy theory film that has been seen by more than 10 million internet viewers."

Apparently lost upon America's media personalities is that a government being investigated by the International Red Cross for the torture of an Iranian Diplomat by whipping with steel cables on his feet; a government that would have its soldiers imprison in an Ethiopian torture jail a Swedish teenage girl; a government that would even contemplate the release of one of the World's most wanted terrorists, Posada Carriles; does not hesitate, for even a second, to crush any, and all, opposition to it.

To the American people themselves their remains no evidence that they know, much less care, about the dire state of their once Free Nation."

Jamaica? Bahamas?  Lots of background noise and marginal phones.  I hate their voice recognition system when you first call.  It doesn't work, and it's annoying.  I've tried to drop one of my radios twice, and they keep giving 3 more free months.  Nice of them.

There's a local radio station operated at Masconomet High school in Boxford (WBMT- 88.3 FM). Back in the early 1980's, at the end of each broadcast day, Glen Walker (the station manager) came on and talked for about 3 or 4 minutes with some instrumental music playing in the background. The thing I remember about this background music was that it began with a baroque styled organ flourish similar to the intro on "In-a Gadda-Da-Vida". It was probably library music, as it was being used on other stations for similar purposes during this period (1981-83). I haven't heard it in almost 25 years. Does anybody remember this tune?
Bryan

Say goodbye to night DXing on the AM-BC band. Many of the 50kW clears are transmitting IBOC during
day hours now. The digital 'splatter' covers 20KHz on either side of the main frequency. This will
happen at night soon. Forget about listening to 830 AM and 850 AM at night, both 50 KW clears. WCCO
is using IBOC, not sure of KOA. This and power companies tagging data on their lines doesn't look
good for a once, fun, and inexpensive hobby.

Check Out www.SnapFM.com it's this great new site.

It's Free, easy to use, and allows you to Listen Live to AM & FM radio stations from all over the Country.

You can listen to stations in New York, LA, Chicago, Boston, Dallas, Miami, and so much more.

You can even choose the type of music from Hip Hop to R&B, Latin to Rock, Country to Dance, Classical To Jazz, and if you're not looking for music you can listen to SPORTS and TALK radio too.

Well Mike .... do what you must .... if you think tightening the tin foil will help, go to it!

Truth be told, Pravda may have been a Soviet mouthpiece at one time, but I would put their material on equal footing with material from Fox, CNN and the other current US sources.  There are several ways you can look at that statement.

Speaking of foreign news agencies, I would put Al Jazeera (http://english.aljazeera.net/English) ahead of *any* US newsource for accuracy.

Just wanted to let everyone know about my little part of the World Wide Web, dedicated to radio station vinyl compilations.  If you can help me fill in the blanks with a few of these, any help would be great (several have album covers, but I have no information on the song titles).

Hope you like...

BROADCASTS IN ENGLISH - A07 Edition

The Summer 2007 edition of Broadcasts in English is now available from the British DX Club. It was compiled by Dave Kenny and includes details of all known international broadcasts in English on shortwave and mediumwave for the A07 schedule period, as well as selected domestic English-language broadcasts on short wave. As usual, the 32-page booklet is in time order and covers all target areas. Transmitter sites are included wherever possible,
plus schedules of DX programmes, Digital Radio Mondiale (DRM)
and World Radio Network services in English to Europe.

Copies are available at the following prices (includes postage):
United Kingdom - 2.50 pounds sterling
Europe - 5 Euros or 6 IRCs
Rest of World - 7 US dollars or 7 IRCs

Sterling payments by cheque/postal order to "British DX Club" or via Paypal.
Dollar or Euro payments by cash or Paypal.

Orders to: British DX Club, 10 Hemdean Hill, Caversham, Reading RG4 7SB, UK
Email: bdxc@bdxc.org.uk
Web: http://www.bdxc.org.uk

When I was a kid living in Belle Glade FL I did everything I could to bring in SHE on my stereo... I even ran lines out to the TV aerial so I could pick it up.  I loved that station.  There was nothing closer that was like it.

Years later, 1996, I was hired as one of the first jocks when they had changed the format to what later become known as Hot AC.  Back then it was described to me as a kind of "alternative rock for women."  It was actually pretty cool.  Of course, they dropped the SHE moniker and call letters and changed it to WPLL "Planet Radio."  I was there until 1999.  During that time Clear Channel bought it from Paxson and turned it into a VERY mainstream AC (Billy Joel, Elton John, Rod Stewart every hour).  I left when they finally blew it up and turned it into rhythmic oldies.  While I was there I did afternoons and was the APD, working with first Dave Stewart and then Y-100's Rob Roberts.

Three different studios during that time -- Davie, then North Miami, and finally to Ft Lauderdale.

Archer
WSTF (WVRI) Orlando 1988-1993
WJRR Orlando 1993-1996
WPLL Miami 1996-1999
KBIG Los Angeles 1999-2006
Dial Global Los Angeles 2006-present

I knew the FCC had approved HD Radio for night time use on AM, but I didn't
catch when it would start.
Anyone know?

They haven't finished the prerequisite paperwork yet. Usually this kind of thing takes effect 30 days after publication in the Federal Register - and that hasn't yet happened.

(they seem to be being REALLY SLOW about this!)

Hello,

This is going to the mailing list and the newsgroup.

Airwaves Digest *is* alive. Those people who want to post to the group/mailing list can do so by posting to rec.radio.broadcasting or by sending submissions to

airwaves@lists.JustThe.net

More details to come (hopefully this evening).

Thanks,
  Steve the Moderator

So, some of you (many of you?) may be wondering what happened to the mailing list and newsgroup.

A lot has happened over the past few weeks; things that made it impossible for me to do anything at all with RRB/Airwaves.

So, here's what has been done:

** The mailing list is on my server now, running under Mailman. Mailman has a mail-to-news gateway feature so I can use it to moderate the mailing list and post approved stuff to the newsgroup at the same time.

** I had been using John Levine's NNTP server at IECC.COM (thanks, John), and he had been hosting the mailing list. I'm doing it all centrally now, with Usenet postings being pushed through news.justthe.net aka news.glorb.com.

** I now can take advantage of Mailman's whitelisting features. Those of you who are regular posters will be added to the whitelist as I see posts come in from you. I'll go ahead and add them if I recognize the email addresses; that way, posts from you will automagically be pushed through to the mailing list and newsgroup. I can auto-approve you even if you are not subscribed to the mailing list. If you would like me to put you on the auto-approve list, you are also welcome to email me at sjsobol@JustThe.net.

** Mailing list management is available at

http://lists.JustThe.net/

for those people that prefer to manage their subscription over the web. Via email - send mail to

airwaves-join@lists.JustThe.net

airwaves-leave@lists.JustThe.net

to subscribe or unsubscribe, respectively. Posting through the newsgroup is also an option, and you don't have to subscribe to the mailing list to successfully post to the newsgroup.

If subscribed to the email list, you can set several personal options via the website, including the option to receive individual messages or digests.

Regarding Airwaves.com: I have to get in touch with Val Davis. It appears that the domain registration might have expired. Looks like Air Waves Heating and Cooling grabbed it. So, for now, the website is offline. I'll see what I can do to rectify that.

I have saved some mailing list posts that I was not able to post over the past few weeks, and they will be pushed through as soon as I can push them.

Thanks,
  Steve

Welcome to the Airwaves@lists.justthe.net mailing list!

To post to this list, send your email to:

  airwaves@lists.justthe.net

General information about the mailing list is at:

  http://lists.justthe.net/mailman/listinfo/airwaves

If you ever want to unsubscribe or change your options (eg, switch to
or from digest mode, change your password, etc.), visit your
subscription page at:

  http://lists.justthe.net/mailman/options/airwaves/vgeller%40aol.com
```

You can also make such adjustments via email by sending a message to:

  Airwaves-request@lists.justthe.net

with the word `help' in the subject or body (don't include the quotes), and you will get back a message with instructions.

You must know your password to change your options (including changing the password, itself) or to unsubscribe.  It is:

  pumeunef

Normally, Mailman will remind you of your lists.justthe.net mailing list passwords once every month, although you can disable this if you prefer.  This reminder will also include instructions on how to unsubscribe or change your account options.  There is also a button on your options page that will email your current password to you.

A new groups in town, committed to the understanding of Podcasting Technology.

This group is for podcasters that want to be more effective using podcasting technology, keep up with the current podcasting technology and have a place to solve problems with podcasting technology.  It is a moderated group with more than one moderator and new members are required to make a simple introduction to the group.  I have created Yahoo groups with over 1000 members and NO SPAM.

The link to the group is:

(never mind that my handle on the Michigan Radio and TV Buzzboard has been "971The DriveFan", though I devised it several years ago, and while the romance has gone, I still enjoy The Drive, and especially Bob Stroud's on-air moments--truly a classic on-air personality)

Well, apparently The Drive is doing an A-Z starting this weekend.

It's hardly a unique "stunt", but it's the first time I can recall WDRV doing it since it went to its hybrid classic rock/classic hits/oldies format (it's been kind of eliminating the 60's oldies from its mix the last couple of years, alas).

Even still, it's a well conceived concept, even if the ad money goes
to the Mormons (via Bonneville Broadcasting).

Hi Group!

I realize this is an old question, but I have not had access to the group for a while.

The question is assumed the vehicles are operated in and aroud the same locale.

The short answer: the antenna. Change the antenna on the car and the reception should improve.

The long answer: quality of the radio, antenna, and noise generated from ignition system, other electronics inside the car,

Just because you payed for a better car does not mean that they cared about AM reception any more than the less costly model.

Jeff in Sa-ra-so-ta

Job Description
Media Systems Director
WILL Public Media
Division of Broadcasting, University of Illinois at Urbana-Champaign

The University of Illinois at Urbana-Champaign seeks a full-time professional to manage digital media systems integration for WILL AM-FM-TV-Online, the University's public broadcasting stations affiliated with the Public Broadcasting Service and National Public Radio.  WILL-AM, on air since 1922, is a 5,000-watt station and that serves eastern Illinois and western Indiana with a news and informational format.  WILL-FM, established in 1941, is a 105,000-watt station that serves east central Illinois and west central Indiana with classical and other music programming.  WILL-TV, established in 1955, is the primary PBS affiliate for views in central Illinois.  WILL-Online extends the reach of all WILL broadcast services with extensive online archives and program information.

Brief Description:
This is a full-time Academic Professional position under the general supervision of the Director of Internet Development.  The Media Systems Director plays a key role in developing a model file-based digital media workflow at WILL, and managing content and metadata across all platforms.  She or he is responsible

for developing and maintaining the digital media production, publishing, and archiving environment for WILL AM-FM-TV-Online, and for directing its use to serve the mission of the WILL and the Division of Broadcasting.

Responsibilities:
* Coordinates with Production Staff, Engineering, Computer Services, Traffic Operations, and Internet Development to develop and integrate systems for media file and metadata production and interoperability.
* Works with vendors in developing and supporting digital media production, network, metadata, and storage systems.
* Serves as the primary support person for digital video production workstations, servers, and storage.
* Coordinates the digital media production environment with systems in Engineering, Computer Services, Operations, Traffic, and Web Development.
* Responsible for understanding and maintaining adherence to industry standards in media file formats and encoding.
* Maintains streaming media servers and encoders, ensuring high quality of service.
* Supports the creation, capture, and accessibility of descriptive, administrative, and technical metadata throughout production, publishing, and archiving processes.
*
* Documents the installation and operational details of the systems under Media Systems.
* Trains staff and students on digital media production on metadata systems as needed.
* Other related duties as assigned.

Qualifications:

The ideal candidate for this position will have:
* A bachelor's degree (required); a master's degree (preferred).
* A minimum of five years experience in a digital media production environment.

* Demonstrated high level of expertise in production of broadcast and online media.
* Ability to install and maintain Mac and Windows-based digital media workstations.
* A track-record of professional success integrating digital media systems in a networked environment.
* Ability to operate streaming media servers and network storage systems.
* Experience working with vendors in support of media production equipment, servers, and storage systems.
* Excellent communication skills and demonstrated ability to work cooperatively as part of a team.
* An ability and desire to learn new technologies and skills

Knowledge of:
* Digital media file formats and standards.
* A/V production tools and software, including AVID and Final Cut Pro.
* Metadata formats and standards.
* Item- and collection-level cataloging practices.
* XML/XSD, SQL, and data transformation.

* Public broadcasting and its mission.

The proposed starting date is December 1, 2007. To ensure full consideration, a letter of application, resume, and the names, addresses, and phone numbers of three professional references must be received by October 5, 2007. Interviews may take place before the closing date; however, no decision will be made until after October 5, 2007. Salary is commensurate with qualifications and experience, not less than $45,000.

To apply, please send applications to:

Jack Brighton
Assistant Director of Broadcasting
WILL Public Media
300 N. Goodwin
Urbana, IL 61801
217-333-0850
jackb@uiuc.edu

The University of Illinois is an Affirmative Action, Equal Opportunity Employer.

destroy worlds with a blow of the hand, and raise armies out of the ground with a stamp of the foot; in which nations perish, and new ones are born within the space of a minute.

These hundred days stand in history as a giant era, and these hundred days of the restored empire were replete with all the earth can offer of fortune, of magnificence, of glory, and of victory, as well as of all that the earth contains that is disgraceful, miserable, traitorous, and perfidious.

Wondrous and brilliant was their commencement. All France seemed to hail the emperor's return with exultation. Every one hastened to assure him of his unchangeable fidelity, and to persuade him that they had only obeyed the Bourbons under compulsion.

The old splendor of the empire once more prevailed in the Tuileries, where the emperor now held his glittering court again. There was, however, this difference: Queen Hortense now did the honors of the court, in the place of the Empress Marie Louise, who had not returned with her husband; and the emperor could not now show the people his own son, but could only point to his two nephews, the sons of Hortense.

The emperor had quickly reconciled himself to the queen; he had been compelled to yield to her gentle and yet decided explanations; he had comprehended that Hortense had sacrificed herself for her children, in continuing to remain in France notwithstanding her reluctance. After this reconciliation had taken place, Napoleon extended his hand to Hortense, with his irresistible smile, and begged her to name a wish, in order that he might fulfil it.

Queen Hortense, who had been so bitterly slandered and scorned by the royalists, and who was still considered by the fleeing Bourbons to be the cause of their overthrow--this same queen now entreated the emperor to permit the Duchess d'Orleans, who had not been able to leave Paris on account of a broken limb, to remain, and to acco

I've recently picked up a Sangean HDT-1 for a song ($70 bucks shipped), and have hooked it up to my stereo. I have noticed several stations here in the Twin Cities that do not utilize the display features of HD Radio, and was wondering if it was due to a) incompetent engineers, b) incompetent listener (me!), or c) incompetent corporations (Ibiquity or Clear Channel?). Here's a list of most of the stations I received during the day on Jan. 26, 2010;

| | | |
|---|---|---|
| 88.5 | KBEM | RDS only |
| 89.3 | KCMP | HDx2 |
| 90.3 | KFAI | HDx1 (not 24/7) |
| 91.1 | KNOW | HDx3 |
| 92.5 | KQRS | HDx2 ### |
| 93.7 | KXXR | HDx2 ### |
| 94.5 | KSTP | RDS only |
| 97.1 | KCTZ | HDx2 *** |
| 98.5 | KTIS | HDx3 |
| 99.5 | KSJN | HDx2 |
| 100.3 | KTLK | HDx3 *** |
| 101.3 | KDWB | HDx2 *** |
| 102.1 | KEEY | HDx2 *** |
| 102.9 | WLTE | HDx2 |
| 104.1 | KZJK | HDx2 |
| 105.7 | WGVZ | nothing detected |
| 106.7 | K294AM | (KFAI translator) |
| 107.1 | WFMP | RDS only |

107.9   KQQL   HDx2 ***

Observations - using an RCA VHF/UHF amplified antenna works extremely well here near Little Canada, with the caveat that the amplification level needs to be at the absolute minimum, or else the front end gets swamped.
I've also noticed that there are varying degrees of info passed on via the display; for example, the stations marked with (###) only show the station name and HD channel (KQRS-1), with absolutely no song/artist data to speak of (yet it is showing up via RDS on my Grundig Ocean Boy 510); and the stations marked with (***), upon HD lock, only show the following repeating text; "hd radio...www.HD-Radio.com"; what's interesting about that is my Sony XDR-S3HD *does* show artist/track info on those (***) channels... incidentally, most, if not all, of the latter group are Clear Channel stations, so maybe they have decided to save some money by eliminating engineers? Then again, for as much as they have tried pushing this on the public, no one really seems to care, so their engineers must not care too much either.

My questions would be this - is it possible that the Clear Stations are just not implementing their display data correctly, or have there been changes to the data stream that my rig isn't capable of decoding? I've read several accounts of radio staff using this model as their off-air monitor equipment, since they are built so well. I am quite impressed with it so far. If anyone is interested, the firmware on this rig is Ver. 1.3f 061227.

Does anyone know why the display error is happening? Thanks for any info you might have.

If you have an automation system playing your music, it's no problem to put the song titles on RDS and in the HD radio stream.

If you have an automation system switching feeds from remote sources, you can't really do that because the automation system doesn't know anything about what is playing other than what the source is.  At best you can display the show title.

If you have an actual human being playing records, you're totally out of luck with the display.  But hopefully with an actual human being he's going to announce what he's playing (and at worst you can call up the studio and ask him what he just played... and he might even play a request).

Odds are the Clear Channel folks are just repeating programming that comes to them over the bird, and the local automation system doesn't know anything other than it's coming off of source input such-and-so.

My main question is *why* it works properly on the Sony, and not the Sangean... There is some discrepancy between what fields get passed to the display on the HDT-1, and on the Sony, and I'm wondering what it is, and, more importantly, how to get it corrected - whether via firmware, or outright replacement. I think I'll call Sangean.

(Crossposted to several relevant newsgroups, with followups directed to rec.radio.broadcasting. Please check headers carefully before following up or replying.)

As of January, 2010, the moderation team for ba.broadcast.moderated (Bay Area, California, USA) has taken over moderation duties for rec.radio.broadcasting. The moderators on our team are three experienced industry professionals and past participants on rec.radio.broadcasting: Mark Roberts, Patty Winter, and John Higdon. We are hosted at Public Access Internet and Unix, NYC (Panix) and using Secure, Team-Based Usenet Moderation Program (STUMP). Articles posted from a newsreader should now be automatically sent to the new team.

We appreciate the efforts of the late Bill Pfeiffer in creating this newsgroup in 1992 and moderating it until his untimely death in 1999, his friends and Internet colleagues that served as an interim moderation team to keep the newsgroup going, and Steve Sobol who took over as permanent replacement moderator from 2000 to 2010. Steve graciously consented to have the new team take over immediately.

The newsgroup's original charter from 1992 may be found at

  http://www.panix.com/~babm/usenet/rrb/

The August 1997 version of the newsgroup's posting guidelines may be found at:

  http://groups.google.com/group/rec.radio.broadcasting/browse_thread/thread/955c485039a3d87

An updated, and periodically posted, submission guidelines article is pending, but in the meantime, the following general guidelines apply:

- We will generally abide by both the letter and intent of Bill Pfeiffer's original charter, posting guidelines, and overall moderation policies.

- Per the rec.radio.broadcasting guidelines, the posting of copyrighted material without the permission of the copyright holder will not be allowed. Instead, please write a brief synopsis of the article with a link to the full piece.

- Bill Pfeiffer prohibited or restricted the use of pseudonyms or unroutable (i.e., "munged") E-mail addresses.  As a pragmatic concession to the realities of the present-day Internet, and consistent with the practices of other moderated newsgroups, pseudonyms and unroutable E-mail address are permitted with some restrictions.  We ask that From: lines of submitted articles not misrepresent the submitter's identity, be changed excessively, or match a user or domain other than that of the submitter.  Please also realize that if a submitter uses an unroutable E-mail address, then they will not be able to receive acknowledgment or rejection messages for their submitted articles.

- In Bill Pfeiffer's configuration, an "X-No-Archive: yes" header was automatically added to all posts so that they would not be archived on DejaNews (later Google Groups).  In our current configuration, it is not.  Thus, if the submitter does not wish their posts to rec.radio.broadcasting to be archived, they will have to add that header themselves, as with any other newsgroup.

- A limited amount of appropriate simultaneous crossposting (such as to rec.radio.noncomm, ba.broadcast, ba.broadcast.moderated, and alt.radio.broadcasting) will be permitted at the discretion of the moderation team.  Currently, a limit of 3 newsgroups total is enforced by our moderation software (this article is an exception).

We hope to be able to turn around articles the same day, and probably much faster in actual practice.

We would also be interested in inputs on any FAQ/history/charter documents, or possibly volunteers to restart and coordinate Bill Pfeiffer's old Radio Watchers program.

We would like everyone to consider submitting articles, making suggestions, offering any contributions of time, referring us to other possible interested individuals, or even referring this new development (a change of moderators) to other broadcasting-related mailing lists or web forums in which they participate.

Questions, suggestions, concerns, or criticisms may be directed to rec-radio-broadcasting-moderated-request@panix.com, which is the default reply address for this article.

Does anyone have any links to recordings of Mutual Broadcasting
System's (MBS) coverage of the D-Day landings in World War Two?  I've

located collections of NBC and CBS and would think someone would have preserved Mutual's coverage.

Then again, because of the nature of MBS at that time, there may not have been any effort to put up coverage or do anything beyond their regular newscasts.

Certainly would be interested in hearing about that, if anyone knows anything.

Hmmm, if it's been a problem on radio, it's been rare. Most of the
problems I've heard on TV have been from inserts--e.g. DirecTV inserting
a spot into a local slot on BBC America or Comcast on CNN. Since radio
stations mostly have local programming, they aren't mixing different
feeds. (Okay, I don't listen to many syndicated shows, so maybe it's
a problem with those. Although I do listen to some on weekends and
haven't heard problems.)

Phil, have you heard really obvious audio-level changes with radio
spots?

Patty

Welcome, Warren, and yes, thanks to Mark for reminding everyone that with this group up and running again, we have an excellent place to discuss topics that drift away from being about the Bay Area and instead address national issues, such as TV/radio spectrum allocation.

Also, as Mark noted, this group is available via Google Groups, which thus far has ignored requests to carry ba.broadcast.moderated. :-(

Patty

H/T to Thomas Groom for the following link to the Stockton Record,
which reports that longtime Stockton station KSTN will leave the
air tonight after more than 60 years on the air:

http://www.recordnet.com/apps/pbcs.dll/article?AID=/20100219/A_NEWS/100219834

The report also says that KSTN-FM, currently a regional Mexican station, will
switch Monday to a contemporary Christian format.

The stations are still locally owned. KSTN(AM) was one of the last
AM stations doing a CHR format, later moving to what it called a
"power oldies" format with an unusually eclectic playlist for an
oldies station.

It wasn't possible for me to determine from my Bay Area location
tonight whether the station was on the air; the 1420 kHz signal
did not make it far into the Bay Area, whether day or night.
Still, it was a distinctive and local voice, far too rare in an era
of corporate repeater radio.

Looks like they stayed til the bitter end.  How many Top 40 or CHR or whatever stations are still on AM?  Hardly a handful.  I was surprised over the years that they never switched the formats between the stations, but I guess the FM format was just too lucrative (at least in the past, anyway).

According to one of the Record articles, the AM may come back on the air. I suspect it will, since evern the most marginal AM stations are still finding ways to stay in business. Think KVTO, KWG, etc.

```

|that they never switched the formats between the stations, but I guess the FM
|format was just too lucrative (at least in the past, anyway).

That's what I always understood. I suspect there are no Top 40/CHR
stations left on AM in the United States. That would be hardly
surprising; anyone under 50 no doubt views AM as a talk-radio
medium.

| According to one of the Record articles, the AM may come back on the air. I
| suspect it will, since evern the most marginal AM stations are still finding
| ways to stay in business. Think KVTO, KWG, etc.

KVTO does it the time-honored way, by time brokerage. KWG
is an all-Catholic station, Immaculate Heart Radio -- the
same as 1260 in San Francisco.

I am amazed at how few AMs have gone off the air. In an ever
noisier and more crowded band,the smaller, weaker stations have a
harder time being heard. The new generation of ultrasensitive DSP
radios has come along too late to help.

Back in the late 60s and early 70s KSTN-FM would do Spanish and
Portuguese about half the time and then simulcast evening and
overnight from the AM. It remained that way for a long, long time
until the FM went full time Spanish.

Xref: g2news1.google.com rec.radio.broadcasting:17

This weekend, I've noticed additional deterioration of the audio quality on KFRC-FM, both for the main channel, repeating all-news KCBS(AM), and for the HD-2 channel, carrying the remnants of KFRC's former classic hits format. An HD-3 channel for KFRC now pops up.

The odd thing is that this deterioriation was noticeable even though there was no audio on the HD-3 channel. (I could live with the sound at HD-2 compression levels, but not at HD-3.)

Is the HD compression scheme one that allocates a fixed number of bits to each channel, regardless of the need for those bits at any moment in time?

One also questions the wisdom of further compromising audio quality on a station that's all-news. The HD compression scheme really chews up voices but can be somewhat more tolerable on music. (I readily admit this statement is a matter of perception.)

It also appears that, at least in the San Francisco Bay Area, CBS is being most aggressive with its HD programming. If there will be an HD-3 channel for KFRC-FM, it will be the second station in the Bay Area with one. The other is KCBS's KITS, running alternative on the main channel, "classic alternative" on HD-2, and the last.fm "discovery" channel in mono on HD-3. None of the other stations with HD are running a third channel. From a visit to New York City last year, I recall that use of HD-3 is more widespread there.

(NB: crossposted to ba.broadcast.moderated and rec.radio.broadcasting. Please consider directing followups as appropriate, depending upon whether it would be of primarily regional interest, or of broader interest.)

This is why AM talkers are dropping "HD", at least the ones who take any pride in their sound. KGO dropped it for two reasons: it made them sound much worse, and it interfered with other stations on the west coast at night. The proprietary iBiquity codec is not friendly to voice at low bit rates at all.

There isn't much to be lost there. Both of those stations (particularly KITS) sound pretty bad in general. CBS seems to have developed an extremely aggressive stance when it comes to IBOC. While others have abandoned digital on AM, CBS still hangs in there.

I can see that. During my visits there I note that radio in general sounds like trash, so the effects of tinier and tinier bit streams are probably taken in stride by the listeners.

The AM signal barely made it across town in the night hours!! Despite that, it was nice to have one station in town that wasn't operated out of San Antonio.

My experience was that both daytime and nighttime signals were good on the eastern side of the Oakland/Berkeley hills.  Daytime KSTN got into the Hayward/Fremont area and as far west as San Mateo or so.

Now, this was in the days when KSTN was the station to listen to, when they broke new songs before KFRC did.

The power of programming cannot be overstated. It affects everything at
a station and can even improve its coverage area.

```

Last week, Aaron Barnhart of the Kansas City Star reported that Richard Ward Fatherley, one of the pioneers of Top 40 radio, was seriously ill from injuries sustained in a fall.

Fatherley as a program director at WHB, one of the stations at which Todd Storz installed the first Top 40 formats.

Barnhart's post is at:
<http://blogs.kansascity.com/tvbarn/2010/02/fatherley.html>

There is an error in in the article. At the time, WHB was a 10,000-watt station at 710. Barnhart has probably confused it with WHB's present home with 50,000 watts at 810. WHB and KCMO, which is now at 710, swapped frequencies in 1997.

But there is much there that is illuminating. I did not know, for example, that Fatherley also was a key player in launching the album-rock format on KYYS (now KSRC) on the former WDAF-FM in 1974. "KY 102" continued to be a success into the new millenium, but has since been replaced.

In the early 1990s, Fatherley also was the "voice" of easy-listening station KFEZ, which had been rebuilt after a flood damaged its transmitter site in 1990.

Fatherley's own site commemorating WHB, www.worldshappiestbroadcasters.com, is still up and running at this time.

Anyone out there still remember the M-30B?  I am dusting off one at a
local station and have a few questions.

There is an "operate/tune" switch which appears to change the screen grid
bias to reduce the output level when tuning, but the directions for alignment
don't mention it.

It appears I can do all of the tuning up until the output stage section
with the switch set to TUNE.  I can tune the output section (plate and
antenna coupling) and get the power set around 95 on the meter, like
the manual says, with the switch set to tune.

I assume, though, that I want to set the antenna coupling control for
final power setting using the switch on OPERATE.

So questions include: how do I use the switch for tuning, AND once I have
done that, is there any reason not to just leave the switch on TUNE in
order to reduce power and extend the life of the final if I don't mind
the reduced range?

Not only that, if I set the antenna coupling for reduced power, is that
going to extend the life of the finals?

Gee, and I get called an old fogey...I haven't seen tube-type gear in ages! But seriously, to answer your question: there might be a problem doing that. The purpose of the "tuning" mode is to limit stage operating parameters to "safe" levels until proper tuning is either achieved, or is good enough to allow safe operation of the tube.

You have to ask yourself if the unit, properly tuned, might be better in terms of efficiency and component longevity in "normal" mode than in the parameter-limiting "tune" mode. It's a distinct possibility.

> Not only that, if I set the antenna coupling for reduced power, is that
> going to extend the life of the finals?

It could, assuming you don't kill the efficiency of the output stage. One of the arts tuning up any transmitting device is finding the sweet spot in terms of plate current, grid drive, and stage coupling. The Harris MW-5 transmitters were notorious for having a narrow range of final plate current and drive. Operate outside that range, and your tube life drops precipitously, even though from a raw tube-spec point of

```
view, everything was well within limits.

>and all other current consumer electronic units.

My serious suspicion is the crappy output stage on that mixer won't be
able to drive a 600 ohm load without clipping, but try it and see.

Put a 600 ohm shunt resistor across the meter, then drive the meter and the shunt resistor from pins 2 and 3 of any XLR output on the console.

The meter needs to see a 600 ohm load bridged across it for the dynamics
to be accurate.

You just weren't patient enough. :) The newsgroup is moderated, and I try to push through submissions at least once a day. But I don't always succeed. I don't consider it a big deal, since I may go several days between submissions.

AFTER OVER 15 YEARS...........

TUNED IN RADIO, THE NEW RHYTHM OF THE NATION IS FOR SALE!

THE WEBSITE (www.tunedinradio.com).......ALL THE SHOWS (678).......ALL THE INTERVIEWS (over 400).......ALL THE CONTACTS...

FOR COMPLETE INFORMATION EMAIL ME OR CALL
1-905-883-5773 (Canada)

Tuned In Radio, The New Rhythm Of The Nation is a one hour syndicated dance radio show that was on the air from Nov. 1991 - Nov. 2004. It started off as a Top 5 CHR show that was aimed at the 9 - 15 year old demographic and evolved into a Top 10 Dance Show that was aimed at the 16 - 24 age demographic. There are hundreds of interviews from independent and major artists including James Brown, Alphaville, George Clinton, Inner Circle, Big Mountain, and the late Barry White to name a few.
The first 420 shows are on cassette and the rest are on CD. For the last couple of years of the show we were charging $50.00 per show. I am still publishing the Top 10 Dance Chart each week that is emailed to over 200 people, faxed to about 50 people in the industry, posted on over 90 newsgroups and on the website.
If you would like any more information please email me at
tunedinradio@yahoo.com
or call 1-905-883-5773 (Canada).

Sincerely,
Dave Aptheker

I have heard more than once a radio broadcast in which David Sedaris tells a story bout caring for his mother during her illness. I do not believe this is the well known story in which he recounts his family's reaction to his mother's breast cancer. Rather, it is a story about how he tenderly cares for her, even bathing her.  The story has much meaning for me and gives me strength as I relate to my 94 year old mother in a nursing home. But I cannot find the story in the online archives or any where else. E-mail responses to Len@Lgrossman.com will be appreciated.

Thank you,

Leonard

Dear All,

I had subscribed to this news group a few months ago. But its the first mail I am writing in.

I understand this is a group of radio pirates while I am a legal license holder for 100 watt FM radio transmission in Nepal. I have just got the license from the government and is desperate to start up with a shamefully low budget of US$ 1500.00 for RF equipment. Audio and computing equipments are available.

I have selected a package of Veronica (http://www.aareff.com/200werpfmtransmittersystem.htm) and looking at an alternative from PCS Electronics (http://www.pcs-electronics.com/150w-transmitter-package-p-296.html) as it has RDS capability. But the second one is too high in my budget.

So I am trying to make the cost to fit into my budget by compromising on their comet 5/8 (SWR: 1.5:1 max, Gain: 3.4dBi) antenna over dominator 3/4(VSWR: 1:1, Gain: 6 dB) to reduce the package cost. And the main thing that is boggling my mind is the durability and performance of their 150W AMP with power supply( 336 EURO) over 150W Digital AMP in 19 inch rack(800 EURO) to further reduce the cost.

I believe most of the members in this group are expert in this RF field. So can anyone comment on this issue. Weather I should think of this cheap alternative for 24hrs broadcasting without any hassle. Or you should have any suggestion for some other company offering similar package that fits in my budget????

I have noticed some of the members posting irresponsibly but hope that my message will be taken seriously.

Hi All
Listening to Internet radio stations is now becoming a lot easier with broadband and choice of music styles, but i have Cool Edit Pro 2 and would like to know if it is possible to record internet radio into...If so what settings do i need...
Thanks in advance...

As long as there's anyone around who remembers Bill, no one will
forget. He was a truly unforgettable person. And for those of us
who were "Radio Watchers" in the peak years of Airwaves, we'll

always remember his energy and his words of encouragement.

Hi folks:

This is my first post here. Do you happen to know what sorts of recording devices can accompany high-definition radio to record radio programs? I prefer a built-in recording function rather than an external device. I have an no-longer funtional boom box with dual cassette recorders. This was great for recording off the radio. Do you know if it is possible to get a high-def. radio for in-home use which also has a cd function that could record off the radio? If so, I would ideally like to be able to record over the cd like I do for audio cassettes, but that may not be possible. Or are there other ways to record off high-def. radio besides a cd?

If you don't know some or all of these answers, do you know any website or online forums where I could ask these questions?

Thanks in advance!

Craig

Hi guys ...
And first of all, happy new year 2007 from France :-)
I'm at the moment looking for US radio live recordings by the group The Police ...
Can anyone help me finding tapes (original broadcast or rebroadcast) about The Police and their venue in :

- Coffee House, University of California, Davis, CA 05th of March, 1979 (Broadcasted on ?)
- Ophry House, Houston, TX 08th of March, 1979 (Broadcasted on ?)
- The Edge, Toronto, ONT 23rd of March, 1979 (Broadcasted on ?)
- Stage One, Buffalo, NY 25th of March, 1979 (Broadcasted on Buffalo's 97 Rock - WGRF)
- Walnut St. Theatre, Philadelphia, PA 09th of April, 1979 (Broadcasted on W10Q - Q102)
- Fat Cats Club, Miami, FL 04th of May, 1979 (Broadcasted on WSHE-FM)
- The Roxy, San Diego, CA 16th of May, 1979 (Broadcasted on KGB-FM)
- Jay's Longhorn Saloon, Minneapolis, MN 24th of May, 1979 (Broadcasted on ?)
- Rougues, Virginia Beach, VA 09th of October, 1979 (Broadcasted on ?)
- Gusman Auditorium, Miami, FL 26th of October, 1979 (Broadcasted on WSHE-FM)
- Agora Ballroom, Cleveland, OH 21st of January, 1980 (Broadcasted on WMMS-FM)

Information (especially about the radio stations which broadcasted
these shows) is really hard to find and I really think you are
representing my most significant help ...
Thanks a lot in advance ... Talk to you soon ... Take care ... mqflp

So go to the library and look for his books.  Most of the older NPR pieces that he did have been published.  I will say that I don't recall anything from Naked that meets that description, but I do not know about

Barrel Fever or Holidays on Ice.

I've used PolderbitSound Recorder/Editor for that since one of the input options is *What You Hear*. I've had the program for a long time, but I believe it's still available.

Last night on Extension 720 (Tuesday, January 16th) on WGN 720 AM out of Chicago, host Milt Rosenberg had on a couple of guests to discuss "The Future of Media in America:"

http://www.wgnradio.com/weblog/miltsfile/

Both guests talked up some of what they felt was the coming digital utopia, including the potential for greater local content and control. They even briefly touched on digital radio broadcasting, with the guests and Milt discussing the possibility for multiple channels of programming.

During the call-in period, one caller (not me) started to point out the implementation problems of IBOC/HD, including adjacent channel interference to other AM stations.  Milt abruptly (though politely) cut him off, saying that it was a topic to be adjudicated for another day, and implied that he was running out of time, though he had time for at least one more caller before the end of the show.  Milt usually can steer callers with confrontational topics not only politely, but in ways that the guest or guests can answer.  For example, he had a caller on a recent show about gourmet cuisine and cooking who was an animal rights activist and was complaining about pate foie gras (made by force feeding geese to overfatten their livers).  Not only was Milt able to politely steer and scope the conversation, he was able to get the guests to answer the questions offered by the caller.  And doesn't such a show try to screen callers, such that the IBOC/HD questions were not a surprise, anyway?

I wonder if Milt cut the caller off because he felt that the guests could not directly address the IBOC/HD problems, that the caller had violated the customary "no last named/no brand names" rule by mentioning another radio station (WLW 700 in Cincinatti), or even that he was running afoul of corporate editorial policy not to allow on-air criticism of IBOC/HD, especially anything that implies that the "Emperor Has No Clothes."  I posted to Milt's Blog above, asking if, given the dearth of good radio content lately (his show excepted, of course), if multiple channels would just dilute programming and audio quality to an unacceptable degree.  Two or three times as much junk is still junk.

Whatever you want.  Take the line or headphone output of your HD radio. Plug them into a cassette recorder, or a CD recorder, or a digital hard disk recorder or whatver you want to.

I don't know of any all-in-one box.  But there's no reason you can't just take that old Ampex 350 out of the closet and plug it into a brand new

HD radio.

Most stations will QSL -- the report should be detailed - commercials,  etc.
announcements,  and you should provide return postage.

Last but not least,  be patient in your wait for a reply.   QSL replies can
come back by return mail,  or they may take weeks or months,  depending on
the station engineers' priorities.

>From radiodailynews.com:

Bonneville International announced it has signed an agreement with Entercom Communications to trade its three San Francisco FM radio stations in exchange for three Entercom stations in Seattle and four Entercom stations in Cincinnati. With the transaction, Bonneville will add the Seattle and Cincinnati markets to its broadcast footprint, returning to the Seattle market with the acquisition of KIRO-AM, KBSG-FM, and KTTH-AM, and adding Cincinnati stations WKRQ-FM, WSWD-FM, WUBE-FM, and WYGY-FM to its broadcast family. Bonneville will trade, in return, its San Francisco stations KDFC-FM, KMAX-FM, and KOIT-FM to Entercom

A lot of stations, however, use contract engineering staff who may not be
at the station on a regular basis, so it may take a while before your report
gets to them.

Also, MAKE SURE that you address the letter to the CE.  I have been at
stations and found reception reports in the public inspection file that
nobody had ever handed me because the staff didn't know that anything
was supposed to do with them.

Note that the situation at WWL is probably a lot better than at a small
daytimer, but it won't hurt to be proactive about it.

>Last but not least,  be patient in your wait for a reply.   QSL replies can
>come back by return mail,  or they may take weeks or months,  depending on

Sadly it's not a very high priority for most folks, especially if they have
to write an actual letter rather than just dropping a card and a couple
bumper stickers in an envelope.  Lots of smaller stations don't have
preprinted cards.

Anyone have any episodes of Alan Freeman hosting Pick of the Pops Take 2 on Capital Radio?
I have several tapes from 1988 that I will trade for other shows from the late 70s & 80s when Freeman was on Capital.
I will buy the tapes Alan Freeman on Capital if a trade is not acceptable

Thanks.

I live in a small town in the mountains of western Montana.  My town has about 1000 people.  There are a couple of other towns within a 30 mile area, but our nearest big communities with radio transmission are Missoula, 80 miles away, Great Falls at 90 miles away, and Helena about 50 miles away, but on the other side of the continental divide.  On good weather days we might get two good stations and some days we don't get any.

So would anybody like to give me some ideas on what it would cost to put a radio station in that people could hear within a 2-5 mile area of the transmitter?  I'd like to use it to relieve community boredom, as a tool to teach and give kids a way to express themselves, and finally, local issue community awareness talk radio.

Since we are a poor community it would be non-profit regardless of the type of license.  LOL!  And of course, used equipment would be preferable to new. I also know nothing of the F.C.C.'s regulations.

If you have the time I would appreciate some constructive input.

Thanks

Hi there. We have a google radio broadcasting
 newsgroup in Australia and new Zealand

called aus.radio.broadcast.moderated
 at
http://groups.google.com/group/ausytaliaradiobroadcastingmoderated

We are keen to gain new members world wide
who can relate the differences and similarities
between radio stations around the world

We would like to meet you. Pleasse come and say Hi and tell us about
Your station.

!!!!

Keith

I caught a little bit of an interview with a recent author on WNYC and found the topic interesting but I can't remember now what the author's name is nor what the title of the book is nor even whether it was on the Brian Lehrer show or the Leonard Lopate show, the two most likely shows on which I would have heard it.

The little bit that I remember is that the book was written by someone who did some kind of consulting for companies to find out why their employees tended to drop out in various ways, either by quitting or committing some form of professional suicide. The author found, as I recall, that it was usually due to stress caused by the policies of the employers and that the consultant was usually fired when that is what he told the employers. So, he wrote a book about what he had learned through his research while doing consulting work.

If someone heard the interview and can remember the author and title, please let me know. I did a google search for variants on

book interview professional suicide brian lehrer

and didn't turn up anything that rang a bell.

SIRIUS and XM to Combine in $13 Billion Merger of Equals

Provides Consumers with Enhanced Content, Greater Choices and Accelerated Technological Innovation

Enables Satellite Radio to Better Compete in Rapidly Evolving Audio Entertainment Industry

Extraordinary Value Creation for Shareholders

Mel Karmazin to Serve as Chief Executive Officer and Gary Parsons to Serve as Chairman of Combined Company

WASHINGTON and NEW YORK, Feb. 19 /PRNewswire-FirstCall/ -- XM Satellite Radio (NASDAQ: XMSR) and SIRIUS Satellite Radio (NASDAQ: SIRI) today announced that they have entered into a definitive agreement, under which the companies will be combined in a tax-free, all-stock merger of equals with a combined enterprise value of approximately $13 billion, which includes net debt of approximately $1.6 billion.

Under the terms of the agreement, XM shareholders will receive a fixed exchange ratio of 4.6 shares of SIRIUS common stock for each share of XM they own. XM and SIRIUS shareholders will each own approximately 50 percent of the combined company.

Mel Karmazin, currently Chief Executive Officer of SIRIUS, will become Chief Executive Officer of the combined company and Gary Parsons, currently Chairman of XM, will become Chairman of the combined company. The new company's board of directors will consist of 12 directors, including Messrs. Karmazin and Parsons, four independent members designated by each company, as well as one representative from each of General Motors and American Honda. Hugh Panero, the Chief Executive Officer of XM, will continue in his current role until the anticipated close of the merger.

The combined company will benefit from a highly experienced management team from both companies with extensive industry knowledge in radio, media, consumer electronics, OEM engineering and technology. Further management appointments will be announced prior to closing. The companies will continue to operate independently until the transaction is completed and will work together to determine the combined company's corporate name and headquarters location prior to closing.

The combination creates a nationwide audio entertainment provider with combined 2006 revenues of approximately $1.5 billion based on analysts' consensus estimates. Today the companies have approximately 14 million combined subscribers. Together, SIRIUS and XM will create a stronger platform for future innovation within the audio entertainment industry and will provide significant benefits to all constituencies, including:

* Greater Programming and Content Choices -- The combined company is committed to consumer choice, including offering consumers the ability to pick and choose the channels and content they want on a more a la carte basis. The combined company will also provide consumers with a broader selection of content, including a wide range of commercial-free music channels, exclusive and non-exclusive sports coverage, news, talk, and entertainment programming. Together, XM and SIRIUS will be able to improve on products such as real-time traffic and rear-seat video and introduce new ones such as advanced data services including enhanced traffic, weather and infotainment offerings.

- Accelerated Technological Innovation -- The merger will enable the combined company to develop and introduce a wider range of lower cost, easy-to-use, and multi-functional devices through efficiencies in chip set and radio design and procurement. Such innovation is essential to remaining competitive in the consumer electronics-driven world of audio entertainment.

- Benefits to OEM and Retail Partners -- The combined company will offer automakers and retailers the opportunity to provide a broader content offering to their customers. Consumer electronics retailers, including Best Buy, Circuit City, RadioShack, Wal-Mart and others, will benefit from enhanced product offerings that should allow satellite radio to compete more effectively.

- Enhanced Financial Performance -- This transaction will enhance the long-term financial success of satellite radio by allowing the combined company to better manage its costs through sales and marketing and subscriber acquisition efficiencies, satellite fleet synergies, combined R&D and other benefits from economies of scale. Wall Street equity analysts have published estimates of the present value of cost synergies ranging from $3 billion to $7 billion.

- More Competitive Audio Entertainment Provider -- The combination of an enhanced programming lineup with improved technology, distribution and financials will better position satellite radio to compete for consumers' attention and entertainment dollars against a host of products and services in the highly competitive and rapidly evolving audio entertainment marketplace. In addition to existing competition from free "over-the-air" AM and FM radio as well as iPods and mobile phone streaming, satellite radio will face new challenges from the rapid growth of HD Radio, Internet radio and next generation wireless technologies.

"We are excited for the many opportunities that an XM and SIRIUS combination will provide consumers," said Gary Parsons, Chairman of XM Satellite Radio and Hugh Panero, CEO of XM Satellite Radio, in a joint statement. "The combined company will be better positioned to compete effectively with the continually expanding array of entertainment alternatives that consumers have embraced since the Federal Communications Commission (FCC) first granted our satellite radio licenses a decade ago."

"This combination is the next logical step in the evolution of audio entertainment," said Mel Karmazin, CEO of SIRIUS Satellite Radio. "Together, our best-in-class management team and programming content will create unprecedented choice for consumers, while creating long-term value for shareholders of both companies. The combined company will be positioned to capitalize on SIRIUS and XM's complementary distribution and licensing agreements to enhance availability of satellite radios, offer expanded content to subscribers, drive increased advertising revenue and reduce expenses. Each of our companies has a strong commitment to providing listeners the broadest range of music, news, sports and entertainment and the best customer service possible. We look forward to sharing the benefits of the exciting new growth opportunities this combination will provide with all of our stakeholders."

The transaction is subject to approval by both companies' shareholders, the satisfaction of customary closing conditions and regulatory review and approvals, including antitrust agencies and the FCC. Pending regulatory approval, the companies expect the transaction to be completed by the end of 2007.

SIRIUS's financial advisor on the transaction is Morgan Stanley and Simpson Thacher & Bartlett LLP and Wiley Rein LLP are acting as legal counsel. XM's financial advisor on the transaction is J.P. Morgan Securities Inc. and Skadden Arps, Slate, Meagher & Flom LLP; Jones Day; and Latham & Watkins LLP are acting as legal counsel.

Conference Call and Webcast Information

The companies will hold a joint conference call and webcast on Tuesday, February 20, 2007 at 8:30 AM ET to discuss this announcement. The conference call can be monitored by dialing 800-573-4840 within the U.S. and 617-224-4326 for all other locations, passcode 29490052. The webcast can be accessed at http://www.sirius.com/ and http://www.xmradi=
o.com/
as well as on their satellite radio services by tuning to SIRIUS channel 122 and XM channel 200. The webcast will be archived at http://www.sirius.com/ and http://www.xmradio.com/.

About SIRIUS

SIRIUS, "The Best Radio on Radio," delivers more than 130 channels of the best programming in all of radio. SIRIUS is the original and only home of 100% commercial free music channels in satellite radio, offering 69 music channels. SIRIUS also delivers 65 channels of sports, news, talk, entertainment, traffic, weather and data. SIRIUS is the Official Satellite Radio Partner of the NFL, NASCAR, NBA and NHL, and broadcasts live play-by-play games of the NFL, NBA and NHL, as well as live NASCAR races. All SIRIUS programming is available for a monthly subscription fee of only $12.95.

SIRIUS Internet Radio (SIR) is a CD-quality, Internet-only version of the SIRIUS radio service, without the use of a radio, for the monthly subscription fee of $12.95. SIR delivers more than 75 channels of talk, entertainment, sports, and 100% commercial free music.

SIRIUS products for the car, truck, home, RV and boat are available in more than 25,000 retail locations, including Best Buy, Circuit City, Crutchfield, Costco, Target, Wal-Mart, Sam's Club, RadioShack and at http://shop.sirius.com/.

SIRIUS radios are offered in vehicles from Audi, Bentley, BMW, Chrysler, Dodge, Ford, Infiniti, Jaguar, Jeep=AE, Land Rover, Lexus, Lincoln, Mercury, Maybach, Mazda, Mercedes-Benz, MINI, Mitsubishi, Nissan, Rolls Royce, Scion, Toyota, Volkswagen, and Volvo. Hertz also offers SIRIUS in its rental cars at major locations around the country.

Click on http://www.sirius.com/ to listen to SIRIUS live, or to purchase a SIRIUS radio and subscription.

## About XM

XM is America's number one satellite radio company with more than 7.6 million subscribers. Broadcasting live daily from studios in Washington, DC, New York City, Chicago, the Country Music Hall of Fame in Nashville, Toronto and Montreal, XM's 2007 lineup includes more than 170 digital channels of choice from coast to coast: commercial-free music, premier sports, news, talk radio, comedy, children's and entertainment programming; and the most advanced traffic and weather information.

XM, the leader in satellite-delivered entertainment and data services for the automobile market through partnerships with General Motors, Honda, Hyundai, Nissan, Porsche, Subaru, Suzuki and Toyota is available in 140 different vehicle models for 2007. XM's industry-leading products are available at consumer electronics retailers nationwide. For more information about XM hardware, programming and partnerships, please visit http://www.xmradio.com/.

## Forward Looking Statements

This press release contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements include, but are not limited to, statements about the benefits of the business combination transaction involving Sirius Satellite Radio Inc. and XM Satellite Radio Holdings Inc., including potential synergies and cost savings and the timing thereof, future financial and operating results, the combined company's plans, objectives, expectations and intentions with respect to future operations, products and services; and other statements identified by words such as "anticipate," "believe," "plan," "estimate," "expect," "intend," "will," "should," "may," or words of similar meaning. Such forward- looking statements are based upon the current beliefs and expectations of SIRIUS' and XM's management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are difficult to predict and generally beyond the control of SIRIUS and XM. Actual results may differ materially from the results anticipated in these forward-looking statements.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statement: general business and economic conditions; the performance of financial markets and interest rates; the ability to obtain governmental approvals of the transaction on a timely basis; the failure of SIRIUS and XM shareholders to approve the transaction; the failure to realize synergies and cost-savings from the transaction or delay in realization thereof; the businesses of SIRIUS and XM may not be combined successfully, or such combination may take longer, be more difficult, time-consuming or costly to accomplish than expected; and operating costs and business disruption following the merger, including adverse effects on employee retention and on our business relationships with third parties, including manufacturers of radios, retailers, automakers and programming providers. Additional factors that could cause SIRIUS' and XM's results to differ materially from those described in the forward-looking statements can be found in SIRIUS' and XM's Annual Reports on Form 10-K for the year ended December 31, 2005, and Quarterly Reports on Form 10-Q for the quarters ended March 31, 2006, June 30, 2006 and September 30, 2006 which are filed with the Securities and Exchange Commission (the "SEC") and available at the SEC's Internet site (http://www.sec.gov/). The information set forth herein speaks only as of the date hereof, and Sirius and XM disclaim any intention or obligation to update any forward looking statements as a result of developments occurring after the date of this press release.

## Important Additional Information Will be Filed with the SEC

This communication is being made in respect of the proposed business combination involving SIRIUS and XM. In connection with the proposed transaction, SIRIUS plans to file with the SEC a Registration Statement on Form S-4 containing a Joint Proxy Statement/Prospectus and each of SIRIUS and XM plan to file with the SEC other documents regarding the proposed transaction. The definitive Joint Proxy Statement/Prospectus will be mailed to stockholders of SIRIUS and XM. INVESTORS AND SECURITY HOLDERS OF SIRIUS AND XM ARE URGED TO READ THE JOINT PROXY STATEMENT/PROSPECTUS AND OTHER DOCUMENTS FILED WITH THE

SEC CAREFULLY IN THEIR ENTIRETY WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE PROPOSED TRANSACTION.

Investors and security holders will be able to obtain free copies of the Registration Statement and the Joint Proxy Statement/Prospectus (when available) and other documents filed with the SEC by SIRIUS and XM through the web site maintained by the SEC at http://www.sec.gov/. Free copies of the Registration Statement and the Joint Proxy Statement/Prospectus (when available) and other documents filed with the SEC can also be obtained by directing a request to Sirius Satellite Radio Inc., 1221 Avenue of the Americas, New York, NY 10020, Attention: Investor Relations or by directing a request to XM Satellite Radio Holdings Inc., 1500 Eckington Place, NE Washington, DC 20002, Attention: Investor Relations.

SIRIUS, XM and their respective directors and executive officers and other persons may be deemed to be participants in the solicitation of proxies in respect of the proposed transaction. Information regarding SIRIUS' directors and executive officers is available in its Annual Report on Form 10-K for the year ended December 31, 2005, which was filed with the SEC on March 13, 2006, and its proxy statement for its 2006 annual meeting of stockholders, which was filed with the SEC on April 21, 2006, and information regarding XM's directors and executive officers is available in XM's Annual Report on Form 10-K, for the year ended December 31, 2005, which was filed with the SEC on March 3, 2006 and its proxy statement for its 2006 annual meeting of shareholders, which was filed with the SEC on April 25, 2006. Other information regarding the participants in the proxy solicitation and a description of their direct and indirect interests, by security holdings or otherwise, will be contained in the Joint Proxy Statement/Prospectus and other relevant materials to be filed with the SEC when they become available.

```

The code hating losers were too stupid and lazy to learn and use CW, they're also probably going to be too stupid and lazy to solve TVI and interference problems with their neigbhors.  There will be more amateur to amateur and amateur to non-amateur conflicts.  Hams will look bad and the FCC will regulate the service more because of all the retards we let have HF privledges.   CQ Breaker, CQ Breaker.

Welcome to CB everybody.

Does anyone remember the background theme music played on KABL when it
was an easy listening station in the 1960s?  Some of it was by Henry
Mancini, Leroy Anderson and others.  I'm particulary interested in the
late night hours these music - after about 11 PM.

There's little more retarded than someone lumping everyone in the same
category and refusing to identify himself. It's easy to hide.

I remember the same thing was said when the no-code tech license was
approved. Life as we know it was going to die.

I take it you've never listened to the Extras clobbering everyone and
swearing up a storm on HF. They know code and it doesn't seem to add
any intelligence. It's clear it didn't help you.

Rich

Michael,

In the Bay Area Radio Museum, we have several audio presentations featuring KABL from its "Beautiful Music" period in the 1960s, including:

http://www.bayarearadio.org/audio/kabl/kabl_sept-8-1960.shtml

Several KABL jingles are included at http://www.bayarearadio.org/pages/jingles.shtml#KABL

My deep love for Irish music, in all its forms, knows absolutely no bounds. It is the very reason why I took over RADIO LIMERICK ONE after it was abandoned by its previous owners in 2005. I had a vision and that is to promote the music of my native hometown and country to the people of the world. This is why I decided to embrace modern technology and attempt to reach further than, up until now, was possible with my dream.

A dream of having the world pay attention to the most beautiful music in the world.. But since RADIO LIMERICK ONE started its web streaming service I have realised that there is more to my dream than I first imagined. Not only is the world listening to this music but the world is playing it. The station has received music, by CD and MP3's from countries all over the world and from people who, up until now, could not get an airing at such a level as is proposed by RADIO LIMERICK ONE.

The arrival on the marketplace of WI-FI Radio now means that Internet Radio is no longer the preserve of the elite computer owner, but has brought radio back where it belongs, wireless radio in the bedrooms, the kitchens, the living rooms and the workplace. "We have come full circle and these are exciting times for those who love radio. We can become more involved in radio than ever before, now we are no longer controlled by the barriers of border and frequency limitations and the airwaves of the world has opened out to us and I want RADIO LIMERICK ONE to be a pioneer of this new technology. I want to demonstrate to the musicians who walk the walk with me to realise that the world wants to hear their music as much as I do.

Now is the time for musicians and broadcasters and listeners to unite in one clear objective and that is to embrace modern technology to promote our endevours and show the world that we exist. Lets do it!

RADIO LIMERICK ONE is an all volunteer, Irish music, labor-of-love webcasting radio station. It broadcasts on the Internet 24 hours/day, 365 days/year from a small studio in Limerick City centre, Ireland. RLO has been "on-air" for more than ten years, and "live" webcasting began in June 2005. There is not a terrestrial transmitter. In other words, you can't hear RLO on your car radio but we do broadcast on WI-FI which has made our service available to all WI-FI Radio Owners Globally. Unlike most other webcasts, RLO is interactive. Listeners are invited to interact with each other in a chat room, choose the music, and pop reaction posts to what they hear at any given time.

We focus on independent Irish musicians in the following genres: acoustic, folk, jazz, classical, singer-songwriter, swing, big-band, new-age, instrumental, blues, spoken word, and humor. We also air Christian, experimental-electronica, and soft rock, providing of course its Irish or the performer has an Irish connection.

Our listeners tend to be adult music aficionados and music buyers. Those who tune-in regularly are transformed into "addicted" RLO fans and become part of the family of contributors, listeners and occasional moaners!

Listeners contribute to the experience in many ways sending their own music, phoning in and chatting LIVE on air, singing their own songs and submitting their music.

If you wish to be a part of RADIO LIMERICK ONE then pop along to our
site at http://www.radiolimerickone.com

Best Wishes From Ireland,
Gerry Hannan

Bad News:
You can't do any of this without a license.  There are folks who will sell you equipment that can be heard at some distance, but none of it is legal for use.

Good News:
The FCC used to have a "Class D" broadcast license available for just this sort of thing.  It was discontinued in 1978, but recently resurrected as the "LPFM" Low Power FM allocation.

Bad News:
The FCC allocation of LPFM licenses has been pretty poorly handled, with short windows during which time licenses could be applied for.  Sadly, Christian broadcasting networks have barraged the FCC for license requests during the open period, which has very much clogged the paperwork chain.

Good News:
The FCC does have some information on their web site at fcc.gov about applying for LPFM licenses, and if you can get a retired lawyer to volunteer some time for you, it's not very expensive to apply although it could take years for the license to be actually granted.

Is it possible to stream audio from a computer to a good wifi router and broadcast that way to computers around you?

I was thinking of an earlier thread from someone who was looking for a way to broadcast to his neighbors in a small town.

What would be involved and how many people could tune in the stream at a time?

What commercial antennas or DIY plans exist for a loop AM antennas
that are a step up from the 6 inch loop I'm using now.

Buzz Kilman is now at WCKG, Chicago on the Steve Dahl show.  More at:
http://dahl.com/about/people/buzz_kilman.asp

I too would like to know the what became of Cory James and Ron Brothers.  I was a advid listening to WSHE in the early 70's (1973-77) It was very progressive at that time.  Recall the "Quad FM"...??  I don't recall the format change but did eventually convert to be a "Zeta4" listening.   I had hours of reel-to-reel tape of Cory James and Ron Brothers shows but threw them out many years ago after the player was stolen.  Some had Kilmans' newscasts with the background music...

Cheers!

Note that FM IBOC and AM IBOC are very different things.  I'd probably agree
with you regarding AM IBOC, but not FM.

It is really ugly and inelegant compared with Eureka, though.  But it's
what we got.

You are invited to join us at the RadioJox Yahoogroup!

We are creating a discussion group where Radio DJ's

There is a lack of places where radio DJ's can come and discuss the business with other DJ's.

We created this group to provide a positive place where DJ's can exchange ideas and general comments about the changing industry with each other.

If you want to subscribe with your personal address (instead of the station address), just send an email from your *personal* email account to:

RadioJox-subscribe@Yahoogroups.com

Or, check out the group at:

http://groups.yahoo.com/group/RadioJox/

>What commercial antennas or DIY plans exist for a loop AM antennas
>that are a step up from the 6 inch loop I'm using now.

What are you looking for?  Do you want directionality or sensitivity?

It's hard to beat a long wire for sensitivity.  It's hard to beat a loop
for directionality.

What is the 6-inch loop you are using now?  A larger loop will tend to
buy you more sensitivity but it remains very directional as long as it's
smaller than a quarter-wave (which for AM is very large indeed), so you
still have to swing it around.

I doubt it, and I sure hope not.

The bands are already much too crowded, and third adjacent IS still a big issue, especially with crappy radios in urban areas.

What I would LIKE to see is the FCC start shutting down stations that aren't operating in the public interest and the return of the duopoly laws. This is unlikely, but would do far more to help LPFM than anything else.

Reducing technical standards in an attempt to shoehorn more stations into existing space just isn't going to work... you cannot fight the physics. If you want to have more small stations, you're going to have to start shutting down some of the big ones. And that's something the FCC has been much too reluctant to do in my opinion. Does your city really need a seventh oldies station?

A month ago I picked up a JVC radio with IBOC for the car from Crutchfield.

AM IBOC doesn't sound all that bad if you receive a strong signal.
Once the bit error rate climbs it sounds more like a bad VOIP phone call to
a PC Help Desk in Bangalore.
Then the radio drops back to the analog transmission.

Nothing is going to fix AM until the program content is improved.
I can only list to so many colon cleaning infomercials before I barf.

If you live in LA and like to hear Bing, Elvis, Little Saint Nick,
Chipmunks, and Run Run Rudolph, you're out of luck.
Though their regular playlist is unchanged (Steppenwolf, Beatles, CCR,
some 70s), the Christmas songs are all KOST (Adult Contemporary) now.
We're talking Carpenters, Air Supply, Barry Manilow, and Mannheim
Steamroller. The few KRTH classic Xmas tunes they do play are very
light things such as Johnny Mathis and Andy Williams. Once a day
you'll get lucky and hear a Phil Spector gem or Bing's White Christmas.

Go to this website to complain!

http://kearthchristmas.blogspot.com/

This instrument is ideal for bench work and on-air monitoring, 50 kHz bandwidth setting works great for FM stereo.

'Click here to eee my eBay auction, photos, and complete specifications...' (http://tinyurl.com/ykrcsg)

This unit has been cleaned inside and out, fully calibrated to OEM specs, and burned in to ensure accuracy--I have sold several for LPFM monitoring, and currently have one other meter in stock and ready to go, 'click here for a hi-res photo of the instrument' (http://www.paladinmicro.com/JMM2200HiRes.jpg)--please contact me directly for further information.

I'm trying to find the call letters for an AM/mediumwave station on 1700 khz that identifies itself as "Cash 1700".  Their rather minimal website is at http://cash1700.com/ .  The station serves the San Diego, California region but may be located in Tijuana.  I couldn't find a listing that seemed to match this station when I searched at http://www.fcc.gov/mb/audio/amq.html .

For some reason I thought the station's call letters were XEPE but the FCC shows a station operating on 1450 khz with that call.  Any help identifying Cash 1700 would be appreciated!

I have an old Explorer and get better AM reception than in a new Lexus. What can one do?  Also, it seems electrical lines cause lots of problems.  I try and listen to a small station Radio Sandy Springs 1620 AM in Sandy Springs, GA and some place I get great reception in other places lots of static.  Again, what can a person do?

If third-adjacent LPFMs are a big problem, then why is nobody screaming
about *second*-adjacent translators?

Don't take any FCC listings of Mexican call letters too seriously.  All the FCC really cares about in Mexican listings are the tech parameters. (and some of those are notified by the Mexican government but don't actually exist.  We - and the Canadians - do the same thing.)

The official Mexican government list is on http://dgsrt.sct.gob.mx/fileadmin/ligas/radio_AM.pdf .  However, this list doesn't admit to any stations on 1700 in Baja California!  It doesn't list an XEPE either, at least not in Baja.  It does list an XESS on 1450.

IIRC the station is required to ID in Spanish at least once an hour and I *believe* DXers have heard this ID.

Hi,
I have an old Buick from 1963. The car only has an AM radio (not FM). I
want to keep the car original and use a small AM transmitter and a MP3
player to send my favourite music to the original radio.
Do you think it is possible to get a reasonable sound quality?

I am thinking about buying this:
http://www.vcomp.co.uk/gizmo/gizmo/gizmo_uk.htm

Best regards,
Kim

> --scott

Well, we all realize that those "laws of physics" don't apply to translators from Idaho or Mississippi or wherever,,  but they do apply to LPFM,  right?

No,  we don't need a seventh oldies station.   Or more syndicated get-a-life sports stations.   Or six stations carrying the likes of Savage or Limbaugh or Schlesinger..

But there are some places in this country that need community service,   and aren't getting it.

Yes,  they can buy an existing station -- if there's a willing seller and a buyer in a position to pick up the debt service on it.

Again,  if LPFM did come forth as a major presence,   it might increase the quality and service of what we hear on the radio.   You know,  the old adage,  competition,  better mousetrap,  etc.???

But of course,  the radio pundits in here will say that it's not needed.

Just as,  somehow,  100 watt religious beg-a-thon translators DON'T violate the rules of physics,  but 100 watt LPFM stations with local service DO.

What you can do is buy a car radio with a decent AM section.  Sadly, most
car radios have AM added as an afterthought and the performance is poor.

Electrical lines will cause problems, but a better receiver with good IF
filtering will have less trouble than a cheaper radio with sloppy filters.

Exactly. The FCC did a study and found that third adjacents had no effect whatsoever. None. And this is the *FCC* doing the study, and recommending to Congress, not the other way round. So that means the barrier at this point is politics, not technical issues.

We were given a building permit for a location that not is no good because a commercial station moved their transmitter into our area and washed the entire county at that frequency. So our best shot was to request a move of both location (to a new spot less than 3 km from our original spot) and frequency. We did an exhaustive search of our area and found one channel in one location that had only a third adjacent overlap. We filled out the form with the FCC and were rejected because of this third adjacent channel (which is a college station that had been using WinAmp to shuffle the same ten CDs for two years... hows that for useful?).

Our building permit expires in less than two months, so we're looking into our options. Get a stay of expiration as long as we have the antennae up and broadcasting? (We have access to an existing tower at the new location.)

Any comments welcome.

I agree, but how is relaxing technical requirements going to produce that?

>Again, if LPFM did come forth as a major presence, it might increase the
>quality and service of what we hear on the radio. You know, the old
>adage, competition, better mousetrap, etc.???

LPFM can only come forth as a major presence if people can actually HEAR the LPFM stations. If they are down in the muck and not getting out, it does not matter if they exist or not because people will not be able to listen to them.

>Just as, somehow, 100 watt religious beg-a-thon translators DON'T violate
>the rules of physics, but 100 watt LPFM stations with local service DO.

You'll notice that a large percentage of those existing LPFM licenses have been bought up by the same religious broadcasting chains that run those translators. THAT is the sort of thing that needs to be stopped, not the technical requirements.

>>I have an old Explorer and get better AM reception than in a new Lexus.

New AM radios just aren't as good.  And all the electronic equipment in newer cars (and those around you) doesn't help the interference problem either.

Just as an experiment try to listen to the AM in your Lexus with the motor off and see if the interference clears.

That depends on the quality of the radio in the car, the type of antenna,
and how good the connections were made. Several years ago some auto
manufacturers got rid of the whip antenna and replaced it with embedded
wires in the windshield. The results were poor distant radio reception,
varying also on the direction the car was traveling with respect to the
location of the station's transmitter.

>If third-adjacent LPFMs are a big problem, then why is nobody screaming
>about *second*-adjacent translators?

They aren't?  I have been for years.  For the most part, it's not a matter of the translators causing interference to a second-adjacent, so much as the second-adjacent rendering the translator totally useless and nothing more than a waste of electricity.

The situation today is very different than it was back in the days of the Class D allocation.  Getting rid of the low power class D license (something I am ashamed to say was mostly the result of NPR lobbying) paved the way for much of the lack of niche programming that we see today. The problem is that the layout of the bands is very different than it was back in 1978, and so you can't just drop an LPFM license into the books and expect it to work without some other dramatic changes.
--scott

(Oh yes, you could insert in here my rant about "Christian" networks which totally misuse the whole concept of the translator, and which should be shut down as a result, but I've been giving that particular rant since the late eighties and I've given up expecting anyone to listen.)

>car radios have AM added as an afterthought and the performance is poor.

And the radios in Lexus vehicles are among the very worst I've ever encountered, at least in terms of AM performance.  After hearing the radio in a Lexus GS, I bought a Lincoln LS.  The radio sounds fine, even has AM stereo (not that it matters any more) and the car has all the same features, more power, and cost less. So how much money did Lexus save putting that cheap POS radio in the car I test-drove?

The only AM section I've heard that was as bad was in a Hyundai, and in a Hyundai you don't expect better.

Just because there's a station at the third adjacent doesn't mean the station will be overpowered or lost in the "muck". And who are you to care? If it doesn't work out, then they'll eventually shut down due to lack of audience.

In our neighborhood we have a very tall hill (a short mountain, really) that has a tower on it already. If we could broadcast from there we'd cover the entire county.

What would we do with it? In the evening hours, when the local PEG station broadcasts selectboard meetings or school committee meetings (once or twice a week) or the Town Meetings, we could simulcast them. We could broadcast local musicians. We would do the community thing, because the station would be owned by the local PEG station.

Definitely NOT another fifties station, and really... is that what all LPFM stations do?

See, the whole purpose of the FCC is to allocate channels, so we don't have the sort of zoo you propose. Someone HAS to care. Good examples of what happens when nobody does are the CB band and the Italian broadcast bands in the seventies.

Who am I to care?  I'm a member of the general population, a taxpaying citizen, and that is precisely who the FCC was originally established to serve.

>In our neighborhood we have a very tall hill (a short mountain, really)

What else would you cover?

>What would we do with it? In the evening hours, when the local PEG
>station broadcasts selectboard meetings or school committee meetings
>(once or twice a week) or the Town Meetings, we could simulcast them.
>We could broadcast local musicians. We would do the community thing,
>because the station would be owned by the local PEG station.

This would classify in Europe as a "special event station."  The FCC currently has no license class for this sort of station.  Maybe they should.  It would not be a bad idea.

But if you think this is a good idea, and you think there is space for it on the band, get out a field strength meter and walk the contours.  These days there is some automated software out there that will simulate the process given a terrain database, but what you basically want to do can be done by hand.  You first want to estimate the station contours, then you want to walk the contours with a meter and make sure you won't be interfering with other stations.  The alternative is to contact all the local stations and ask for their contour plots from the public inspection file, put them down, and see if you can shoehorn something in.

>Definitely NOT another fifties station, and really... is that what all
>LPFM stations do?

No, most of the LPFM stations are broadcasting satellite-provided Christian programming.

CB worked out exactly as it should have. Open to the people to do what
they want. As a kid in NYC in the 80's I had a "base station" and
talked with my neighbors all night, every night. No zoo.  Sure, there
were some crazies out there, but people will be people and the Internet
is full of them even today. This is not what I'm suggesting at all for
LPFM, nor is the FCC.

> Who am I to care?  I'm a member of the general population, a taxpaying citizen,
> and that is precisely who the FCC was originally established to serve.

Right... and if the FCC got their way they'd let us have the station license. It's Congress that's standing in the way, not the FCC.

Then you'd get the distinct pleasure of operating at further reduced power. Height above average terrain figures into the contour calculations that include transmitter power.

Limitations on effective radiated power are not limitations on hardware, with flexibility in installation. Limitations of FCC defined parameters are actually hard limits on coverage to limit interference. And in an unusual twist on governmental behaviour, the rules attend to results more than procedures.

So, what this means is that you cannot install a low power transmitter and blow the output into an antenna of extraordinary gain. Nor are you free to mount the antenna at an extraordinary height of your own choosing above average terrain.

Put in other words: the limit is on your coverage not your installation.

Would like to know how to feed a Weston VU meter from a Behringer
Eurorack 602a mixer unbalanced recorder output. Level is same as VCR
and all other current consumer electronic units.
I know the meter was designed to operate with a 600-ohm resistance with
one milliwatt of sine-wave power at 1000 cycles per second = 0 VU.

Thanks for any and all ideas,

Webber

In the late 1970s I worked at several rock and MOR stations in S. Florida. I remember watching the first episodes of WKRP in Cincinnati in 1978 and thinking, "This show really nails it. Whoever did this has been around radio stations and knows what they are talking about." One of the first running gags they introduced in the show was station manager Art Carlson's fear of his mother. Whenever she was about to make an appearance, Carlson would run out of his office and shout "Mother's coming! Look busy! Get to work!" and so on.

In 1980 I joined the rock station WGVL-FM in Gainesville, Fla. I was in the lobby meeting the other people in the station for the first time. A fat guy wearing a blue shirt and slacks ran out of an office and announced, "Mother's coming! Clean the place up! Look busy!" Then he turned around without saying anything to me and slammed the door shut. I turned to the others and said, "Hey, do you know what that reminds me of?" Everyone laughed and said, "WKRP." It turned out that Hugh Wilson, the creator of the show, was a journalism student at the Univ. of Florida in Gainesville and worked at the station a few years earlier. He lifted some of the characters and events from his time at WGVL.

In the show, Carlson's nickname was "Big Guy." In real life, the station manager's name was Irv Uram, and his nickname was "Big Blue." The manager's mother was the station owner, and apparently really was an intimidating individual; people at the station tried to avoid her. I remember that she used to stay up after midnight listening to my show, then complained to the GM about my song selection. Wilson's genius was in taking situations that weren't really that funny in real life, and rewriting them with humor.

In the few articles that I've read about the sources for WKRP, Wilson never credits WGVL. It makes me wonder if he was worried about being sued by the real-life people the show was based on.

WXIX was originally in Milwaukee, but its owners dumped it after its channel was changed to 18. Then it became WUHF.

I appreciate the correction. That derivation actually is even better.

And I didn't notice how old this thread was before I revived it.
Just "joined" and, frankly, am a little surprised that posts this
old were still available from my news provider.

I can't believe that anyone missed WLS, World's Largest Store, Chicago.
  It was originally owned by Sears.
Here's Jeff Miller's great site on early call sign meanings.
http://members.aol.com/jeff560/call192x.html

Charlie.

Larry,

Like you, I love the variety. Here's another station available on the web with a wide variety of songs; http://www.wxhc.com/  It's an oldies format station in Central New York with a play list of-- get this, MORE THAN 4,300 songs!

Gotta love the variety!!

Tom Lacko, an Oldies and Smooth Jazz fan!

KYW,  KOA, KFI didn't mean anything.<

Wrong, on at least two counts:

WGN: World's Greatest Newspaper (referring to the owner, The Chicago
Tribune)
WTIC: referred to owner Traveler's Insurance Company

KFI - "farm information". The station originally had a fair amount of agricultural reporting. When I listened to it in the 60s it still had a farm report every morning.

I'm not sure how it came about, but I seem to recall WOWO Ft. Wayne, IN saying
"Westinghouse Owned, Westinghouse Operated".

I believe so. But you probably meant to say "third letter" like the B
in WIBG. Checking my Citizens Radio Call Book vol. 6 (1925), I found
these likely suspects:
KFAB Lincoln, NE
WABI Bangor, ME
WBAP Fort Worth, TX
WBBM Chicago
WCAO Baltimore, MD
WCAU Philadelphia, PA
WCBM Baltimore, MD
WDAF Kansas City, MO
WEAN Providence, RI
WFAA Dallas, TX
WGAL Lancaster, PA
WHAM Rochester, NY
WHAS Louisville, KY
WHBQ Memphis, TN
WJAR Providence, RI
WMAQ Chicago
WNAC Boston, MA
WOAI San Antonio, TX
WQAM Miami, FL
WSAI Cincinnati, OH
WSAR Fall River, MA
and many others that have since gone off the air.

On Fri, 1 Jul 2006 at 03:05 -0000, David Eduardo scribbled:
->Here is a link to hundreds of call letter meanings
->http://nelson.oldradio.com/origins.call-list.html

Thousands, not hundreds!  That's a really big list!  However, many of the 'meanings' seem to be slogans that were probably adopted after call letters were assigned.

One case warrants comment:  Sure, the letters WNOP presumably were derived from the city of Newport, Kentucky, to which the station was licensed.  But they didn't make any on-air use of this acronymistic tie, at least not in the 35-plus years after they adopted their famous wacky "format" of (mainstream) jazz and comedy cuts in 1961.

This was the radio station that reputedly served as the real-life inspiration for the TV sitcom, "WKRP in Cincinnati."  All kinds of funny sayings, cuts from comedy records, and assorted noises were broadcast from their base in Newport, across the river from downtown Cincinnati.  In fact, for many years in the '70s and '80s WNOP's studios were *IN* the Ohio river! -- floating in the river, which happens to be almost completely "owned" by the state of Kentucky.

One of their wacky trademarks was a collection of station IDs recorded by comedian Shelley Berman, where the letters WNOP would stand for crazy things like (for example) "Where Nobody Oversizes Potatoes."  They used many variations, but never something so dull as merely saying "This is WNOP, which by the way, stands for Newport." This was, after all, a station dedicated to the offbeat, the true hipsters, the 'real' original, laid-back counter-culture.  It was cool when cool was still cool.  It was where the put-on was normal. This was a station with its own recorded sign-off song which ended with the line, [we] "...hope you... don't... die... tonite!" and then after a pause, "from Doubleyou... Enn... Oh... Peee... NEW-PORT!!"

(No complaints about bad taste, please.  Their resident copywriter, who went by the handle of Bunky Tadwell, might've read your complaint on the air, no doubt accompanied with sarcastic barnyard sound effects, and said you just don't "get it.")

WNOP is gone now.  RIP both 1950s' slang and Newport's legendary Jazz Ark.  After the longtime owner passed away it was sold off and now there's a religious station on its 740 AM channel.  Slogans and all, it will be missed.

If I'm correct in my recollection, WIBG started out as a "religious" station - with the letters standing for "I Believe in God." Later, of course, it became Philadelphia's top rock and roll station. The 990 kHz frequency in Philadelphia is home again to a "religious" station.

Call letters are assigned by the FCC but usually from a list of preferences submitted by by the license applicant.  Stations try to choose call letters that mean something or can be said to stand for something.  Try KICY in Nome Alaska or KVI in Seattle (The transmitter is on an island in Puget Sound - Vashon Island).

Other than the fact that the FCC issues 4 letter calls (with some special exceptions for grandfathering) stations can ask for any unassigned call.  West of the Mississippi they start with K.  East of the Mississippi they begin with W. (Again with certain grandfathering exceptions)

Prefixes for the US include W, K, A, and N.  Note that all aircraft in US registry have tail numbers that begin with N.

Anyone care to guess what the call letters HCJB, the pioneer shortwave station in Quito Ecuador were chosen to mean?

Dave Olson  
Broadcast Engineer

I'm looking for a particular song, played weekly on the old Golden Rock WWTC 1280. It's a real needle-in-the-haystack sort of a thing.

Back in the early 80's, I would guess around 1980-81 specifically, my Dad would always tune into WWTC 1280 during the afternoon hours on the weekends, and it seemed like every weekend we'd hear the same songs. I remember hearing "Black is Black", "Secret Agent Man", and unfortunately, "Eve of Distruction", which always sent me out of the room covering my ears, because it made me sad. (I was a sensitive 8 year old kid.) But there was one particular song that was always being played, and I LOVED it, but I didn't know what it was? I'm not sure if I couldn't understand the lyrics? I used to call it "The song that rumbled the house" because the man singing the song had a very deep voice.

Unfortunately, I still have no idea of what the lyrics are for the song, and don't know who sang it. I do know that it must be a rare song, because I haven't heard it for the last 25 years, and I've always been looking for it.

This is what I know:
Male singer or group
Strikes me as a song that would be from the 1964-66 era.
Sounds a LOT like these songs:
"California Sun", by the Rivieras. (Sounds a LOT like this song! VERY similar.)
"Lets Dance", Chris Montez
"Under the Boardwalk", Drifters
"I want Candy", original version, not Bow Wow Wow.
"Got a line on you", Spirit (chorus)
Sounds very much like beach type music.

Sounds driving and raw, like a garage band.
Very fast paced song, with a bit of an eerie overtone.
Very deep bass and singer has a deep voice, possibly hard to understand lyrics?
Played every weekend on WWTC in the early 80's, in the afternoon hours.
Never played on KOOL 108 or any other oldies related stations.

I apologize for not giving a lot to go by.  This is about all I know. I've looked for the song for a good 20+ years now with no luck.  My folks, who heard the song weekly, have no idea either.  I think its something rare.  Maybe a favorite of the DJ at the time?  (Does anyone know who the afternoon weekend DJ was back in the years 1979-1981?)  If anyone used to listen to WWTC in the early 80's and might know what I'm talking about, please let me know.

Many thanks!
Tina

KFI was randomly assigned the calls very early on. They created their own
meaning from their programming. The same owner, Earle C. Anthony, also had
KECA, his initials, and now KABC. Anthony was a major Cadillac and Packard
dealer in the Southland.

And, in some cases, incredibly out-of-date.

Example: WRQC, Cleveland, Ohio. 92Q changed calls 25 years ago.

92.3 became WJMO-FM, then WZJM when bought by local owner Xen Zapis.

After a while it was bought by CBS, ran their failed "Jammin' Oldies" format
for a while, and then flipped to their "Extreme" format as WXTM.

Having moved out of Cleveland three years ago, I just went back to their
website, 923extreme.com, and have discovered that CBS has moved the old
K-Rock New York calls (WXRK) to Cleveland. Ironically, K-Rock was also on 92.3.

K-Rock is now WFNY, Free FM 92.3.

Holy crap. Looks like Opie and Anthony are back on 92.3 in NYC, too. Guess
CBS didn't learn their lesson the first time. ;)

> WNOP's studios were *IN* the Ohio river! -- floating in the river,
> which happens to be almost completely "owned" by the state of Kentucky.

It stood for "Hail Christ Jesus' Blessing."

Best,

Joe

Found the song - "King of the Surf" by the Trashmen.
1960's newsgroup helped me on this one.
Thanks,
Tina

Which part?

There was an article in the National Radio Club's "DX News" years ago
giving a tour of the WNOP "Jazz Ark" floating in the river.  Unique,
indeed!  (sure wish I could find it)  The next year, on my way to the
Dayton Hamvention, I made a point of looking for the floating tanks
where the article said they were -- and they were there.  They no longer
are.

I have no idea whether the river actually belongs to the state of
Kentucky, the original poster will have to provide any evidence of that...

I sent this to 700 WLW's link, for questions concerning IBOC - it was very nice of Darryl to respond so quickly, but he dodged a lot of my questions/concerns::

Hello,

I have heard and read many negative reviews concerning HD/IBOC, especially, how it will negatively affect nightime AM DXing.  I live and Maryland, and very much enjoy listening to Scott Sloan, but I am very concerned that it will be very difficult, because tests with WOR, in New York, running HD/IBOC caused much interference with WLW. Also, I understand that an HD/IBOC exciter, and possible expensive modifications to antenna systems (to modify the bandwidth), along with a yearly fee to iBiquity, makes this technology very expensive.  Tests with daytime IBOC have caused much adjacent-channel interference, poor quality transmissions from the digital sidebands dropping out (it's all-or-nothing with digital), and poor penetration and coverage of the digital signal. Luckily, nightime IBOC, has not yet been approved and, hopefully, never will.  Was your station pressured by Clear Channel and iBiquity to run IBOC ?  Also, I have read that a number of stations have turned off  HD/IBOC, because off listener complaints and adjacent-channel interference.  I hope your station doesn't "shoot iteself in the foot", by running HD/IBOC, thereby cutting off many AM DXers ! I would appreciate any thoughts on this, when you get a chance.

AND the response from Darryl at 700 WLW:

Actually, one of the first IBOC test stations years ago was 700WLW. The system has been improved a lot over the years.  The interference comes from the digital signal being on the sidebands of the main carrier.  One of the things that Clear Channel has done has required the AM's roll off at 5k, which actually is a good thing reducing interference and allow the smart stations to make the signal more dense

and loud.

You are correct with the issues in digital transmission...it's either there are not and this with lower power stations may still be an issue.

As far as antenna modifications for bandwidth, being a non-direction station 700WLW is OK with minor issues. We did have the HD signal on for a few weeks a few months ago and did turn it off because of processing issues. The new equipment has arrived and at some point we will begin experimenting with HD again.

Although, there are problems, no pain...no gain. We live in a digital world. We all need to embrace the future...or it will run us over.

Thank you for listening. We'll continue to make more.

Darryl Parks
700WLW

Here are a couple of good IBOC links:

They don't own the Ohio river but somehow, the KY line goes up across the river
to Indiana as well as Ohio and probably IL. It happened when the state boundrys
were set up

I originally scribbled:
->>>> WNOP's studios were *IN* the Ohio river! -- floating in the
->>>>river, which happens to be almost completely "owned" by the
->>>>state of Kentucky.

....and then after asking for citation, on Fri, 7 Jul 2006 at 04:59 -0000, Steve Sobol indicated which part:
->The part about Kentucky owning the Ohio River.

Kentucky is an older state (admitted to union in 1792) than Ohio (1803), which may explain why it owns the river up to the low water-line on the Ohio shore's side. Thus the Kentucky highway department paints the bridges with "wrong" colors and boaters are required to get Kentucky licenses. Not to mention why Kentucky seems to habitually name bridges over the "Ohio" river with the most tongue-twisting names of assorted old Frankfort politicians and newspaper guys. (Try saying "Brent Spence Bridge" fast five times in a row!)

It's probably more correct legally to say that Kentucky's ownership dates to its originally having been a county or district of Virginia.  When Virginia ceded its claim to the old Northwest Territory to the federal government in the 1780s, presumably it kept the river along with lands to the south of it.  Thus Kentucky inherited title to about 98% of the river.  In the 1980s Ohio sued Kentucky in the U.S. Supreme Court to try to change the situation.  The Supreme Court appointed a 'special master' to handle the case; he decided in Kentucky's favor.

As for the late and lamented 'Jazz Ark,' another poster answered that one already.  I believe there was also mention of it on the special memorial program on April 30th broadcast on the new WVXU (owned and operated since August 2005 by the local classical music station) which paid tribute to the late Oscar Treadwell.  Several local DJs reminisced about Treadwell, who passed away in April of this year.

If I didn't mention it in an earlier posting, I'll note that for 31 years Treadwell was the "Nat Hentoff" of Cincinnati jazz.  He had a long-running, daily two-hour radio program of jazz music and poetry reading on WGUC which was originally called The Eclectic Stop Sighn. (There might've been two 'p's in "Stop.")  Treadwell started out at WNOP in 1965 after moving here from Philadelphia, and from then on he was the resident jazz expert and historian.

To get back to the main topic, the floating radio studio was a WNOP feature during the 1970s and '80s.  I think they abandoned it due to high costs in repairing the occasional but inevitable problems and damages.  (Storms, runaway barges, and so forth.)

Before the Constitutional Convention of 1787 Virginia claimed all the land
to the Pacific Ocean, and all of Ohio and perhaps most of the rest of the
northwest.  The eastern states generally gave up their claims to land west
of the Appalachian mountains.  Virginia, however, retained the Ohio River,
and gave that claim to the Federal Government.  It then went to the state of
Kentucky.  I believe that technically Kentucky has all of the river right on
to the Mississippi.   West Virginia owns the  whole river from Kentucky to
Pennsylvania, for what it's worth.  That's why it was Virginians who drove
Blennerhassett from his island, which is now a West Virginia State Park.

Art Bell is doing the Saturday broadcast (22 July 2006).  But not from the high desert, as he almost said.  I recently heard that they had technical problems with Art's new setup so he was off C2C for a short time after his relocation.

Dear All,

I have a specification on my FM TX,

RDS level 2KHz, deviation +- 75KHz.

Question:
1. If my FM TX freq is 100MHz, where is the RDS freq ?
2. The deviation means when RDS is trasmitting ( and keep trasmitting
data repeat), I check the  tone deviation of RDS?

Thank you so much!

Best regards,
Boki.

Like it matters who hosts this loony show.   They have nothing but
crackpot guests and nut cases calling in, no matter who is answering the
phone.

There's a reason this show is on in the middle of the night.

Mike

Exactly! Great entertainment. That's why I listen.

Last night I was listening to Sports Byline USA, hosted by radio jock Ron Barr and found myself recalling Norm Chomsky's: If only they'd talk politics like the way they talk sport, like who's on first?  My POINT is that that's exactly what they're doing on Sports Byline USA.

Let me assure you - I was tickled pink.  I even gave Ron Barr a call
but I was to - shy - to talk with him.  So here I am.

Let me give you an example of smart politics talk on talk radio show -
Sports Byline USA with Ron Barr.  Last night a caller pointed out how
great it is that sport's personality(s) are getting into politics cause
"big money" isn't there [yet?].  It was Ron Barr who said - I believe
the word was - disenfranchised, that is, radio jocks are.

Did you know that George Noory - Coast to Coast AM - is a political
wanna be?  And he's every so much conscious of the BIG MONEY trail.

Anyhow - I'm thinking that
1.  Norm Chomsky's political dream has come true.
2.  Radio and sports jocks are our alternative to the one party of the
republicans and democrates.

WHAT DO YOU SAY

Hi all,

I looked for a FAQ but didn't find one and hope announcements such as this one are welcome here. If not, please let me know & accept my apologies!

We've launched a new arts / music / media directory, IndieCoffeehouse.com

There's a radio category ( http://www.indiecoffeehouse.com/directory/Media/Radio/ ) and you're invited to submit your favorite radio station or radio-related website. Listings are free & we approve them very quickly.

(Oh, and fo those who care about such things, we are SEO-friendly, have a PageRank 5, and a steadily growing number of backlinks from relevant sites.)

See ya at the Coffeehouse....

cheers & gracias!
Denise

While on board "Costa Fortuna" sailing from Tripoli to Savona on 1 April 2006, near the Straits of Messina I received a station on this frequency, announcing in Arabic and broadcasting very interesting North African/Arab music.

Anyone know where it was?  Is it possible it is a webcaster?

-------
ZFM is on the air!

Thanks to everyone who burned the midnight oil to help get the Z up and
running without your help we'd still be scratching our heads! Watch
this page for weekly giveaways and prizes. Keep it locked to ZFM.
Australian Dance Radio Network

Our Programs can be seen at

http://www.zfm.com.au/page2.html

To listen online you will need the free Real Player Plug-in. which you
can get at the top on the home Page of
http://www.zfm.com.au/

Our Audio Feed from 5AM to 10PM (AEST)
 7 Days is at

http://www.zfm.com.au/

 ZFM is the largest dance radio network down under, with coverage
extending into virtually every part of Australia. From central, state
of the art digital studios in sleepy Newcastle NSW, fed alternately
from remote live studios in strategic capital cities, the ZFM team
delivers the best in new dance, hip hop and R n B. We also feature a
number of specialty programs throughout the week,
---------------------

.Wake up with Bollywood Down Under for the best and brightest Indian
dance music in the morning, every Day from 6 am (AEST)
------------------
Monday to Friday 7 am--10 am the Euro Dance AUS team take over with the
```

best new house from all over Europe, giving your morning a banging start. There's no better way to face the day. We keep the music pumping which also makes the show great for your morning aerobic work out just before work!
------------------------------

Late night every night 9--10 pm the best techno, ambient, hardcore, gabba, breakbeat
---------------

"Radiotalkback.net"

at

http://www.talkback.net

The email address is on that page

Is the most innovative news talk show around, brought to you every Friday 11 am - 12 pm  (AEST). With a roundup of the weeks news and your opinions on air its hard to beat for the best way to keep up to date with what's happening in Australia.
To be part of the show all you have to do is drop by Radiotalkback.net and have your say using a simple voice plug in for your email.
Join the hundreds of people who DO get their voices heard on ZFM talkback.
(We accept audio up 9 am Thursday each week for the Friday show)
To listen online you will need the free Real Player Plug-in. Which you can get at the top of on the Home page at
http://www.zfm.com.au/

Anyone interested in this?

http://cgi.ebay.com/ws/eBayISAPI.dll?
ViewItem&item=4868990745&rd=1&sspagename=STRK%3AMESE%3AIT&rd=1

Item number: 4868990745

This could be a collectors item for any oldies fan, or fan of the old Top 40 radio stations. (Or if you grew up listening to "The Big 68" - WRKO.)

WRKO was a powerhouse radio station in the Boston area in the late 60's & 70's. Like a lot of Top 40 stations in their heydey, they would occaisionally put out a compilation album with some of the top hits (Now great "Golden Oldies!).

This album cobver has some Boston images. A pic of Fanuil Hall and the statue of Paul Revere on the cover. The back cover has an image of Government Center where WRKO was located. The inside of the album (it folds open-close) has all of the DJ's who were on WRKO at the time Shadoe Stevens - Bobby Mitchel (aka Frank Kingston Knight) - Gary Martin - Jerry Butler - Joel Cash and the zany (and skinny!) Dale Dorman.

Discs are in pretty good condition. THe album cover is in pretty good condition too.

OK, after some more listening to WTWP "Washington Post Radio" (replacing WTOP 1500 in Washington DC and suburbs) I've got a few more opinions:

1. Interviews are now much slicker than the first couple of days.

2. Most of the interviews are not with newsmakers, but are interviews with Washington Post reporters, columnists, and other media (e.g. TV reporters, spokespersons, former spokespersons...) personalities "in" the news industry. This isn't all bad, and other radio news (even NPR) is often talking about the media reporting the news rather than those making the news. But it seems an unnecsssary level of indirection: why interview a reporter about his article, rather than talk about the subject more directly?

Tim.

Well first, you have to consider that the reporter is most likely getting very little to nothing for appearing on the radio except promotion of the reporter's skills. Second, until WTWP is established, newsmakers aren't going to be willing to submit to long interviews for the most part unless their votes or power base arises in the DC area but a politician is quite likely to want to be interviewed by a Washington Post Reporter. Third and most important of all, the reporter can mostly discuss what the reporter learned rather than more details. It's quite likely that the reporter put all of the relevant facts in the article and all you're really asking for is a rehash of the newspaper article, which makes for even more boring radio than interviewing the reporter.

Because they can't get a "name" to talk to them?  Interviews of big
names aren't a dime a dozen.

Frank thanks Georgia Governor Sonny Perdue for singning a sweeping immigration bill into law. Frank argues that the law should not only apply to employees and business owners, but to politicians as well, and proposes a legal limit on the amount of wealth politicans have so that they are less corrupt and more responsive to the issues of the American people. Frank also says politicans who are pro-illegal alien, or are caught employing illegals, should be stripped of their office and immediately thrown in jail.

Frank also proposes turing the entire American population into a defacto militia, awarding an American citizen a $2000 bounty for every illegal they identify.

Also, Frank addresses the talk radio plagurists who steal his material, word for word... Lionel Richie condemned for his support of Momar Khadaffi-duck... NYC Mayor Bloomberg's heavy taxation policy driving people out of town... Bill Clinton calls in to discuss the week's events... Rush Limbaugh and don't get the Duke rape story... The politics of high gas prices... Frank explains what a "Berengian" is... your phone calls at 718-761-9996 and much more.

Does someone know if WWL (New Orleans, Louisiana) 870 AM sends QSL
cards?  I am in the San Francisco bay area and I finally confirmed
their signal by their call letters a couple nights ago.

Thanks,

--

Because the whole purpose of the station is to promote the newspaper.
For what you want, go to WTOP on FM.

Mark Howell

Hi, I just figured out that you can listen to some of the xm radio stations for free using winamp. The 60s on 6 is about the best format I have ever heard.

Frank applauds the Minutemen in their march on Washington, arguing that they are not so much against illegal invaders, but are against crime.

Frank then proposes his own "final solution" to the illegal alien problem - chip implantation for anyone who comes into America on a visa. The chip will send out a signal out to immigration authorities once the person's visa expires, allowing for easy tracking and expelling of the violator from America. If this chip were removed from the visa holder before its expiration, another signal would be sent to authorities noting abuse of the system.

Frank also calls for the deportation of Americans who want to play Political Hackey Sack with Iran. If you're that stupid, if you're that naiive to feel sorry for Iran and portray that country as a victim, you have no right to call yourself an American. Frank bases this on the closing words of Iranian President's letter to Bush, where he writes, "Peace be upon those who follow the true path".

Also, the Roman origins of Patrick Kennedy's excuse for speeding... how Clinton originated Project Eccellon... prediction for Bush's speech on Monday... your phone calls and more at 718-761-9996.

I suppose Dana means:

Winamp > Winamp Library > Online Services > AOL Radio with XM

By "best format," do you mean the programming?

I hope you don't mean the stream's digital format is the best you've ever heard. At 16k bits-per-second (bps) -- providing 2 channels at 8k bps each -- I find the sound is barely tolerable for more than a few seconds. I find that awful sound swamps good programming.

It's difficult for me to understand how you could have avoided mentioning the awful sound while reporting the "best format" you've ever heard. Do you have a vested interest in giving this "service" an unrealistically positive review?

There are a couple of Classical music XM channels I'd be happy to find streaming on the internet. But by sending them with such a slow stream, they get distorted to death -- which ruins the music. Please tell your boss I said so. Thanks.

```

The use of the term "final solution" today in any context other than that of the Holocaust is insulting, insensitive and intended to be incendiary.  That it would be used by a person or persons of the ilk that think(s) a program such as "The Right Perspective" adds anything useful to the national dialogue is hardly surprising.  However, it doesn't make the practice any less deplorable.

And before anyone starts a thread on "political correctness", let me just say preemptively that good manners and concern for others is always correct behavior.  Anyone who thinks or behaves otherwise just sends us one more step back toward the cave from which most of us have spent eons trying to emerge.

John Figliozzi

The "Radio Crazy"     "its" baaaaaakkkkkk!!!! Hi!

Partial interest in full-time 1 KW AM radio station in
beautiful Catskill Mountains region of NY state. About
a 2.5 hour express bus ride to NYC.

Group deal.

Active or inactive investors with $25,000 min. each
are welcome. All investors would be on the board with
full voting rights if desired.

Station sale includes building, land and tower. The
station is a "legacy" station if there ever was one!
It is on the air since the 40s of the last millennium.

Call (478)741-1710 to reach my palace in Macon, GA.

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

The "Radio Crazy", it is baaaaaaaaaakkkkkkk !!!!! Hi!

For sale outright: ($150,000 firm).

My partially built LPTV station licensed to Rehoboth Beach, Delaware.

WRDE-LP, channel 59, analog, negative offset. 20,500 watts ERP. CP expires May 5, 2007 so you have plenty of time to complete the build-out, silly!

Leases already in place for the tower site and separate studio/office site nearby. FCC has approved the present tower site.

Transmitter shelter has been erected.

Price is $150,000 firm. This includes the CP, call sign, goodwill, all present physical assets and zero debt. You WILL however be expected to take over the tower site and studio leases and any equipment leases. At the present time, we have no equipment leases so the only takeover OBLIGATIONS would be electricity and rent.

This would be a corporate sale. You'd get our Delaware "C" corporation which was founded July 1, 2005.

We are members of the Rehoboth Beach/Dewey Beach Chamber of Commerce. A local tel. number and PO Box have been established.

Tonto!!!!! Rehoboth Beach is possibly one of the wealthiest small cities in the nation! For a community with a Winter population of about 1500 (2000 census), they get about 2.7 million visitors per year in an approx. 1.3 sq. mile area !!!

Serious qualified buyers may request a business plan. It is a Word (doc)file about 24 pages long.

This would be only the third commercial TV in all of Delaware and the first commercial TV in that (Sussex)county.

This is the Salisbury/Ocean City (MD) market.

Call anytime (478)741-1710 to reach my 235 room palace in Macon, GA. When the butler or a servant answers, please ask for Meyer.

No tire kickers, please. This ain't eBay!! Serious qualified buyers only. This is one heck of a good deal.

This is a beautiful area right by the ocean. Condos go for up to $3.5 million. This ain't no slum. Real estate values are EXPLODING there!

Hear ye, hear ye all peasants: FCC says you must be a US Citizen with no felony convictions. Please state: "I am not a crook"  Hi!!!

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

"Meyer Gottesman" <wrecktech@yahoo.com> wrote in message
news:e4qlqd$8n9$1@xuxa.iecc.com...
| The "Radio Crazy", it is baaaaaaaaaakkkkkkk !!!!! Hi!

| For sale outright: ($150,000 firm).

| My partially built LPTV station licensed to Rehoboth
| Beach, Delaware.

Meyer - I've tried to be tolerant, and I know there are others here who thought I was being a bit too fussy in objecting to this ongoing pitches to have someone take this pig off your hands, but hasn't the total lack of interest in the property clued you in to the idea that it's just not worth anything, to anyone else?

And what happened to "I'll only flog a property once" in this newgroup? That struck me as a fair compromise, but one to which you seem unable to adhere.

Please stop.  I've explained before - Rehoboth Beach is NOT the resort town you describe.  It has ample television available from Philadelphia, Baltimore, and Washington, DC, all top-25 markets, as well as Ocean City/Salisbury MD that you mention.  This little peashooter will have neither the revenue nor the captured audience you claim.  You may just have to take a loss on this property.  And you'd be well-advised to cut your losses, or at least take them out of here.

Thank you.

From: RichLaDieu [mailto:richladieu@gmail.com]

i just heard a roumour from an inside source in ibb
engineering that management is planning to close the delano relay
station in california by next feburary.

cheers
rich

can anyone help me find the paper titled "IBOC Interleaver Design and Simulation Results",written by Kroeger, B., and Cammarata, D.?

May be published in Radio World, Vol. 22 No. 2, January 21, 1998, pp. 20-21 !

if whoever has this paper ,could you mind sharing with me,and contacting with me.

thanks in advanced!

was Ode to Billy Joe...

"It was the third of June, a hot and muggy New York day
I was out listening to oldies,
and my brother was too

And a bit before dinnertime we went back to the house to eat,
And mama said out the back door to remember to turn the radio off,

Later I heard the news: some clown named Jack hiJacked the oldies radio
station CBS-FM.

Papa said to mom as he passed around the black eyed peas "Infinity never
had a lick of sense, pass the biscuits please"

"There's five more feet in the yard I got to mow, Mama said it's a shame
about WCBS-FM anyhow"

Seems like nothin comes to no good in the broadcast industry,
and Jack and Infinity has destroyed CBSFM oldies in NY citry

My brother said he recoletected that he and Tom and Billy Joel
Saw Cousin Brucie doing a promotion at the Bergen Mall

And it was nice talkin to him that night,
Oh, I'll have another piece of apple pie, you know it don't seem right,

I heard him playing his oldies show last Sunday night,
and now you tell me WCBS-FM has been hiJacked just today..

Mama said I can see what happened to your appetite, been microwaving
frozen food the last hour and you haven't touched a single bite.

That nice young DJ dropped by today, said he'd be pleased to spin oldies
at WABC next Saturday night. Oh BTW, he said he though he saw a guy that
looked a lot like a suit from Infinity, and he and Jack were throwing
oldie records in the dumpster behind the WCBS-FM station.

A year has come and gone since we heard the news about WCBS-FM. Another
oldies station WKBW bought it in Buffalo, A station in Conniticuit
changed their callsign and added junk to their playlist last spring, and
now there isn't on the radio anything ('cept WABC Saturday night and WMTR..)

And me I spend a lot of time picking mp3s off the 'net
and drop them into my ipod to listen to instead
off of the radio anymore......."

FWIW, I agree that it's probably time to put the sale to bed. I don't think
it's going to happen.

The "Radio Crazy" once owned a "Gibson Girl" liferaft transmitter. Those in the know may recall it transmitted on 500 KHz and used a balloon or kite with a 300 ft. antenna. The ground wire was tossed into the seal. I understand the range was about 150 miles and the output tube was a 12A6 with perhaps 5 watts output. It transmitted an SOS using MCW.

When you are a ham 56 years you get exposed to this kind of stuff! Hi!

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

Technically, Music Choice may have decent playlists... but it isn't radio.

and KSTP-AM, -FM, and -TV, all based in STPaul, Minnesota;
KDIZ 1440, Radio Disney;
KBEM 88.5, Board of Education, Minneapolis (run by the school
district);
KMOJ 89.9, "MOJo", Soul, blues, gospel, reggae, jazz;
KNOW 91.1, Minnesota Public Radio's news/talk station;
WLTE 102.9, LiTE rock;
KZJK 104.1, another "Jack" format station;
KQQL, 107.9, "Cool 108"

A few I remember from living on Long Island:
WALK-AM & -FM, "Why run all over the dial? Walk for the best ...";
WYFA 1570, "Where Your Friends Are" (modified quietly after the
station was sold to "Where Are Your Friends?");
WBAB, BABylon, New York;

WUSB, University at Stony Brook (part of the NY State University
system);
and the "LI"s: WLIM, WLIR, WLIX, etc., (Long Island)

Like Smooth Jazz format?

Especially with variety?   Want to hear more new songs or something
unexpected, and possibly even be delighted with the unforeseen?

Avoid the narrow-casters.    And routine Top 200 smooth jazz songs ad nauseum.   Oh, they'll play those, but they'll play a lot more, and broaden your listening world in the meantime.

Listen here instead:

www.kksf.com

to KKSF, San Francisco

Larry Ingersoll

(and I'm only a listener - not with a vested interest)

The old call signs, like WBZ, WTIC, WEAF, WJZ, WCAU, KDKA, WGY, WGN, WOO, KYW, KOA, KFI didn't mean anything. The three and four letter call signs were shared with coastal stations, point-to-point stations and ships. Broadcasters got what was left. WLIT, Lit Brothers Department Store in Philadelphia was the first station I remember that had a call sign that meant anything.

Pretty creative use of four letters one of which has to begin with W or K. Thanks for posting it.

WBIZ (business radio) and WEZY (easy listening) and WWDC (Washington, DC), WAMU (American University) are a few that come to mind.

WTBS, Tech Broadcasting Station from the mass. instutite of TECHnology, (MIT) later sold to Turner.

WIBG (I believe in G-D) a relegious radio station in Philly, latter a Rock and Roll station in the 1960's.

KYW (doesn't mean anything, was K for the U.S. Y for experimental, W for Westinghouse), I assume at one time they had a KXW, there were four stations.

Geoff.

>KMOJ 89.9, "MOJo", Soul, blues, gospel, reggae, jazz;

For the record, KMOJ's calls are derived from the Swahili word
"Umoja," which means "unity."

I worked at KMOJ 1981-86.

Broadcasters could get the calls originally assigned to ships for their
radio stations.

"The Tribune obtains the call letters WGN (World's Greatest Newspaper) from
Great Lakes skipper Carl D. Bradley."

As Gerard said, most older calls didn't mean anything. Most of the three-letter calls, and four-letter calls with A or B as the second letter, especially. I'm pretty sure WIBG is one of these assigned in order by the government calls.

It was not unusual for a station to choose a slogan *after* receiving its assigned call letters from the government. For example, that's where WSM's "We Shield Millions" came from: the government chose WSM first, then WSM chose a slogan to match. They could just as well have ended up assigned "WSI" - "We Sell Insurance". Some stations held contests, asking the public to come up with a slogan. (I believe I've read that's where WSB's "Welcome South, Brother" came from)

Let's see, the four original Westinghouse stations?:
KYW, Chicago (yes, Chicago - it moved to Philly later)
KDKA, East Pittsburgh
WBZ, Boston
WBZA, Springfield

Y was actually for educational institution stations, like W9YT (University of Wisconsin), W0YC (Univ. of Minnesota), W9YH (U. of Illinois), etc.. And only with the "ham-format" number-letter calls. Experimental stations were X, and still are - at the time, calls like W9XM. (also operated by the U. of Wisconsin) Today experimental stations get something like KC2XIM. X & Y in all-letter calls like KYW had no special significance.

KYW is somewhat of a mystery, not falling into any of the known categories of how a Eastern station got a K call. Them and KQV, Pittsburgh.

Center of RDS signal at 100,057 MHz

> 2. The deviation means when RDS is trasmitting ( and keep trasmitting
> data repeat), I check the  tone deviation of RDS?

RDS don't have an start nor stop bit only a block of 26 bits, in 16 bit of information word and 10 bit of control word with an timing pulse rate of 1187,5 Hz.

Regards,

Ralf

For all of you who passed through Hartford radio and WPOP in particular, I'm afraid I have some sad news to report.  Augie Santana has died.  He was truly one of the most unforgettable characters it has been my pleasure to have known, a little rough around the edges but a genuinely decent and thoughtful guy.

My thanks to Brian Caldwell for alerting me to the ever so brief mention in Saturday's Hartford Courant.  And thanks, too, to the very helpful people I spoke with at the Courant, the Shaker Funeral Home, and the New Britain Herald.  With their assistance I have obtained the following obituary which appeared in the Saturday, August 12th edition of the Herald:

"NEW BRITAIN -- Augustine Z. Santana, 81, of New Britain, CT died Thursday, August 10, 2006 at New Britain General Hospital. Augustine was born in Thornton, Arkansas and was the son of Julio and Caroline (Zavala) Santana. He worked as a radio engineer for WPOP for several years. Augustine was a U.S. Navy veteran during World War II. Augustine is survived by two sons, Jose and Juan, both of New Britain, two daughters, Rosemarie Thibeault of New Britain, and Carolann Norton of Florida, his sister Maria Ojeda of Johnstown, PA, eight grandchildren and ten great grandchildren, several neices and nephews. Funeral and burial services will be private. There are no calling hours. The Paul A. Shaker/Farmingdale Funeral Home, 764 Farmington Avenue, New Britain, CT was in charge of arrangements. www.shakerfuneralhome.com"

In the obit, Augie's WPOP career is somewhat understated.  He worked at the station for at least 40 years, the majority of them as Chief Engineer. Augie was one of a kind.  Whether it was his rhetorical "How goes the battle for men's minds and women's bodies?" or "How are things in the land of Zamboango?" or his pearls of wisdom such as "You don't have to study to be stupid; it comes naturally," (sorry, that's merely the translation; I can't say it in the original Spanish) I'm sure I am not the only one of us who will remember our old "compadre" with a smile.

I'll suggest an FM transmitter from the C. Crane Company.  Here's a web
page for their transmitters.

http://www.ccrane.com/radios/fm-transmitters/index.aspx

Hi Folks:
I've been getting a foreign language radio station on my radio, where I use to listen to TV ch6 audio.  Yesterday I was up in the northern NJ area by New York, and this station was so overwhelming I couoldn't play my ipod! What is this station doing on 87.7 and does anyone know who it is?
Thanks!
Harry

from laradio.com

(August 17, 2006) KZLA is abandoning Country Music and moving to a new format called Movin 93.9. Anchoring the new morning show at Movin 93.9 is Rick Dees.

The new format is a mix of Rhythmic Pop Contemporary, which will feature the music of artists like Beyonce', Gwen Stefani, Usher, Jennifer Lopez, Black Eyed Peas, Madonna, Janet Jackson, and Gnarls Barkley.  Movin 93.9 is "The Mix That Makes You Move."

If it's near NYC, I'd guess it was one of the Haitian pirates in Brooklyn.
Is it almost French but not exactly?

WNYZ-LP on Manhattan.  It's a legal low-power TV station on channel 6.
My understanding is that it's formatted like a radio station but does
have some kind of video as well.

Could be WNYZ-TV. The low power station licensed to NYC runs a directional pattern and according to fybush.com it runs a Hispanic Urban format of music videos.

Hi Folks:
   I hear an ID in English today. a man's voice said WNYC 87.7.  A
little searching gave me a WNYZ, which he might of said, which points
to a Russian station. It's strong, 3000W according to that page, but
it's advertised as the audio channel to TV ch6. It isn't because TV FM
is considerably narrower than this.
Thanks for the replies!
Harry

That's okay, most of them aren't type accepted anyway, and a lot of them
violate part 15 specs so badly out of the box that they could never be.

There was a discussion about this in a recent Radio World.  Legitimate
FM broadcasters are getting annoyed by interference from these devices.

IUnderstand KZLA continues country format via its HD service and also
on its website.

I used to work at WSRF and WSHE-FM in Ft Lauderdale in the late 1970's. WSRF was rock and then country while I was there. WSHE went from progressive rock to soft rock to progressive to Corporate rock while I was there. Some of the people I worked with were Tom Judge, Micky Milner, John and Barbara Emm, Tom Webb, Cory James, Dan Carlisle, Jim White, Ron Brothers, Nancy Gettle, and Buzz Kilman. Anyone out there know what became of these folks? Does anyone remember WSHE during its punk-rock heyday in 1978-9?

Does anyone remember any of the records that were late 60's where an announcer was supposedly asking questions and the answers were all clips of a line from a current song?  Pretty creative stuff but I cant seem to find anything on it on the net. I wanted to try to find some of these to play for my son.  I worked in some stations later but have few connections to them now and the newer jocks dont know these novelety songs.

Dickie Goodman, perhaps?

Plenty of others stole his idea; he was the one that made money with
it *first*

Google that name; but you can start here:

http://en.wikipedia.org/wiki/Dickie_Goodman

I remember the "Flying Saucer" novelty record(s) where the Man From Mars was interviewed and replied with samples from current hit tunes.
Think these were more late 50s early 60's though. I'm sure they're all on various Doctor Demento compilations.

The artist was Dickie Goodman.  There are a couple of CD's available
on Amazon.com.

Couple of years before me. I grew up in the 70's rise of FM in Miami,
but I listened to Y-100 for the most part, before getting into radio in '79.

'SHE was in a perpetual AOR war with Zeta4 for years...

I remember them, too.<br>
But I believe they were locally produced.by each station.<br>
I don't think the copyright restrictions would have let them be distributed in any way.

Are you thinking of the Buchanan & Goodman "Flying Saucer" recordings?

Remember the days when radio stations mixed pop, rock, soul, and other forms of music? Remember when a top 40 station played the best of modern music, no matter the genre?

In the late 1970s, American radio fragmented into various niches, and since then, the situation has only further fragmented.

But this didn't happen in other parts of the world.

In the United Kingdom, you can find stations that, to this day, play a mix of genres and formats across the board. Therefore, the British music scene has remained distinct and diverse - even on the BBC, you can tune in at any given time and hear, for instance, the Killers followed by Chamillionaire followed by Muse followed by the Sugababes, etc.

To explore the entire milieu of British music, we've designed a radio show. It's called "England Swings" and it airs on Saturdays at 12:00 Eastern Time. We pick the absolute best of current British music, add in some older songs by UK artists to provide a sense of history, and have a great time! The show can be found on the internet, live on Saturdays at:

www.fcac.org/webr

I'm not sure if anyone is doing anything quite like we are; the focus is British music, although we'll play occasional songs from elsewhere (even the USA) when they've become popular in the UK. The mission of the show is to bring the excitement of the British music scene to an international audience. We are 'casting on a local cable access station, and we're doing it not for any commercial reason, but simply because we love the music and are hoping to get it to a wider audience. I can't tell you the hundreds of times in years past when we've heard a great song from the UK, and thought, "Wow! That's a great song! Why isn't it getting any American airplay?"

Most Americans don't realize that some of the best pop, rock, techno, and urban music in the world is being done in the UK, and IT'S ALL MIXED TOGETHER there. Many people, when they consider British music, think that perhaps they're all still listening to the Beatles and Herman's Hermits over there. Oh, and maybe the Spice Girls. The American and British music scenes used to be more or less synonymous at times in the past, but now they're separated by a wider gulf than the Atlantic Ocean - the current state of radio (American radio in particular). This is unfortunate for American audiences - they don't know what they're missing!

Come join us and discover the best music Britain has to offer. Your amiable hosts Jim and Mike will welcome you! It's a brand-new show (we just started last Saturday!) with a lot of wonderful new music to share with you.

You can write to us at ukswings@yahoo.com. Thanks for reading!

You might be thinking of the stuff Dickie Goodman did in the 70's and
80's, perhaps? Mr. Jaws, The Energy Crisis, etc.  XM channel 7 plays
them occasionally.

These are commonly called "break-in" records by their fans; some say
"cut-in". The first example was The Flying Saucer by Buchanan & Goodman
(Luniverse 101), which made Billboard's Top Ten in August of 1956.

I have several of this type of record for sale in the original 45 RPM
vinyl discs.

These are commonly called "break-in" records by their fans; some say "cut-in". The first example was The Flying Saucer by Buchanan & Goodman (Luniverse 101), which made Billboard's Top Ten in August of 1956.

I have several of this type of record for sale in the original 45 RPM vinyl discs.

```

The vast majority of them were done by Goodman although after the success
of the flying saucer record, just about every station tried making their
own.

I've got a tape recording from 1971 with Johnny Dark on WSRF. Since
I'm non-US I thought this station was an absolut rocker. In 1977 I
drove by Ft Lauderdale and gave it a listen: "Surf 16" with an AOR
format. I lsitened a lot to WSHE and I remember at the end of a news
cast: ... that's all the news SHE's got...
While in Miami I visited WGBS 710, which also was a rock station.
Great times - with great radio.

Tuned In Radio, The New Rhythm Of The Nation is a one hour syndicated dance radio show that was on the air from Nov. 1991 - Nov. 2004. It started off as a Top 5 CHR show that was aimed at the 9 - 15 year old demographic and evolved into a Top 10 Dance Show that was aimed at the 16 - 24 age demographic. There are hundreds of interviews from independent and major artists including James Brown, Alphaville, George Clinton, Inner Circle, Big Mountain, and the late Barry White to name a few.
The first 420 shows are on cassette and the rest are on CD. For the last couple of years of the show we were charging $50.00 per show. I am still publishing the Top 10 Dance Chart each week that is emailed to over 200 people, faxed to about 50 people in the industry, posted on over 90 newsgroups and on the website.
If you would like any more information please email me at
tunedinradio@hotmail.com
or call 1-905-883-5773.

Here is a bit more on the show. Tuned In Radio, The New Rhythm Of The Nation is a one hour syndicated dance radio show that was on the air from Nov. 1991 - Nov. 2004. It started off as a Top 5 CHR show that was aimed at the 9 - 15 year old demographic and evolved into a Top 10 Dance Show that was aimed at the 16 - 24 age demographic. There are hundreds of interviews from independent and major artists including James Brown, Alphaville, George Clinton, Inner Circle, Big Mountain, Vengaboys, Alice Deejay, Spandau Ballet and the late Barry White to name a few.
The first 420 shows are on cassette and the rest are on CD. I am still publishing the Top 10 Dance Chart each week that is emailed to over 200 people, faxed to about 50 people in the industry, posted on over 90 newsgroups and on the website.
If you would like any more information about purchasing the website and all of the shows please email me at tunedinradio@hotmail.com
or call 1-905-883-5773 (Canada).

I just posted some more information on the show. If you are interested and would like to discuss the price please contact me at tunedinradio@hotmail.com or call 1-905-883-5773.
Dave
P.S. I have a couple of people that are interested in the name and not necessarily in aquiring athe shows. I would like to sell everything together.

hello all,
check out http://www.radiosherpa.com. this website provides a cool
visual electronic programming guide for terrestrial broadcast stations
in boston area. they also allow you to download a badge for posting on
ur website/blog. this badge displays the current program playing on
your favorite radio station.

cheers,
deva

```

The display on the 6 year old radio in my car was failing.
I replaced the radio with a JVC head unit that included a built in HD Radio
(IBOC) receiver.
The FM stations offering HD sound okay.
The AM station HD output is a tradeoff.
You are trading traditional AM noise for better audio frequency response
and what sounds like low sampling rates.

Steve
N2UBP

How 'bout Randi Martin? She was there late 70's, 77, 78. Knew her from Jersey.

I liked the sound of WSRF...the drums...loud...

Hello,
I am looking for some technical information regarding High side modulation of AM transmitters.  Can anyone help with a useful link or book title?

Cheers,

Rob Wilson.

Yes, I remember her. She went by the name Robin Martin on the air. She left for bigger and better things in about '79.

Cheers

Carl Turner

Interested in FM radio - FM DXing - Sporadic E - Tropo - TEP reception?

Why not join the FMLIST project!

FMLIST is a non-commercial, hobby-made database of FM radio=20
stations, currently covering Europe, Africa, the Middle East and=20
North America. FMLIST is a project of the UKW/TV-Arbeitskreis der=20
AGDX, a broadcast DXers group based in Germany.

We are extending our coverage to world-wide data and seek:
- Data sources for FM radio from all around the world
- Collaborators as country editors and news reporters from all over=20
the world
- FM DXers to make use of the data for logs, bandscans and analysis

FMLIST includes map, log and bandscan features. Data are available=20
online, as PDF files and in the RDSDX format.
Have a look at www.fmlist.org or get in touch with us at=20
fmlist@ukwtv.de .

73,
Uli Onken DK2GO (FMLIST Editor-in-chief)        G=FCnter Lorenz=20
(FMLIST Database Administrator)

Anyone know why they have these sometimes funny, but always annoying
public service announcmenets in place of usefull commercials during
their online broadcast?  It's almost as bad as those senior citizen
commercials shown during daytime tv...

Thanks :)

Neil

The "Radio Crazy" is baaaaaaakkkk! Or should we call
it the "TV Crazy" ? Hi!

I am still seeking active or inactive investors to
help me build my commercial LPTV station licensed to
serve a very rich community on a Delaware beach.

All investors would be on the board with full voting
rights if desired.

We are "on the level" and members of the local Chamber
of Commerce. We are a Delaware "C" corporation founded
July 1, 2005.

My tel. is: (478)741-1710 in Macon, GA

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

Howdy...I'm sure (?) that somebody has addressed this, but yes it IS possible IF the two signals are on the same frequency and are at equal strength AT YOUR ANTENNA...

FM by nature will "grab" and lock onto whatever signal is strongest, but the two station reception DOES happen when the above conditions are ripe...such as driving in a car...my station gets farkled in a shadow area that allows a religious bcast signal in...and the two will be demodulated together for a short distance...

I am working on a story about Dave Gorab, Dir. of Talk Programming at
Sirius and former exec at WOR in NYC.

If you have worked with the man or can offer any insights into his
philosophy, etc., please contact me at the email address above.

Thanks!

This is usually called FM Ducting, and is more likely in summer on very hot days, and temperature inversions also help out to make it possible...

Just like the shortwave bands, different freqs are affected first...I was once sitting in my car back in the early 1980's, eating my lunch in Novato Calif (Marin Co.) on a hot August day, when I was lead tech for Harris DTS, and had my scanner going listening to the local California Highway Patrol channel, and I started to hear skip on 42.08 Mhz, the local CHP "silver net" frequency, and it came in real strong for over and hour.

AND it became 2-way skip (ducting) because I could hear a dispatcher ask her units to repeat their radio traffic because they were being covered by skip from California...and much to my boss's consternation, I was late in returning to work that day beacuse this was a very good day to keep listening to my scanner...

I listened long enough to get a call sign, and I called up a gal I knew back then at the San Francisco FCC office, had her run the call sign, and it came back as the Florida Highway Patrol...

I can't remember if I made a QSL request or not...

Substitute ads and or content is *usually* because of licensing, or lack of...

Chevy (or whomever) may have only paid for their ad for a spot ONLY on broadcast radio (over the airwaves only) and not on the webcast.

Another factor is royalties paid to artists who do the commercials, who have contracts that specify fees paid to the artist depending to the distribution...broadcast or webcast...

This can also affect the music beside the commercial spots...

PSA's also make a station look good at license renewal time...

And that's a wrap...

Hello, I see some conflicts here...

If this is a LPTV, is it really a commercial venture..?  LPFM stations HAVE to be non-commercial & held by a non profit (501-c-3)...Does the same apply to LPTV..?

IF this is a "very rich community" then why are you here, instead of chasing down the rich people in the listening area to invest..?

Making all investors board members can be not only problematic, but non representational of the listenership as well.

I could really skew the politics of the board by simply giving $20.00 to 20 friends to invest, and thus they would be on the board. Large boards can be just as much a nightmare as an undersized board...

The facts are in: (smart) people are wanting to see more COMMUNITY radio stations...this means non profit with an ELECTED board of directors, and with diverse programming...

I suspect the same desire carries over to the TV viewing public...

If you want to serve a special interest (rich people who have plenty of resources) then THEY should pay the freight for a commercial TV license because it sounds to me that you want to narrowcast to a select segment of the population, instead of broadcast to all.

I'm not so quick to call this spamming, and I'm very anti spam...

No, he's probably desperate...seeing the state of the radio BIZ..

Probably make more money writing a book about making money in a top 50
radio market

;-)

And yes, I did rate Phil Kellers reply as the best I've seen in
awhile...

After all, we all know what web monkies owners usually are...

You may be surprised. The former GM of US99/Chicago spent hours a week on the AOL broadcasting boards and salted these newsgroups regularly through a variety of aliases. Of course he didn't last. Well not much more than a decade, anyway :)

And before the station was acquired by Infinity, the higher echelons participated as well.

>>Substitute ads and or content is *usually* because of licensing, or lack of...<<

Wrong.  Substitute ads on the stream are because of AFTRA fees.  Fees charged for material run on the Internet are 300% of what they are on OTA radio.

>>PSA's also make a station look good at license renewal time...<<

Wrong again.  PSA's run on the stream have no relevance to the license renewal process.  Nor, for that matter, do PSA's run OTA.

Hi all,

I'm trying to contact either Ron Kelly or Ron Hensley, both of whom worked at Cushman Electronics some years back. If anyone has contact information regarding these gentlemen I would appreciate it.

Thanks,

RoD

There was a Sherman Helmsley at Cushman Electronics in the Television department. I think he moved up.

RTI Broadcasts on the Eurobird satellite.
Free To Air owners should use the following:
12.523H 27500 2/3
Sky Digital owners should first go to ADD CHANNELS* then:
12.523H 27500 2/3 (N.B. An EPG number will follow soon)

RTI broadcasts on 1350AM to central/northern Europe
RTI broadcasts on 94.2 (Poprad) and 94.8 (Kosice) in Slovakia

The "Radio Crazy", it is baaaaaaakkkk!!!!!

For sale:

Partial ownership in new low power TV licensed to serve Rehoboth Beach, Delaware.

Active or inactive investors welcome. All investors would be on the board with full voting rights if desired.

This is a UHF channel (59) with 20,500 watts ERP.

This is an EXTREMELY wealthy community. In a 1.3 sq. mile area, they get over 2.7 million visitors a year in a city with a Winter population of about 1500.

Call (478)741-1710 anytime or email.

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

Author Topic: RADIO TALKBACK on the NET

Hi there

 we are looking for a presenter or main host (work from Home anywhere in Australia or NZ or anywhere) who is working at a station or not to host a concept that we are putting together

If you are interested please send me a talking email of about 60 second to

( typed as google groups do not show email address)
nswamfm at yahoo dot com.
There is a draft to have a look at at
http://www.radiotalkback.net/draft/index.html
Comments or ideas are most welcome from members of this group
We havent put it up on the domains of
http://www.radiotalkback.net
and
http://www.smsseek.com
yet but will sometime this week
I have to add links to all the  main world Australian and New Zealand Talkback stations
to the Page (2GB/3AW/ABC/1ZB 'Wooley Radio Live etc)
For content and item development there is a messageboard at

http://aussieseek.proboards25.com/

We will obtain a sponsor and knock it into a daily 7/24 end format where it is downloadable on the net and for use by commercial and community stations in Aus/NZ where we pay the stations to carry it.. I have the use of a satelite for the pacific
so send/end is not a problerm
In submitting to the ACMA I also think it could be a narrowcast format in a 3 Hour loop
changed daily but am out of touch with 2006 Narrowcasting and any advice or support would be appreciated
In two words
please help !!!

Keith

Hiya! I'm a broadcast engineeer who works for the gub'ment. To make a long story short, my know-nothing bureaucrat superiors are pressuring me to justify my job--these are people who wouldn't know a VTR from RTV or a camera from a canned ham, so to speak. Part of the process of educating these suits has been to submit a PM schedule. But NOW they're asking me to back up my numbers with supporting documentation, e.g., manufacturer's recommendations, common industry practice and so on. I've looked around and outside of a couple of things like overhaul schedules in Sony VTR manuals, I'm coming up empty-handed! I could really use some help. Can you point me to any specific manufacturer's recommendations for PM schedules on any common items of television and radio broadcast equipment? Would you be willing to share the PM schedule you've written for YOUR station? Any sort of outside documentation will help, since it wasn't written by me and will therefore have instant credibility with my superiors (ha!).

Thanks in advance for your help. The job you save may be... mine ;)

Dave....you need to go to radiolists.net and broadcast.net, now.

There are lists dedicated to these subjects and lots of engineers subscribed. This newsgroup is a more general interest group about broadcasting in the Bay Area. Specifically go to radio-tech@broadcast.net and broadcast@radiolists.net both provide subscription information.

You'll find that they will go for whatever you say once you learn
to go with the system, not fight it as you seem to be doing.

PM?  You gotta be joking.  Nobody does PM any more.  People just run
everything until it falls apart, then call screaming for help at four
in the morning.

Hey, at least you guys HAVE an a engineer on staff.  That is pretty rare
in radio today.

Dave....you need to go to radiolists.net and broadcast.net, now.

There are lists dedicated to these subjects and lots of engineers subscribed. This newsgroup is a more general interest group about broadcasting in the Bay Area. Specifically go to radio-tech@broadcast.net and broadcast@radiolists.net both provide subscription information.

Good luck.  I think you'll find that it's cheaper to let the equipment
run until it wears out, then replace, than to keep you around.
Nowadays stuff usually lasts long past the point where it's obsolete.

Branch FM - a Christian radio station based in Dewsbury, West Yorkshire, has
been awarded a 5-year local FM radio licence for Dewsbury by OfCom this
week.

Broadcasting on the internet for several years 24 hours a day at:

www.branchfm.co.uk the station plays a range of Christian contemporary music, plus specialist shows and ministry.

OfCom's description from their site at:
www.ofcom.org.uk/media/news/2006/03/nr_20060316

Branch FM is a Christian group which will provide programming intended to be relevant to members of its faith-based community of interest as well as members of the wider community in the town of Dewsbury.

We hope to be up and running in the next few months full-time 24 hours a day, both on FM and continuing on the internet.

David

Hello all,

I am new to the group but have a specific reason for joining. The primary reason I joined, like many of you I am sure, is to get information about short wave radio. My situation: I have the appropriate parcel of land (110) acres that is free from any legal impediments to building a short wave radio tower. The land is located in West Central Alabama, in rural Fayette County.I also have the necessary funding to build a short wave radio tower and transmitter. The site has been evaluated as a perfect location that is virtually free from any potential liability and from the perspective of reaching millions of people in Mexico and Central America.

Questions for the group:

1. What are the potential financial rewards for owning and operating a short wave radio transmitter/tower?

2. How does an owner go about establishing a revenue stream from potential purchasers of air time.

3. Who would the primary customer base be?

Comments or suggestions?

Thank you,

DrJoe (newbie)

You have the same options that the other SW broadcasters in the US have, namely questionable religion and right wing paranoids willing to buy time. I suggest checking out WWCR as an example.

> 3. Who would the primary customer base be?

Probably people who respond to either of the two formats above, but if I had to bet about programming in Spanish, I'ld bet on evangelicals targeting that market most of all.

In the Washington DC area, WTOP 1500 has been replaced by WTWP, "Washington Post Radio", on 1500.

I've listened to it a bit in the first two days. They seem to be wanting to do in-depth coverage of news stories, ala NPR. They had interviews with some local newsmakers and many interviews with Washington Post columnists/reporters.

The style so far has very little polish. Nothing at all like listening to Morning Edition or Fresh Air, for example. I had a hard time just turning on a WTWP interview in drive-time and understanding what the heck they're talking about. They talk for ten or fifteen minutes THEN I finally get the context. I contrast this with NPR's news and talk shows where tuning in and picking up the context is way easier. Of course I've been listening to those NPR shows for decades, and I do not expect WTWP to be a Xerox copy of NPR's spit and polish.

This evening they're doing a Nats game. Last night they had a typical AM radio finance guru huckster program on.

Tim.

There are none. Getting licensed is next to impossible even for a high-power broadcaster in the US. Talk to the guy from NDXE for an example of a potential disaster.

>2. How does an owner go about establishing a revenue stream from
>potential purchasers of air time.

Oh, for play-for-pay stuff? For the most part, play-for-pay sells to religious programming folks and not much else. This means you basically need connections with the programming people beforehand, and it means you need to identify your listener base for them.

>3. Who would the primary customer base be?

That's a good question. Listener base is declining precipitously even in the Caribbean and South America. I think there may still be some market for a shortwave station that repeats local paid programming from AM and FM broadcasters (a la CFRB or the late-lamented WRNO Worldwide), but for shortwave-only programming you're in trouble.

>Comments or suggestions?

If you really do want to start a shortwave broadcaster, do it offshore.
Start with a couple kilowatts and see what sort of coverage and listener
base you can build up.  The problem is that the FCC won't license small
SW stations; you have to start with a considerably-sized installation
before you can play the game, and it's hard to find yourself a market
without some serious capital behind you.

Hello everyone!

I have just put my swl frequency database online. Please have a look at
http://www.swldatabase.com

Please send any feedback through the email that is listed on the page.
Thank you very much.

When I pass a particular spot traveling east Northern Parkway on Long Island, and I have my radio tuned to 88.3 I hear Howard Stern's voice momentarily.  (I once heard Quiver's voice, too.) We know that Stern is on satellite radio now, so why would the conditions explained allow me to hear him?

Do you think that it might be someone with a Sirius receiver and a
cheap FM modulator?

Somebody's rebroadcasting it with a small FM transmitter, probably to distribute it around the house.

Somebody has a satellite radio receiver that rebroadcasts on FM, and it
is not properly set up and is leaking signal out.  This is sadly become
VERY common and has become a real interference issue for stations on the
noncomm band.

Someone in that neighborhood has a satellite radio that uses 88.3 to
transmit the audio into a regular radio.  IOW you're listening to a
(very low powered!) pirate station.

All the portable satellite receivers have built-in FM transmitters so
you can plop it in your car and use it without having to modify your car
radio.  I'm sure the power is low enough to be legal.

Actually we don't know that it's a pirate although the owner of said transmitter is likely not in compliance with part 15 which requires non-interference.  pirate, no, non-compliant, most likely if someone regularly listens to another station on that frequency.

However, a legal transmitter can be devised to be used illegally. If you
hook the rf output to an antenna, you will radiate signal.

I can't understand why a station would lay off a popular
radio talk show host! David Berner was open line; you
could call in and speak on "any topic under the sun"
(as the late CJOR Pat Burns would say)!!

Anyone wants to contact CKNW and protest the laying off
it's radio talk show hosts such as Mr. Berner contact CKNW here:

http://www.cknw.com/station/contacts.cfm

And also post comments at
http://www.pugetsoundradio.com/cgi-bin/forum/Blah.pl?

The "Radio Crazy" is loose! Hi!

For sale (again!)

Partial interest in low power TV station licensed to serve wealthy Rehoboth Beach, Delaware. This would be only the third commercial TV station in all of Delaware and the first in that (Sussex)county.

Channel 59, 20,500 watts ERP to the horizon.

Active or investors with any amount of investment welcome. We suggest $10,000 however. All investors would be on the board with full voting rights if desired. We are a Delaware "C" corporation founded July 1, 2005. The CP expires May 5, 2007.

Tel: (478)741-1710 in Macon, GA.

The "Radio Crazy" is not THAT crazy....Hi! I was Chief Engineer for a NYC AM in 2001.

73,

Meyer Gottesman, W6GIV
aka The "Radio Crazy"

Hi

For quite some time I am  thinking of starting a small FM station near
my village,
targetting the young educated and enthusiastic youth, and also the
knowledge thirsty middle aged farmers

In addition to regular dose of entertainment i want to make them
educated with the help of tech shows and
interviews that can be used by them.

I want it basically to give them the advantage of being in a
knowledgable society making them aware of the
technology and innovation happening that can be used to mark their
lives in future.

This came to my mind keeping the days I spent there like many.  knowing
nothing about the living or developements out side.

I will be glad if any one can hint me about the licences needed, and
fund generation etc.

Best,
Vasundhar

```

I was doing a little internet browsing -- and the last two major surviving live country music radio shows are (of course) the Grand Ole Opry on WSM, and the more obscure Wheeling Jamboree,  aka Jamboree USA over WWVA.

Is WWVA phasing out the Saturday night Jamboree?   Reason I ask -- looking at the live scheduled shows at the Capitol Music Hall,  other than a theatrical presentation ("Cats" on Februrary 12),  there aren't any concerts or performers listed.

But the Jamboree USA website is still up there... just no concerts listed..

????

I'll agree that FM IBOC isn't going to go away.

But my suspicion is that AM IBOC is going away.  The question is whether
it takes the whole AM band with it or not.

WSM in Nashville, the format is Country, Bluegrass and Gospel

My second favorite is WOCA here in Ocala, but then, I'm on one of their live, local talk shows quite often. :)

To my knowledge none of the major operators signed contracts to install C-QUAM.

But all of the major operators have signed binding contracts to install HD Radio. Heck most of the majors are investors in Ibquity.

Each month more AM stations are going HD. I personally have turned on 6 HD stations so far. Sounds great and really helps AM sound better.

Back then, the radio industry wasn't dominated by major operators the
way it is today.  But that's a different issue.

>Each month more AM stations are going HD. I personally have turned on 6 HD
>stations so far. Sounds great and really helps AM sound better.

It helps your AM sound better, but it makes the adjacent channel stations
sound worse.

The thing is that IBOC is fine for daytime service, but a disaster for
skywave.  And what makes AM interesting and unique is skywave.  If you
treat AM as just being a low-grade local service that is cheaper than FM,
you're missing out on the whole point and you might as well just shut down
the AM band completely before everyone goes bankrupt.  Because it's not
doing anyone any good.

TimeForceBlue wrote:

>
> Anyone have a Select-A-Tenna? Then tell me what you think of it! :-)

MW loops work fine.  There's little point to getting more than the passive one.

They match the impedance from free space to the radio loopstick and greatly increase the sensitivity of most radios.

They're all, depending on how you look at things, overpriced as to the parts that go into them (a hundred feet of wire and a variable capacitor), but you won't make one as neat yourself, and they do really work.

Odd facts :

1.  They mostly work only in the daytime.  They're able to bring the received signals (noise and signal) up higher than the internal noise of the receiver, and so let you hear out several hundred miles even at noon with an insensitive radio.

At night, the problem is too many signals already, and so bringing them up pays no dividends, just makes everything you already hear louder.

So when you get one, try it in the daytime first to see the effect.

(Terk loop is an alternative ; Radio Shack used to have one as well.)

2.  An already sensitive radio sees less improvement.  Once the propagating noise level is above the internal noise of the receiver, there's no further advantage to bringing it up more.  Insensitive radios see spectacular improvement.

3.  Claims of great directionality are made, and putting the radio and loop on a lazy susan is a nice idea that works.  The radio itself however has the same directionality.  All small antennas have the same antenna pattern.*

--
* Finely made MW loops like the big Kiwa MW loop, actually get deeper nulls, by designing to eliminate every response to electric fields.

The antenna responds to both electrical and magnetic fields, and at the null of the magnetic field antenna, you're left with a non-cancellable electric field, which fills in the null.  The insensitivity of the loop to electric fields is what determines whether you get really spectacular nulls or not from a well-made loop.

If you're just coupling in the usual way to a standard MW loop with your radio, you take what you get.  One loop isn't better than another.

What Scott Dorsey said<grin>...

Maybe more important to station operators, the receivers just aren't out there.

Two years in to AM Stereo, I could buy a radio for well under $100 - and could do so at any decent electronics store - including Radio Shack.

Today, at the similar point in the deployment of HD, a radio will cost me at least $350 for a car set (plus installation), at least $500 for a set for use at home.  *

AM stereo failed in the marketplace at $80, due to competition from FM that offered more choices and better coverage for a lower price.

Can HD succeed at $300, in the face of competition from satellite that offers more choices and better coverage for a lower price?

(how long will it take for setmakers to close the receiver price gap?
*Will* setmakers close the receiver price gap?)

The local SHOULD be stronger,  but tropo ducting can do some funny things.
A stronger station could (not likely) have a stronger signal and that
strength is (temporarily) 'ducted' to your receiver.

In certain sunspot cycle conditions,  the MuF (maximum usable frequency) can
rise -- and occasionally it does - rise above 88 mhz -- and if a stronger
station skips in,  it will override and knock your local station out of your
receiver and take it over.

During weird sunspot cycles,   it is common for a local tv channel 2 to be
kayoed by a distant station...

Just a layman's observation
Greg

The truth is, however, that we are NOT at a similar point in the deployment of HD.  The NRSC only ratified IBOC a few months ago. Second, there were many more stations doing AM stereo at that point. Whereas AM stereo only required the addition of a chip and a few extra components, IBOC receivers require alpha-numeric displays, and other items.  Since there isn't a huge demand for the receivers yet, they are making limited production runs.  Just like DVD players, which started at $1000, and dropped to $50 over the years, the price of HD will come down.

One year from now, the receiver prices will be much lower.  There will also be a lot more stations running IBOC.

I find it very interesting that people continue to compare HD to AM Stereo.  The dynamics are very different, and the industry is much different.  Funny enough, HD detractors mention price as the biggest problem.  The truth is price is the smallest problem...that will fix itself soon.  Anybody launching HD is doing so with an eye to the future, not expecting results today.

I think it's also a bad idea to tar AM IBOC and FM IBOC with the same brush.  FM IBOC actually provides better service for FM listeners and works very well.

The reason some of these comparisons are being made is because AM Stereo, like AM IBOC, was presented as a great solution to the migration of listeners from the AM band.  It turned out not to be, but it did no damage and nothing to accelerate the loss.  AM IBOC seems to do more harm than good to the AM band, if you consider AM skywave to be important.  And if you don't consider AM skywave important, then you have to always consider the AM

band as the poor stepchild of FM anyway, because skywave is the one thing
that distinguishes AM and makes it useful today.

I live nearby and I haven't heard that station, but I'm curious about it so I'll give it a try.  I listen to KCBS AM 740 for news, traffic, and weather.  Besides that I just do some cursory scanning.  In the evenings I can receive KOMO 1000 from the Seattle area.

| It helps your AM sound better, but it makes the adjacent channel stations
| sound worse.

| The thing is that IBOC is fine for daytime service, but a disaster for
| skywave.  And what makes AM interesting and unique is skywave.  If you
| treat AM as just being a low-grade local service that is cheaper than FM,
| you're missing out on the whole point and you might as well just shut
down
| the AM band completely before everyone goes bankrupt.  Because it's not
| doing anyone any good.

What a GREAT idea!  One way past due.  Of course, IBOC is designed to
prevent exactly that, although, as someone else pointed out with AM Stereo
(of all types) all it's doing is just postponing the eventual demise of AM
radio.

Funny that you mention KCBS. When I'm in an AM mood I listen to KNX 1070. I generally have little use for talk radio (although John and Ken occasionally have something entertaining to say over on KFI), and when I'm down in Greater Los Angeles, all of the other stations' traffic only covers Los Angeles County and Orange County. KNX's "extended" traffic coverage also covers the Inland Empire (Riverside and San Bernardino counties), including I-15 through southern San Bernardino County up into the Cajon Pass, the route I take to get home.

I think I'll give KCBS a try next time I'm down there. Will be interesting to listen to the difference between the two stations.

Don't know if you can get it down there. Just fifteen minutes ago (5:45-5:50 PM) I was receiving KCBS just fine in the Narrows, at the Victorville/Apple Valley border. Will be interesting to see if I can get KCBS anywhere near LA during the day. :>

I hear their ratings are falling.  In spite of the solar weather every
hour, CHU is taking a lot of their audience away with their exciting
bilingual time.

The "Radio Crazy".....it is baaaaaaaaak!!!

We are still seeking investors to help us put on what will be only the third commercial TV station in Delaware! It will be the first commercial TV station in Sussex County, DE. This is the fastest growing county in the state.

Channel 59. LPTV, 20,500 watts ERP in best direction.

Active or inactive investors with at least $1,000 each are welcome. All investors would be on the board with full voting rights if desired.

Please email or call: (478)741-1710 in Macon, GA.

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

Does anyone here have a list of radio stations and their broadcasting schedules? I used to get a magazine devoted to Broadcast Radio in Chicago, but the magazine seems to have vanished. I am also a big "John & Jeff" fan from their days on WCKG, and also a big fan of "Coast To Coast AM" and "Ed Tyll" from when he was on WLUP/AM1000 before they became another sports station. Anyone here know what ever happened to

Ed Tyll?

Steve Sobol <sjsobol@JustThe.net> had written:
|
| Funny that you mention KCBS. When I'm in an AM mood I listen to KNX 1070. I
| generally have little use for talk radio (although John and Ken occasionally
| have something entertaining to say over on KFI), and when I'm down in
| Greater Los Angeles, all of the other stations' traffic only covers Los
| Angeles County and Orange County. KNX's "extended" traffic coverage also
| covers the Inland Empire (Riverside and San Bernardino counties), including
| I-15 through southern San Bernardino County up into the Cajon Pass, the
| route I take to get home.
|
| I think I'll give KCBS a try next time I'm down there. Will be interesting
| to listen to the difference between the two stations.

KCBS is somewhat different from KNX. KCBS is usually pretty rigid
on its newswheel, much more so than KNX. In the morning, I do not
need a clock. I can tell what time it is by listening to what
KCBS is doing. On the other hand, KCBS seems to have a somewhat
more evenly paced style (story lengths plus the pace of newsreading)
than KNX. KCBS voices can be a little quirkier than KNX, i.e. there
are some reporters and anchors on KCBS who, while quite professional,
don't have a stereotypical news-announcer sound. I actually find
that rather refreshing.

Until about a year ago, KCBS could be somewhat laid-back. The
lockout, for example, was famous for the very long pause between
"KCBS" and "All-News 74". The lockout is now just "KCBS". The
bumpers were changed, too (whereas KNX hardly has any at all other
than the traffic sounder).

I think both are high-quality operations - the differences are
stylistic, but the reporting and presentation are quite
professional in either case.

Scott Dorsey <kludge@panix.com> had written:
| Chris Tarr <broadcastdoc@gmail.com> wrote:
| >
| >I find it very interesting that people continue to compare HD to AM
| >Stereo.  The dynamics are very different, and the industry is much
| >different.  Funny enough, HD detractors mention price as the biggest
| >problem.  The truth is price is the smallest problem...that will fix
| >itself soon.  Anybody launching HD is doing so with an eye to the
| >future, not expecting results today.
|
| I think it's also a bad idea to tar AM IBOC and FM IBOC with the same
| brush.  FM IBOC actually provides better service for FM listeners and
| works very well.
|
| The reason some of these comparisons are being made is because AM Stereo,
| like AM IBOC, was presented as a great solution to the migration of listeners
| from the AM band.  It turned out not to be, but it did no damage and nothing
| to accelerate the loss.  AM IBOC seems to do more harm than good to the
| AM band, if you consider AM skywave to be important.  And if you don't
| consider AM skywave important, then you have to always consider the AM

| band as the poor stepchild of FM anyway, because skywave is the one thing
| that distinguishes AM and makes it useful today.

I would say "mostly exactly" -- mostly, because the skywave seems to be less and less useful with each passing year. But IBOC has far more of an adverse impact to existing receivers and to analog listeners than AM stereo ever did (if AM stereo ever did). Thus I think the larger point holds up.

I would not discount the price factor. Alternate forms of audio media, including MP3 players, iPods, and satellite radio have a leg up. If what's offered on IBOC multicasts is more of the same old thing and the receivers are high in price, what's the bloody point?

Ilive in Griffin, Georgia and like Kaam out in Texas. They are on 770 I
think, but listen to them over the internet. If you want a short cut to
the station using windows media player, I will e-mail you the .asx file. I
am a blind person, and can't stand all those popup banners theese internet
radio broadcasters have on there streams.

How well can you get KNX that far east, during the day?

>Anyone have a Select-A-Tenna? Then tell me what you think of it! :-)

It works as well as any other tuned loop of the same size.  It's a good tool to compensate for lousy radios.

If radios were made with decent selectivity and sensitivity, you wouldn't need such a thing.  But sadly, most aren't.

I drive KNX into the Coachella Valley, good to the end of the Morongo
Valley, days. There is a skywave cancellation zone between Redlands and Palm
Springs, making night reception very fluttery.

Also heard well in Apple Valley and Victorville daytime.

In July of 1982 I was in a small town in Arizona, about 70 miles from the Phoenix transmitters nad 50 from the Flagstaff transmitters.

About 10am, the dial lit up with EVERYTHING from primarily Houston, but also Dallas.  And this lasted for four hours.  Drowned out everything else.

Was able to really get a feel for both cities that day, and the Houston signals outdid the Dallas ones on the same frequencies, those that filled in where Houston did not have anything were just as strong.

More recently a K-Love translator in Utah County was drowned out by another station from who-knows-where.  I've also seen KBYU-FM's translator which kicks in good knocked out by a skip from a WVPR affiliate, and the same went for another K-Love translator in the area by another WVPR affilate elsewhere in the state.

Hello,

I'm a former GM at an AM/FM combo and am looking for a radio station owner interested in a potential partnership in a new venture.  Your station needs to be in a top 50 market, FM, and not necessarily profitable.  This is a serious proposition.

Please e-mail me and I'll forward my contact info to you.

Thanks,
Cory

It's not really a question of "how far east" as much as it is "how far
northeast." :>

Driving up from San Diego yesterday, I tuned in right at the San Diego County/Riverside County border. Reception was a bit spotty between downtown Temecula and the county line, but other than that it was crystal clear up into the Cajon Pass. It was iffy in the pass, but there are only a couple stations (on either band) that you can hear well there. Once out of the pass I was fine, as I got off the freeway in Hesperia and headed up US 395 to pick up my kids.

Now, coming over from 395 to my house was another matter. I normally take Air Base Road out of Adelanto, to Route 66, which eventually curves and becomes State Highway 18. I live north of Highway 18 on the far side of Apple Valley. KNX reaches Adelanto and western Victorville quite well, but reception is spotty on my side of town.

Might be better on the south side of Apple Valley. Haven't checked.

## Dusty Rhodes brings oldies back

BY JOHN KIESWETTER | ENQUIRER STAFF WRITER

Longtime DJ Dusty Rhodes couldn't get a radio station to play oldies, so he and friends are leasing WBOB-AM (1160) to revive the format.

The Hamilton County auditor, who lost his oldies show when 1530 AM switched to liberal talk a year ago, has teamed with radio executive Brian Kauffmann to lease the frequency from Christian Broadcasting Systems Ltd. of Flint, Mich., which recently purchased it from Salem Broadcasting.

"We loved the music so much, we bought the station," says Rhodes, 66, who was one of the "Good Guys" on old WSAI-AM (1360) in the 1960s, and helped bring the Beatles to Cincinnati Gardens in 1964. He has done oldies shows on WKRC-AM, WLW-AM and WGRR-FM.

The station licensed to Florence will be called 1160 WDJO-AM. From 1985-90, another AM station here played oldies as WDJO-AM. Rock oldies from the 1950s and '60s replaced syndicated conservative talk hosts Bill Bennett, Laura Ingram, Michael Medved and Mike Gallagher on Saturday.

"We're aiming at the 50-plus market, which we believe is still viable. There are a ton of us, and we've got money to spend," Rhodes says. Oldies WGRR-FM does not play much music from the 1950s or early '60s.

Rhodes hints that he'll return to the airwaves, along with other personalities from the "Real Oldies" format dumped by Clear Channel for Jerry Springer and Air America talk. Local staffing will be announced Feb. 24, after two weeks of commercial-free music, he says.

Kauffmann will be general manager of the station, which will keep studios at Broadcast Plaza, 635 W. Seventh St., Queensgate, near WXIX-TV (Channel 19). Mike Gavin will be sales manager. Kauffmann's brother, a WCPO-TV (Channel 9) salesman who has hosted oldies as "Rodger Kay," also may be involved with the station.

John L. Pierce of Florence, who brokered the deal, founded the station as WFKB-AM (1180) in Florence in 1984. He also arranged the sale of sister station WTSJ-AM (1050) by Salem to Christian Broadcasting Systems. WSTJ-AM will be called WCVX-AM, and keep its Christian talk format, Pierce says.

Anyone know where I can get a transcript or audio file of Al "Jazzbo" Collins doing his jazz show? Or failing that, similar transcript/audio of a similar "hip" jazz DJ, the older the better (preferably from the 50's)?

Thanks!

```

Famous (infamous?) '60s and '70s Top-40 consultant ended his career as a sprts talk show host in his native Buffalo a few years ago.

Any idea where he is? How to contact him???

You can afford to live here and work here  in Hollywood  California . in
2006

This place in a commercial building since 1968 has a creative legacy .

The Parking space in front of ground floor control room - great if you are
unloading equiptment .

And you can do a lot of narration/vo commercials  in a booth for 3 with vid
mon and
it can feed  audio to the room you live and work in  700 sq ft   or to a
control room with two more workstations .  We have a electronic repair
station
with scopes and turntables ,vhs  and phne patch  ,1/4" r-r  and a wall
plastered with awards that really don't mean that much any more . Let's
invent some new awards ..and award them to ourselves . We'll hire some day

player that looks good in tux ! and needs to thank everyone in manhattan telephone directory .

If you only have one style then of'course your rent will be cheaper - - - somewhere else .
I am the son of a jazz musician - you'd better have a huge fake book .
I know the difference between people who own an instrument and people who play it for more than it's worth .

Good for journalism -actor voiceover - we also supply leads to Follow up on that pay money ... you know-- freelance money $$.
If don't follow up on any opportunities . I want you to leave after 6 months . That does not mean that you have to produce fulltime income at __________(fill in blank with dream ) it means you have to make an honest effort at achieving you stated goal . Failure is cool if you learn something .

You could be a vid producer or an ad person - you better be serious about tech quality .I am .

I will need a CV and some audio file and dont care so much about where you ae now but--- do care about where you want to go
and how much you want to go there .

I have some pictures that I can send you ---what do you have ??

hey all,

Since there are very few places to discuss Scott and Todd, rocky Allen, and the Future/history of WPLJ, i've started up a new board dedicated to this purpose.

http://www.twelveoclock.net/Forum  is the link, and it's toward the bottom.  The Board is also moderated :), only PG-13 and under discussions are allowed, and no political talk is allowed...only two major rules on the board :)

just trying to spread the word :)

After ESPN, Jon Chelesnik did television for The Football Network. After
the network folded, he started his own sports broadcasting agency.
Chelesnik is now a sports radio agent, apparently a fairly powerful
one.

I am looking for a sound clip.

I was listening to Mark Simone fill in for Sean Hannity on Wednesday (11/2), and he had an edited audio clip of all the times John Kerry said Sadam Hussein was a nuissance, needs to be gone, has WMD's, etc., etc.

Not to debate the politics....but does anyone know where that sound bite clip can be found?

Does anyone have it?

Can you send it to me?

rpalinoNOSPAM@mailandnews.com

Just remove the words 'NO SPAM' from the email address.

Thanks!

Longtime radio programmer Michael Spears lost his long battle with cancer two weeks ago, passing away on October 25th in Dallas, TX.

For those unaware, Michael was a three-time winner of Billboard Magazine's "Program Director of the Year" award, and his stations were recipients of "Station of the Year" on three separate occasions.  He was inducted into the Texas Radio Hall of Fame in 2004.  He had previously served as President of the Dallas Press Club.  Although those achievements just barely scratch the surface of all the things he accomplished during his illustrious career.

Those in the Dallas/Fort Worth area, and anyone who followed Top 40 radio around the country in the 1970s, are no doubt familiar with his work.  In the 1960s, he was a disc jockey on Gordon McLendon's flagship station, KLIF, The Mighty 1190, using the name Hal Martin.  From there, he worked at CKLW/Windsor-Detroit, KGB/San Diego and WYSL/Buffalo.  He returned to Dallas in 1972 to program McLendon's legendary FM, KNUS ("KayNews 99"), until leaving in 1973 to program RKO General's KFRC/San Francisco during the tail end of the Drake era. He later programmed KHJ/Los Angeles before buying a station, WPLP in Tampa/St. Petersburg, where he also programmed the station. >From Tampa, he served as programming consultant for KFJZ/Fort Worth-Dallas, and was involved with the station when it changed call letters to KEGL and became "Eagle 97." He moved back to Dallas/Fort Worth in the 1980s, where he served as Program Director for KKDA (K-104), and led the station to #1 in the Arbitron ratings, a feat that was virtually unheard of for an Urban station at that time. (Friends of Michael thought it was pretty funny when he -- a white man -- won "Black Programmer of the Year" while at K-104.) He later moved to Chicago, where he programmed WPNT, until returning to Dallas for the final time in the 1990s to program NewsRadio 1080 KRLD, where he remained for about 7 years. He left the station a few years ago and applied his efforts to various consulting endeavors, most notably when he worked with the City of Dallas in formulating a strategy for them to decide what to do with the city-owned classical station, WRR. He also worked in helping to syndicate various talk shows, including America at Night, Healthy Living Radio with Dr. Ken Cooper, Inside Sports Medicine with Dr. T. O. Souryal and others. At the time of his death, he'd been working with fellow Dallas radio legend George Gimarc on the development of a new radio format protocol (which you will no doubt hear about in the future, as it is very much still on track to be unveiled before too long -- when you hear the name SASS, you'll know Michael was involved).

On a personal note, Michael first brought me to Dallas (where I worked for the better part of 25 years) to be part of that legendary staff at KNUS in 1972 (almost all of whom are now enshrined in the Texas Radio Hall of Fame), and gave me the air name Christopher Haze. In 1980, while he was consulting KFJZ-FM, he persuaded owner Gery Swanson to hire me as Program Director, where we flipped the station's call letters to KEGL, and I remained to program The Eagle for six years. In the 1980s, he gave me my first-ever job as a station signature imaging voice, for his news/talk station, WPLP, in Tampa/St. Pete. Upon his return to Dallas at KRLD in the mid-1990s, where his predecessor had used me primarily as merely a graphic artist, Michael virtually saved my career by once again utilizing me on the programming side, where I'd spent my entire career. In 1999, he introduced me to the folks at Cumulus, which opened the door for me to run their national production facility, which eventually led me to launching my own company, Brown Media, Inc., in 2001 here in Atlanta.

I just returned yesterday from Dallas, where I spoke at the memorial service on Sunday, and also attended a wonderful "Friends of Michael" celebration that night. It was attended by over 150 industry legends, including the entire 1972 KNUS staff -- Bart McLendon, Ken Dowe, Beau Weaver, Kevin McCarthy, Jim White, Tommy Kramer, Dave Cooke, Jo ("Darcy Kane") Interrante, Nick Alexander (who orchestrated the event) and myself. Not to mention many other Dallas-area radio people, including Tyler Cox, Jerry Bobo, Bob Morrison, Jack Hines, Bob Stevens, Larry Shannon, Todd Whitthorne, Eric Chase (the KNUS one), Bob Hathaway, Roger Emrich, Mike Rogers, David Gold, Dwayne Dancer, Lynne Haze, and, as Michael used to say in many radio promos, "others too numerous to mention." Also on hand were several folks who worked with Michael at KFRC, including the legendary music director Dave ("The Duke") Sholin, Eric Chase (the KFRC one, now known as Paul Christie in Houston), Les Garland, Kevin Metheny, and others.

Both the memorial service and the celebration afterwards were nothing short of a "Who's Who" of radio for the past 4 decades.

Michael Spears' contributions to radio were enormous, and the vast number of people who showed up for the memorial service from around the country was clear evidence that he touched many lives.  But his most lasting contribution will likely be one we worked on together at KRLD (although I must say that my involvement was very much on the periphery).  He was the creator of the Amber Plan, which began as nothing more than a fax machine in the KRLD control room with all the other DFW-area radio stations' fax numbers and law enforcement agencies programmed into its memory.  Today, after years of refinement, you all know it as the national Amber Alert System.  It all started from KRLD's studios at The Ballpark in Arlington.

I am proud to have worked with Michael on so many different occasions, but most of all I am blessed to have been able to call him a dear friend, and to have benefitted from his uncanny ability to bring many different people together.  Through him, I have many more friends than I might otherwise have had.  Michael Spears will be sorely missed.

Randy Brown
aka "Christopher Haze"

Are you inquiring about streaming audio? If so
<www.live365.com> would be one of many options.

Last night while walking the dog in Tulsa, OK I was tuning my Sony Walkman SRF-49 and heard a weak station playing  Great Balls of Fire by Jerry Lee

Lewis. It was fading in and out but I persisted because I like the song. After I got home I found the station was on 102.9 using my Sony 2010 but it got swamped by more powerful nearby stations so 102.9 was not always listenable on the 2010, poor selectivity.. I was able to find the station on my GE Superradio and it came in much better. Then I tried my Yatch Boy 400, Sangean ATS 606A and Sony ICF-SW7600. The Yatch Boy was the best and the GE Super as good but its not as easy to find the exact frequency on its poor analog dial scale. The selectivity of the 7600 was so poor that I couldn't hear the station. While doing this I was waiting for the station to identify itself but it never did, however once the DJ mentioned Brookside, time and a phone number which I missed. (Brookside is a growing entertainment area in the suburbs of Tulsa), So I continued to listen while comparing all the radios concluding that the Yatch Boy was the best and the GE as good if you like analog. I never tried the Walkman but I should have and maybe I will later. After about 2 hours just before going to sleep he mentioned the phone number again and I called.

I got a Hello and nothing else so I said, "I'm listening to your radio station and would like to know the call letters"? He responded with, "Brookside" I asked if he was a pirate and he said no. He was just playing music from his house with a 1/2 watt transmitter which he said was legal. He mentioned the cross streets and I'm about 1.5 miles away but he also said he's had reports from about 4.5 miles. He claimed to be unemployed DJ and mentioned lots of stations and DJs that I didn't know. He said he did this to play music that he likes because very few stations do and I agree, commercial free is good but he only played a few pieces that I liked, the rest were just like everyone else and that's why I tune around during my walks. I asked where he got his transmitter and all he would say is that it was built from a New York mail order kit. When I asked about 102.9, he said it was the only clear freq he could find and prior to this operated at 90 something but got blown away. I asked if had many xtals and he said he was digital and had stereo. He had a ham help him set up and that had to be before 1993 as the ham, whom I knew was killed in a tornado that year.

Excuse me if I'm rambling but I wanted to find out if what this guy was doing is legal? Two, I thought I'd point out the differences in the FM capabilities of a few radios and still have a couple more to check.

73

Sorry to re-hash an old thread but in light of mis-information and more recent developments I feel like the thread has loose ends.

First here is the original thread:
http://groups.google.com/group/rec.radio.broadcasting/browse_thread/thread/
1734e379d703063f/78015daff6c12caf?
lnk=st&q=christie+banks&rnum=1&hl=en#78015daff6c12caf

Ms. Banks had every opportunity to say "No thanks" before I spent hundreds of dollars traveling to DC to meet with her. For whatever reason she chose not to, and as everyone in this group can attest that hundreds of dollars do not come easy in this business. I spoke with Ms Banks the day before my departure and she was well aware of my intention to travel to DC to meet with her. It was only after I arrived in DC and tried to schedule a meeting with Ms. Banks that she quit taking and returning my calls. Accusations that this was an "impulsive action" are total bullshit.. I expressed a sincere desire to return to my home town and continue my broadcasting career, I felt by showing some initiative and coming to DC to meet with Ms Banks, it would underscore my sincerity, but unfortunately it simply left me vulnerable to a cheap shot that I did not deserve. Thanks Christie!

There has never been anything stopping Ms Banks from posting "her side of the story" in this forum.  As I said in the original thread, I too would like to hear her side of the story. She has chosen not to do so, in my opinion because she has no legitimate excuse for her total lack of professional ethics. She knows it, and so does anyone who read my original post. Any half-baked justification on her part would just further expose her true colors, and I doubt she wants that. The opportunity was listed in FMQB as the "opportunity of a lifetime" which kind of loses its impact when you post the same "opportunity of a lifetime" every few months, as was the case here.

Last I heard Ms Banks was working for Clear Channel in Dallas and I can't think of a better place for her to be. Clear Channel doesn't even know the meaning of ethics, so I am sure Christie is fitting in just fine assuming she hasn't been replaced by a harddrive or intern working for free.

Michael Hughes and Max Dugan are running WARW now and I had the pleasure of working for these two consummate professionals in Houston. It appears as though they have removed the revolving door that Ms Banks installed and one need look no further than Arbitron to see the tangible results they have achieved. If WARW is looking for airstaff in the future, I believe that it would truly be an opportunity of a lifetime to work for 2 talented programmers with a decent set of ethics and responsible management skills I can only hope I would be on the short list based on what Dugan and Hughes know of me as their former employee rather than the red flag that might have been attached to my name in certain circles for being a whistle blower.

Mr Howell chimed in on the thread to stick up for Ms Banks, and to boast of his "middle-management position in a top-rated, independently-owned, medium market station" If you read the original thread, he even had some suck-up blow his horn for him. I won't post the brownie hounds name, I will simply refer to him as Waylon Smithers.

Let's be realistic here: Mr Howell did not get to the middle by looking out for the little guy, why would this situation be any different?

Is anyone surprised that he sided with the suits? Its almost as if he was predisposed to it.

Rich Wood said: " Every job offer I've gotten or job I've applied for has paid my transportation and hotel for the interview."

Well lucky you, I on the other hand have not always had the red carpet rolled out for me, but my determination and persistence has paid off on occasion. I've gotten job leads from going to remotes and talking to other talent, taking program directors with 5X my salary to lunch on my dime and working for low-budget small market stations neighboring sewage treatment plants. I'm not bitter about paying my dues, I'll do whatever it takes to get a good gig, and help my employer succeed. I doubt Mr Wood would so much as drive a mile out of his way to even hear about a job paying less than $100K, much less travel at his own expense just to interview for a gig. This is part of what seperates "us" from "them" and its pretty easy to see where Mr Wood is coming from... the top. Not all of us have been as fortunate as Mr Wood, and for every guy getting VIP treatment there are 100 of us little guys busting our asses to make them look good. I've been flown as far away as Sweden and put up in hotels by employers and potential employers as well, I'm not going to paint some dreary picture of my eating out of trash cans and living on the street, but I wasn't looking for a free hotel in this scenario, I was looking for my dream job in my hometown and was willing to go the extra mile to bring it closer to fruition, many would respect that kind of effort, but obviously not Mr Wood. I think his good fortune has tainted his objectivity. I was board operating an (semi) automated station on the graveyard shift for minimum wage while finishing High School when I started in this business nobody GAVE me anything. I would venture to say that Mr Wood would feel the actions I have detailed are beneath a man of his stature and thus illustrate his insensitivity to those who do the thankless grunt work to get gigs and keep things running smoothly when the bigshots are sleeping or golfing.

If you want to pay some guy six figures to discourage potential employees from going the extra mile, Mr Wood sounds like the guy for the job. On the other hand, if you want a hard worker willing to roll up his sleeves and do the things that need to be done but few want to do, get in touch with me, I'd be glad to send you a resume or meet with you to discuss how I can make a contribution.

It was probably a Ramsey Kit.  Although, the company does not recommend running the units at higher than legal limits, it is possible to operate some of their transmitters illegally with simple modifications or by using external antennas.

He was not running it legally at 1/2 watt.  The legal power for unlicensed operation on the FM band is determined by measurement of the signal strength within a few meters of the transmitter.  If he were operating legally, this translates into a few hundred feet at best and means a transmitter power of only a few milliwatts (typically in the 6-20 mw range).

I'm setting up a Internet-only streaming station for a college, working
on a conservative budget.  The programming is currently pre-recorded and
automated, so we don't have a 24-hour staff yet.  I'd like to set up
some sort of monitoring to ensure that the stream's on the air.

I could hook up a hardware silence monitor and pager, but it seems silly
to spend a few hundred bucks on that when the whole stream is being
generated, broadcast, and received in software.  All I really need is
"if avg-stream-level < -50dbFS then e-mail jay".  Heck, I could probably
code it, if I knew more about audio decoding libraries.

Has anyone seen a software package like this?

----------------

In reality, radiating even 6-20 _micro_watts would be too much for legal
operation under Part 15 FM (see my earlier response in this thread).

As an Aussie I was very sad to hear of the passing of Bob Betcher last weekend.

Bob was the intrepid radio writer for the Stuart News.  It's people like Bob who helped give  Florida's Treasure Coast a true sense of community.

Unfortunately radio writers are almost becoming a thing of the past as the "live and local" nature of radio continues to decline as the beancounters sit in their counting-houses counting out their money.

I've shared a few e-mails with Bob over the years about AM stereo.  He was a great man - and truly loved radio.

May God bless BB!

Ian

This is a post to QRZ.COM by K3VR and reads as follows:

Leo Meyerson, W0GFQ, is the latest high profile ham to come out
publicly about Glenn Baxter's license. You probably remember Leo as the
founder of WRL and Galaxy Electronics. Walter Cronkite also came out
publicly against Baxter's (ex-k1man) renewal.

In fact, Leo just sent a letter to the FCC about Baxter. You can find the letter and a discussion of Baxter's renewal here:

"Leo Meyerson is an acknowledged pioneer in the field of radio. Leo is the founder of World Radio Laboratories and Galaxy Electronics. Throughout the years Leo has been very active in public service. A life member of the Quarter Century Wireless Association, Leo served as a National Director from 1977 to 1987. In 1991 he was named the QCWA Amateur Member of the year and in 1994 he was inducted into the QCWA Hall of Fame. Leo is also a life member of the American Radio Relay League, Society of Wireless Pioneers, and International Mission Radio Association among other associations. In 1980 Leo was elected a fellow of the Radio Club of America, one of the most prestigious radio clubs in America.

Leo Meyerson is the second radio icon to denounce Glenn Baxter, ex-K1MAN. The other, famous broadcaster Walter Cronkite, has publicly stated that he has experience with Baxter's lack of ethics. Cronkite also called on the FCC to deny renewal of Baxter's amateur radio licenses."

Forget the call letters, KJAZ 99.3 licensed to Thorndale is finally on the air with a country format.  They call it Lone Star Radio.  Lone Star is one of the many slogans that have occupied 93.3.  KJAZ is only 6kw so it's a rim shot with the best signal in the north and east side of Austin.

I'm sorry to hear of Michael Spear's demise; I hadn't heard his name mentioned in a long time, when he worked as WFSO as it switched to WPLP (People Listening to People), Pinellas Park, along with Cathy West (from Buffalo) and Henry Ruiz (aka Ted Web), John Eastman (recently deceased of lung cancer) .

May 1966 Vietnam Dmz,  Perfume River Area
2300 hours" I Corps" was the location. Sound of rushing wind in a distance. It took about 5 min. to reach or area. It rattled the cans tied in the barbwire. It was at this time that me and another Marine looked up. It was black no lights 200ft. off the ground and disk shape. It was Hugh and moving no more than 10 MPH. It took about a min. for it to completely cross over. We were in a free fire zone but no one fired a round. It was also reported a the other end of our perimeter by two other Marines.

Does anyone know of any newsgroups where I can download Production
Music Beds? I'm just doing some experimenting in a home studio and
looking for some beds to play around with. I figured there must be a
group somewhere with these. Any help would be great.

Please reply to this group.

Thanks,
Ant

I will publicly state that Glenn Baxter of Maine is a
disgrace to ham radio and should have his ham ticket
revoked forthwith.

I am President of a new LPTV (Not on air yet)station
in Delaware and a ham since 1950.

Former CE for a 5 KW full-time directional AM in New
York City.

>From Mr. Baxter's behavior I seriosly believe he needs
mental help!

Hola
Tengo una consola Arrakis 12000 de 8 en perfectas condiciones. Podemos
negociar. acepto oferta consola completa.
si no me gustaria conseguir el installation manual.
Hi
I got one Arrakis 12000 8 input in good condition. we can negociate, I
accept offer for the complete console.
Or I need copy of the instalation manual
P.D.
Sorry for my english

None free that I know of, something about copyright issues I guess.  If you are just playing around and experimenting, just use commerical music CDs.  Don't do that if you plan on selling your services to a client though.

From ARNewsline #1476:

## ENFORCEMENT: WRL / GALAXY ELECTRONICS FOUNDER MEYERSON ASKS FCC NOT TO RENEW K1MAN'S LICENSE

Another well known ham has written to the FCC asking the agency not to renew the license of American Amateur Radio Association founder Glen Baxter, K1MAN. In a letter to FCC rules enforcer Riley Hollingsworth that's been posted in cyberspace, Leo I. Meyerson, W0GFQ, charges that Baxter has been distributing unsolicited commercial e-mail that uses his name to promote business interests. He goes on to say that his now public letter is intended to let the FCC and the public know that Baxter has no authorization to use his name, photo nor that of Meyerson's wife. Nor does he support any of Baxter's activities, business or otherwise.

For those of you new to the hobby, Leo Meyerson, W0GFQ, is a walking legend. He was the founder of World Radio Laboratories and Galaxy Electronics. His simple but effective Globe Chief and Globe Scout transmitters were the first station for many new hams in the 1940's, 50's and 60's. He was also among the first to bring high frequency transceivers to ham radio through his Galaxy product line.

Meyerson's letter goes on to say that he is aware that the FCC has issued a $21,000 Notice of Apparent Liability against Baxter's Amateur Radio station. He ends by asking the Commisson to not renew Baxter's license which has been set aside by the FCC.

Meyerson's letter to the FCC concerning Baxter's pending license renewal is the second such note this year. As previously reported, retired CBS Newsman Walter Cronkite, KB2GSD, wrote the FCC last June after Baxter allegedl;y refused to stop using 1996 era promotional material containing Cronkite's voice. Massachusetts Governor Mitt Romney dismissed the role of Amateur Radio operators in emergency communications during a televised "town meeting" program on WCVB's "When Disaster Strikes: Segment Two." The program featured public safety and volunteer organization officials from across Massachusetts among its audience.

Host and moderator Natalie Jacobson asked an increasingly-agitated Governor Romney questions about communications interoperability, and communication without commercial power. Romney was next asked by Jacobson, "...so does it come down to ham radio?..."

The Governor replied in a disgusted tone, "No, we don't need to deal with ham radio operators..."

Embarrassed public safety officials later tried to put in a good word for Amateur Radio. National Weather Service Warning Coordination Meteorologist Glenn Field was prepared to state the importance of Amateur Radio, when Salvation Army Colonel Fred Van Brunt was called upon. Van Brunt remarked about his organization's quest to improve its communications capabilities and how Amateur Radio has aided his organization. "The ham radio situation helps a great deal," he stated.

"I have already written and submitted a letter to the Governor's Office," wrote Eastern MA Section Emergency Coordinator Rob Macedo, KD1CY. "I have also written an email to Natalie Jacobson."

ARRL Section Manager Mike Neilsen, W1MPN, sent a section-wide email to all Eastern MA ARRL members describing the incident along with actions he and his staff were taking to mitigate the situation.

"[Romney's] attitude about us sets an unfortunate tone within the state's executive branch," wrote Neilsen. "As a former military officer, I see this as a failure in leadership. My immediate concern is our working relationship within the [Massachusetts Emergency Management Team] environment." Neilsen intended to address the Governor's comments as "an urgent matter" at a meeting on November 17 with Don Carlton from the Emergency Management Agency.

"I was very disturbed about what the Governor stated on the program," wrote Ron Wood, W1PLW, the section's Public Information Coordinator. "It does show that more work is needed by all hams in the section. It's a great idea to write letters explaining the good we do." Wood is attempting to schedule a meeting with the Governor's office so that EMA ARRL staffers might discuss the matter further.

Tom Kinahan, N1CPE wrote that Governor Romney's comment has made "a PR problem" for Kinahan in his role as MA State RACES Officer.

"I've got a roster of over 150 Amateur Radio operators that support local communities, and those of us that directly support the state government. There are at least double that in terms of people that are actually out there that I don't have formal paperwork on that support Amateur Radio emergency communications in some organized manner... The Governor has said that he 'certainly doesn't need to rely on ham radio' -- where does that leave the RACES program now?"

KQRSMS favorite themes

Some of their favorite themes include:

1. False Statements about Immigrants, Minorities & Religions
2. Ridiculing "Garbage Cultures" (defn. *Other* Cultures)

3. The show's stereotyping of Blacks, Hmongs, Arabs, Muslims & Somalis
4. Other such gems on political, social and foriegn affairs

The purpose here is to educate decent people of all backgrounds about the prejudicial lies presented as facts on the KQ morning show. Hopefully, This blog will serve as a small counterweight to the massive KQ propaganda machine. This blog is meant to give voice to the subjects of KQRSMS' ridicule and diatribes. Hopefully, we can make some amusing observations of our own about the cast of KQ "experts"...

Professor Barnard identifies America's "Garbage" Cultures

Theme: Misinformation

Pseudo-Intellect Tom Barnard aka "Catman" is the host and resident expert on just about every problem facing America's multi-cultural society. Tom's credentials include admitted drug use, dropping out of high school, voice-overs, and receiving welfare (a very sensitive subject matter on kq). Barnard makes a good living out of broadcasting the tired old themes of bashing blacks, Hmong, Somalis, and Arabs etc. Tom is just another angry radio personality with no credentials and/or qualifications.

Let's take his ignorant comment of referring to the practices of non-Caucasian immigrants as "Garbage Cultures". In particular, the head-priest of KQ is not impressed with Muslims, Arabs, Africans & Asians. Barnard might want to rethink his conclusions. He really should re-evaluate his "in-depth" research of other cultures by getting a high school diploma followed by reading a book. Throughout history, Europe along with the rest of the world has contributed to great civilizations. The contribution of Muslims/Arabs to western civilization during the European "dark" ages were critical in triggering the rennaissance. The "garbage" region of Africa can proudly claim one the world's first superpowers in ancient Egypt. The illustrious history of China and Persia can only be dismissed by an ignoranamus like Tom Barnard. European culture has no doubt made tremendous contributions to the world but Barnyard can't dismiss the contributions of others as garbage.

Conclusion: Tom Barnard is an ignoramus.

Phillip "Philly Dawg" Wise

Subject Phillip "Philly Dawg" Wise

Date : Oct 2005

Theme : Exploitation

Perhaps nothing is more pathetic than the exploitation of ex-nfl player Phillip Wise. He is the token black guy on the show. His presence gives the show the cover of diversity and legitimacy. How can Catman Barnard be racist? He has a black friend! The way Terri makes Tom Barnyard seem intelligent, Phillip's purpose on the show is to give the illusion the of tolerance and diversity on the toxic morning show. Does Phillip know that he is being exploited? He is mocked and belittled for his comments ridiculed as unintelligent and irrelevant. In the two hours he is allotted, Phillip makes an attempt to defend African Americans to no avail. He probably hates his job and is a poster child for the consequences of professional athletes not saving for retirement

One of these days, the docile Phillip is going to insert his foot in Barnard's mammoth buttocks...

Good News for San Diego

Subject : San Diego

Date : Nov 2005

Theme : Xenophobia

Tom Barnard does not want to live in San Diego because there are too many Mexicans living there. I don't think the city of San Diego really cares that Barnard and his football field sized buttocks will not be visiting San Diego any time soon...

posted by kqmonitor @ 8:04 PM 0 comments
Don't pick on the Hockey Players...

Subject : The ultimate hypocrisy

Date : 8-NOV-05

Theme : Racism, Hypocrisy

In an act of blatant, double-standard prejudice, KQ front-man, Fartman Barnard and the rest of the gang have been tearing up the Minnesota Vikings for the boat scandal. They have preached social and moral responsibity required of the players. They have used the scandal as an example proving their race-baiting theories of African-American's degenerate behavior. They have had selective amnesia about their own degenerate subject matter that has been aired for the last decade.

Now, Barnyard is UPSET about news coverage of Minnesota Gophers Hockey players underage drinking. This is not a big deal he says and he is upset that the news stations are harassing the kids... Everyone does this!

Notice the demographic difference between the Minnesota Vikings vs. Minnesota Gophers Hockey?
No doubt, coincidental.

The Retard Trane Speaketh

Subject: The Retard Trane Speaketh

KQ Theme: Ignorance

Date: 11/4/2005

Terri says do they have a holiday every month? Dear Terri the Retard, Muslims go by the lunar calendar which means Ramadan will fall on a different month each year.

Terri Trane says Morroco is a dump.

Dear Terri, Morrocco is one of the most beautiful places on the earth. Their unique cuisine is like no other in the world. Change the channel from monster trucks special and watch channels like Fine Living, Travel Channel or FoodTV to learn more about Morrocco's culture/country. Tourists from around the globe visit this country all the time.

Ignorant comments on french riots.

Subject: French Riots

KQ Theme: Ignorance

Date: 11/4/2005

Fartnard was discussing French immigrants complaining about not having jobs. why did they go there? demanded Farnard. Why don't they go back to "dumpville"? A history lesson for the retards at KQ: The descendants of immigrants are french from french colonies such as Algeria, Morrocco and Senegal. These are third generation French citizens with no jobs due to their race. These are people who were colonized by Imperial Europe and were supposedly french citizens.

Even a listener who called in admitted that there is overt racism in France.. KQ was not interested in those details and the caller was summarily dispatched. What many supposedly "native" citizens like Tom Barnard don't understand is that the immigrants are granted visas for MANY self-serving reasons!

1. To pay for retirement

2. To meet demand for menial jobs

3. To meet demand for high-tech professional jobs

4. To sustain or boost economic growth

5. To introduce more consumers to the market

The KQ gang usually is very hateful of the french but in this case, they really liked how the French are dealing with their multi-cultural society. Another words, the degenerates at KQ are glad France does not have a civil rights equivalent nor any laws to enforce it....

The diehard KQRS Morning Show listener

The average KQ Listener enjoys Steve Miller Band, over and over and over again. Their mode of transportation is usually a full-size truck with a ladder attached to it. They are positively identified by the Calvin Hobbes sticker urinating on an auto manufacturer logo. They will sometimes decorate their truck with a prosthetic testicle hanging from the towing ball. The drivers of the truck are unjustifiably arrogant and self-proclaimed cultured people. These guys proudly wear KQRS shirts that declare "I have to poop". (I wish I was making this up). Along with ripped jeans, deer-hunting orange camaflouge jackets, polaris snowmobile jackets and Motley Crue t-shirts, their wardrobe boasts a shirt that informs the reader with the following words of wisdom: "Immigrants Learn to speak 'American' or get out". Do these guys really see that many immigrants at their workplaces such as the snowmobile repair shop, muffler and brake shops etc.? These guys can barely formulate a sentence, let alone lecture others on the English language. They're mastery of English equates to knowledge of 50 slang synonyms for genitals, races, countries or cultures. For example, The French are "surrender monkeys" and apparently Arabs are towel-heads (They don't wear turbans - The Sikhs and Afghans do). These guys demand assimilation from the immigrants living in this country. Thankfully, the state''s immigrants have resisted plastic testicles and t-shirts advertising their digestive issues.

Any mention of genetalia and these guys get all giddy with KQRSMS' brand of humor pioneered by Howard Stern. They get excited about any nasty middle-aged woman with large breasts. They love the mentally challenged co-host Terri Trane. The woman looks like the Minnesota Viking's mascot Ragnar but the way these guys drool over her you would think she is some kind of supermodel. Some of them can even read and write. The following piece of literature will give you an idea of the culture and wisdom of the average KQ Listener that is upheld with such honor by Tom Barnard. It will also explain why they work at a Midas and not IBM...

The average KQ listener is an embarassment to the progressive, modern, decent and educated Minnesotan. Here is a KQ listener writing into their favorite show after a long day of changing oil, drinking old milwaukee, spitting kodiak and finishing the night off by masterbating to some porno starring nasty skanks and sheep.
http://www.farmgirls.com/d1/ or one of bryce's favorite -backdoor stacy #16-.

Please read letters below from the kqrs website and make your own judgement.

A letter from a listener:

June 13, 2005 - Muslim Bumper Stickers
My other car is a bomb
This vehicle makes wide right turns into buildings
Keep honking, I'm Visualize World Jihad
My other car is in the abdomens of 50 Israeli civilians
I blew up 500 friendly Iraqis and all I got was this lousy bumper sticker.
0 to KABOOM in .2 seconds.
My 12-year-old can blow up your honor student
In case of Jihad this car will be exploded
What part of ULLULULULULULULU did you not understand?

ANOTHER LETTER

I don't know whet the hell they did in their country but this isn't the fricking jungles of Africa and we sure as hell don't turn our houses into butcher shops.

Shut down the God Damn borders or start to assimilate!

ANOTHER LETTER

Happy Belated Halloween Guys,

Here is my office Halloween costume this year, I searched for the "I have to Poop" t-shirt, but could not find it for my costume. It would have made such a bigger impact.

So to introduce my picture, I am a piece of undigested corn. Hope you get as big a laugh as everyone in my office did.

You guys rock,

Michael

KQ savages giggle at Duante Culpepper's Injury

Tom Barnard HATES both Dennis Green (black) and Duante Culpepper (black). He calls Denny the worst coach in the history of sports which is a much kinder label than "fat bastard". However, The fact is Denny was not the worst coach in VIKING history let alone sports history. The worst coach in Viking history was Les Steckel (white) going 3-13 in

1984. Don't think for a minute that this KQRSMS poison is anything other than racism disguised as "sports commentary". In the past, Tom has taken his idol Rush Limbaugh's line that NFC Conference Championship regular Donovan McNabb is forced-fed to the audience because he is black. Yup, it has nothing to do with his stats, wins, playoffs, performance and all that other unimportant stuff.... He also has an irrational dislike of Michael Vick (black). Apparently, all three quarterbacks lack intelligence. Stereotype sound familiar???

Dennis Green, although not perfect, brought the Vikings to two NFC Conference Championships. He has as many superbowl wins as Tom Barnard's hero Bud Grant (white). Jerry Burns (white) also didn't fare any better than Denny and had one less NFC Conference Championshiop game than Denny. Even Mike Tice is blamed on Denny Green "legacy". (Three years removed from the franchise). The draft of McKinnie was blamed on Dennis Green. Denny wasn't even part of the organization at that time. He was drafted two rounds late by Tice. But hey, who cares about FACTS? I don't want to rip on these other coaches. They were all decent coaches with the exception of Les Steckel. However, I do want to make a comparative analysis to expose Barnard's racist bias.

The KQ Savages giggled and enjoyed the fact that quarterback Duante Culpepper recieved a "career-ending" injury. Tom Barnard and Bryce are the most repulsive humans on this planet. Duante is devastated with an MCL, ACL, PCL injury. His knee is shredded and these dreaded scumbags are loving every minute of it. They are literally celebrating his injury. I wonder how Tom Barnard's fat ass would feel if he tripped and tore his knee on his way to the fridge while foraging for a midnight snack.... How would he like it if people enjoyed this misfortune?

On air, the scumbags joked "Now that Duante doesn't have a leg, will Paul McCartney call for a date?" This passes as humor for these animals. Even the most die hard fans of the opposing team cheer an injured player off the field!

By the way, There was an immediate disclaimer about previous savior Brad Johnson (white) not being able to win because the team sucks! How come Duante did not recieve this preferential treatment? Brad Johnson is a classy guy and I don't know why he is mixed up with this toxic radio show. Brad is an honorable persona and I hope he distances himself from fatlard now that he is the starter. I hope Duante recovers fully and comes back to win a superbowl just so he can spit on KQRSMS. Even If Duante does not recover from his injury as KQRSMS wishes, he can be content with the fact that he has more $$$ than Barnard can ever imagine. Barnard will have to do cheesy voice-overs for the next 100 years just to make enough money to buy those diamond earings!

Best of Luck to Duante, the Vikings, Mike Tice and Brad Johnson the rest of the way.

- An all-weather fan

Hip Hop is Evil. Death Metal... not so much

Theme: Racism, Hypocrisy

Tom declares ALL rappers are Gangsters. According to Tom, Hip Hop culture is the worst thing to happen to America. I certainly admit that some but not ALL of Rap glorifies thug culture, pimping and other undesirable elements. However, for Barnyard this is simply another excuse to bash African Americans. If Barnard was genuinely concerned about the well-being of blacks, we would hear something against Death Metal. We would hear somethign about the drug culture of the classic rock in the 60's and 70's that is played a THOUSAND times on Barnard's station. The subject matter of death metal is just as bad as hip hop if not worse. (It can't get worse than glorifying death right?) We never hear about Death Metal or the violence in Heavy Metal such as Metallica's "Kill 'em All". If Tom Barnyard is not racist, why the double standard? I think the prejudicial treatment of these two genres and the general demographic makeup of their respective creators is conveniently coincidental.

Disclaimer: Metallica is awesome. Their example was used for explanatory purposes.

Tom Barnard's "superior" culture...

Tom Barnyard portrays himself as this CLASSY, cultured european gentleman with discriminating taste. Here is some of Tom's culture:

I'm not a regular listener, but from what I can make out, Barnard's program is a popular local version of the sort of "outrageous" morning radio Howard Stern pioneered back in the '80's. Barnard won a much-publicized ratings battle with Stern some time back. The format, tone and content of Barnard's program seem to owe a lot to Stern's "good taste".

According to Barnard, Bachmann had called in the day before her appearance trying to get on the show, but had missed him. So, on Thursday, May 12, Barnard asked her to call in again. Prior to Bachmann's guest appearance, Barnard went into a funny radio "bit: ---the sort of material typically associated with this kind of program. This bit was about "first date" tips from Maxim Magazine: "In a woman's mind the main purpose of a first date with you is to figure out why you are not coitus-worthy." Barnard added: "And that's kind of weak because you may like her or may wish to fornicate with her..." This was punctuated by playing a sound byte of a woman who said: "Tread lightly, who lives in hope of p***y."

Barnard and his crew and callers filled the airwaves with jokes about men and women getting rid of the clap and trading crabs ("I'll give you two blind ones for one with no teeth"). Then they took a call from a guy who told us all about "a foot-long bloater" in the toilet during a first date. Shortly after another hilarious "I'm Rick James, "b***h sound byte, Barnard was told that Sen. Bachmann was on the line. Calling from a traffic jam, she was on hold and waiting to join the fun. I don't know if any of you have ever called in to talk radio. When you're on hold, waiting to speak, you hear the show as it is being broadcast ---it's relayed though your phone as well as the radio. So, while Bachmann was on hold, it is likely that she was enjoying the rest of the sexy first date routine and another outrageous sound byte ("I think what I'm most known for is my "wiener").

Conclusion: I think I would rather hang out with some Minnesotans, Somalis and Hmongs than Tom Barnard. He can continue to provide "classy", "cultured" training to his listeners.

Catman Barnard calls OTHERS UGLY!

Theme: Hypocrisy

Tom is constantly calling people "homely", disgusting, ugly, nasty and of all things FAT! Has anybody seen this guy?
Take a look at Tom and draw your own conclusion about Mr. GQ:
Sexy Tom Barnard of KQRS
Fat Fruitcake
Tuxedo

How can a guy who looks like he was the inspiration for the character "fat bastard" from Austin Powers make comments about the way other people look!!!!

I think his qualifications to call people hideous are the same as his ability to discuss matters of state, social issues, foreign affairs etc.

For god sake, this guys' buttocks are the size of two football fields.

Conclusion: Tom is NOT looking good. Being hateful is not good for aging well.

Muslim Countries and organization are not denouncing terrorism... according to kqrs

Theme: Misinformation with a touch of Xenophobia

Leading Muslim scholars across the world are condemning those who use their religion to commit acts of terror and violence, says the US State Department. The department's spokesman Sean McCormack made this observation while commenting on a fatwa issued here on Thursday that condemned extremist attacks on innocent people as un-Islamic.

Eighteen leading jurists, who issued the fatwa, and representatives of more than 120 Muslim groups representing all sects and schools of thoughts, also said that Muslims in general abhorred the behaviour of people like Osama bin Laden, Zarqawi and others belonging to terrorist groups.

Mr McCormack recalled that King Abdullah of Jordan recently hosted a meeting of Sunni and Shia clerics in Amman, who declared that those who used the Islamic faith as a justification for acts of terror did not represent Islam and Muslims.

The fatwa, issued in Washington, 'is a noteworthy effort and development,' he said but made it clear that it was 'a private effort' and had nothing to do with any government. Meanwhile, at mosques across the US prayer leaders read out the fatwa in their Friday sermons. They said violence against innocent people was forbidden and it was the duty of Muslim leaders to dissuade, speak out against such events.

Senator John Marty letter about KQRS

KQRS Remembers Its Rights, But Ignores Its Responsibilities
http://www.apple-pie.org/ttp/default.asp?articleid=2

Unfortunately, several days after the shock of such brutality fades, we return to our casual acceptance of racist rhetoric. Take the recent controversy over the KQRS "Morning Show". The June 9th broadcast, where the show's hosts reacted to the tragic murder of a newborn with derisive sneering at the Hmong community and culture, did not offend every Minnesotan. It probably did not even offend every Hmong Minnesotan. But it certainly did not promote understanding and respect. Host Tom Barnard was fostering simplistic stereotypes and racial resentment.

As the KQRS controversy grows, many Minnesotans have expressed their disgust at the station's irresponsible behavior, and its stubborn refusal to apologize. A growing number of corporate sponsors have chosen to pull advertising from the station.

The Morning Show hosts delude themselves into thinking that building racial resentment is ok, as long as they offend others too. Tom Barnard's hate-filled and offensive remarks about Carl Pohlad during the stadium debate last year were equally unacceptable, not a justification for his verbal assaults on people from other cultures.

Like Earl Butz, Tom Barnard has a constitutional right to use crude racist humor. Unfortunately, unlike President Ford, who held Butz accountable, KQRS management has been unwilling to provide even a simple apology. They seem pleased that Barnard is attacking those individuals and businesses who dare to stand up to his hateful rhetoric. They brag that the "Morning Show" ratings are up.

Tom Barnard, his co-hosts, and KQRS management certainly know their rights. It would be a welcome change if they would learn their responsibilities too. They could actually apologize. They could help make our community more welcoming to people of every race and ethnic background. And that would be within their constitutional rights too.

Overweight Tandem Team of Tom and Louie Demand an authoritarian police state

http://www.startribune.com/stories/389/5651814.html

Tom proposes arrests of gangbangers (read blacks & latinos) and other youth (read blacks & latinos) from Minneapolis downtown so that he can feel comfortable and pig out at a local restaurant. Even if the youth or supposed gangbangers (read blacks & latinos) are not committing any crime! Sorry there Tom Goebbels, The year is 2005, The city is Minneapolis.... Not Berlin in 1936. Fortunately, downtown is policed by the Minneapolis Police Department and not the Gestapo.

Disclaimer: Most decent Minnesotans find Barnyard's commentary revolting.

Nobody helped America during Hurricane Katrina

KQRS MS Theme: Misinformation

Terri is Tom Barnard's sidekick with severe learning disabilities. Unfortunately for women, Terri is the sole voice of the female perspective on the KQ morning show. Terri is terribly inadequate at her rather simple job. She likes to shorten words like "Delicious" to "Delish" and "Ugly" to "Ug" in a Fargoesque monotone. She has a great deal of difficulty operating complex new technologies such as "The Telephone". Her strategic value to the show seems to be making Tom Barnard look like a genius. Imagine an overweight Nick Lachey and Jessica Simpson minus the good looks. The KQ listeners are fond of Terri's middle-aged "rack". The listeners excitedly remind her she has breasts much to Miss Trane's delight. Recently, Terri quickly jumped to conclusion and complained about the lack of global assistance for the Katrina disaster. She implied America helps the world but nobody reciprocates.

Let's quickly dismiss this utterly false allegation. All those "bad" foreign countries that sent help:

http://washingtontimes.com/national/20050922-111323-8400r.htm

More than 143 countries and international organizations have pledged in excess of $800 million in cash assistance to the U.S. government for victims of Hurricane Katrina, and hundreds of millions more have been promised to charitable groups offering disaster relief, according to the State Department. Apparently, even the people most despised by KQMS got into the act:

The largest donation, to date, is from oil-rich Kuwait, which has provided $100 million in cash and has offered $400 million worth of oil. The entire package has been accepted, Mr. Thomas said. Two other Persian Gulf nations -- Qatar and the United Arab Emirates -- each have donated $100 million. Saudi Arabia has promised nearly $5.3 million in funds from Saudi Refining Inc., a Houston-based subsidiary of Saudi Aramco, and from the Arab Gulf Programme for United Nations Development Organizations. Its contribution was relatively modest compared with other wealthy nations in the Gulf region and with the offers of impoverished nations, such as Bangladesh, which offered $1 million.
The people of the United States are deeply grateful for the generous assistance provided by Pakistan for the victims of hurricane Katrina, says a press release issued here by US embassy. Pakistan has donated $1 million to the American Red Cross as a gesture of solidarity and sympathy by the government and the people of Pakistan to the government and people of the United States, who have been affected by this massive natural disaster. The Government of Pakistan also plans to send a consignment of goods with a value of $500,000 to support the relief work in the areas affected by the hurricane. "On behalf of the people of the United States, President George W. Bush and Secretary of State Condoleezza Rice, the US Mission in Pakistan takes this opportunity to express its heart-felt appreciation for this gracious assistance."Such an outpouring of generosity provides both material and moral support, which mean a great deal to the victims of this terrible natural disaster and to all Americans," the press release said.

Morning show's perverse fantasy vs. Viking's perverse reality

Bryce is a deeply disturbed pervert with a massive library of porn videos. His funciton in the KQ group is to make grade-school noises upon hearing words such as butt, ask, but, ho, horn, honk etc. Bryce likes to talk about porn websites such as assparade.com and "tubs of cocoa butter". Some of the things that excite Bryce are pregnant women, women lactating and pretty much anything to do with genitalia. In fact, the KQ Morning show is obsessed with sex, sexual toys, sex jokes, sexual noises, 'classic' babes, strippers, prostitution, porn stars and deviant sexual behavior in general. It is a vital component of their show on a daily basis for the last 15+ years. Nothing wrong with that I suppose if you are immature enough to enjoy computer generated sound effects of animals having sex.

However, On one autumn day, KQ took a sudden moral turn. They suddenly became very conscious and conservative about the moral fabric of our society. Why the sudden change of heart you ask? The Vikings Boat Scandal. Basically, several black athetes belonging to the Minnesota Vikings organization had a scandalous sex party on Lake Minnetonka. This was the kind of party that Bryce could only fantasize about on the comfort of his living room sofa with the aid of his favorite lubricants. Overnight, The KQ gang was distraught over the sexual orgy. In reality, they were extremely happy to see Black athletes getting in trouble to "prove" KQRSMS stereotypes of ALL African Americans. They will milk this event for years.

KQRSMS main argument is: It just wasn't right that waiters as young as 18 years old on the boat did not deserve to be exposed to people having sex in a pubic setting. Fair enough. How many actual underaged kids can just as easily accidentally tune into 92.5 and hear something vulgar or racist within 2 minutes every day? Vikings behavior is wrong but given KQRS MS history,They should think twice before broadcasting the self-righteous hypocrisy.

The behavior of people such as Onterrio Smith and Bryant McKinnie is inexcusable. They provide the perfect ammunition for the fascist KQ host to perpetuate stereotypes of entire minorities in America. These high-profile athletes should not be role models but they do have to realize that they are involuntary ambassadors to their ethnic background. Their mistakes will be used by vultures like Tom Barnard unless they do that kind of stuff on air like... Bryce.

Here is a beautiful picture of Bryce with some skank:
http://images.radcity.net/5162/1096236.jpg

Is this barnard's proposed civilized culture that Hmongs, Somalis and Arabs and Blacks should follow?

Typical politico or either party.

Hasn't a clue how the states com systems works, get frustrated by the hard
questions, and lashes out when he should has kept quite. Sadly he will in all
probability not suffer for his stupidity.

He ought to be ran out of office on a rail.

This attitude is why I no longer participate in ARES, SkyWarn or any other
activity that has ANY government connection.

PICON be damned.

I have spent enough nights looking for tornados, enough weekends trying to
"interface" with various government agencies to deliver messages during floods,
and enough cold days running MDs and nurses around when the snow/ice shuts
the town down.

Terry

Think about it:  State:  Massachusettes; Politician: Mitt Romney. Doesn't that say it all?  This isn't the first time his head (or lard-ass Ted Kennedy's head for that matter) has been impacted up his ass!  Why do the people in this state keep electing these bottom feeders?

FINALLY!!

THE TRUTH!

The public has known for a long time how useless ham radio is, not to mention the low life types who becomes hams. Think I'll have to write a few letters myself. most of the spectrum 50 mhz and above should be turned over to commerical interests.

GOOD FOR YOU, GOVERNOR!!

Hello All:

I wonder what pissed off the Governor on Amateur Radio?

quote:
Think about it:  State:  Massachusetts; Politician: Mitt Romney.
Doesn't that say it all?
end quote.

Mitt Romney is a Republican. IIRC, he moved to Massachusetts from Utah
around the time of the last Winter Olympics, didn't he? MA has a habit
of electing Republican governors. Sounds unlikely, but you can look it
up.

One might suggest it's an encouraging sign that Ms. Jacobsen knew about
the role amateur radio can play in such things...

It must be genetic...he is the son of former Michigan Governor George
Romney, who gained national notoriety when he said he was "brainwashed"
about the Viet Nam war.

My immediate concern is our working relationship within the [Massachusetts Emergency Management Team] environment." Neilsen intended to address the Governor's comments as "an urgent matter" at a meeting on November 17 with Don Carlton from the  Emergency Management Agency.
>
> "I was very disturbed about what the Governor stated on the program," wrote Ron Wood, W1PLW, the section's Public Information Coordinator. "It does show that more work is needed by all hams in the section. It's a great idea to write letters explaining the good we do." Wood is attempting to schedule a meeting with the Governor's office so that EMA ARRL staffers might discuss the matter further.
>
> Tom Kinahan, N1CPE wrote that Governor Romney's comment has made "a PR problem" for Kinahan in his role as MA State RACES Officer.
>
> "I've got a roster of over 150 Amateur Radio operators that support local communities, and those of us that directly support the state government. There are at least double that in terms of people that are actually out there that I don't have formal paperwork on that support Amateur Radio emergency communications in some organized manner... The Governor has said that he 'certainly doesn't need to rely on ham radio' -- where does that leave the RACES program now?"

The governor was only confirming what many of us in this hobby realize:

Ham radio operators have not served any useful purpose in emergency communications for a long time.  The professionals pretty much ignore them.  At most they talk to one-another in health and welfare nets and if someone actually calls in with an emergency all hell breaks loose because everyone wants to talk personally with the ham calling in.

Hams have this vision of themselves as the emergency communicators who while huddled in a dark storm beaten shack will get through to the outside world and save the day by using a car battery and some jury-rigged cw setup.  And the hams on the outside see themselves as the unique link on the other end who will alert the authorities and direct them to the site before anyone else can because they alone have a connection with the emergency site.  It's little more than mental masturbation folks 'cause the real world doesn't work that way.

Guess again, if anyone is to held liable, it's likely to be you and the manufacturers and distributors of the FM rebroadcaster.  the satellite provider isn't violating the law, but theoretically you could be if you know that your unit is operating with too much power.

They'll try anything they can. However, the FCC isn't going to go
after the few people who are likely to listen to off color material.
They don't have deep pockets. You're the one transmitting the
offensive material, not the satellite provider.

It's much more profitable in fines to go after real radio and TV
stations. Many of the modulators for SIRIUS and XM connect directly to
the antenna inputs and don't radiate.

Bandwidth is wide as a barn.  Sensitivity is very good, but on crowded
bands it becomes very difficult to separate signals out.  Really spectacular
audio quality with AM signals, though.

The ARC-5 stuff is also kind of weird.... they are becoming valuable
collectors items these days.  Used to be you couldn't give those modules
away at hamfests.  I wouldn't consider an ARC-5 receiver rack to really
be comparable to a communications receiver, though.  But the RF performance
isn't all that bad.

You have a satellite radio receiver, which is plugged into a little FM transmitter so the signal can be picked up on your regular FM radio. This is sort of a cheesy workaround for the fact that most car radios have no external audio inputs.

Normally those FM transmitters are legal under FCC Part 15, as long as they don't radiate too much signal. But if you can pick the station up a hundred feet away on your home stereo, it's probably in violation.

Since the FCC doesn't give a damn about Part 15 enforcement any more, and a trip to your local Wal-Mart will show you dozens of products which blatantly violate the Part 15 radiation requirements, I am not all that surprised.

But the FCC could in theory come and remove the offending device from your car if somebody complains about it. And then you'd have to get a car radio with an input jack and plug the satellite receiver in there.

| > your support of the ARRL petition to void the Florida interference law
| .....

| I�ll voice my concern about the ARRL, not the law.

| I was once on a plane landing at the Miami International Airport, which
had
| to abort a landing approach. The pilot explained that there was a Haitian
| radio signal interfering with the communications frequencies used by the
| plane to get landing instructions. He was referring to a pirate in Kreyol
| that had an emission right in the aircraft band.

| All the passengers of this and other flights sere endangered by this
| prorate.

| The law may need revision, but endangerment of public safety and
| interference with licensed communications channels is not something to be
| quibbled with.

It's long been established, though, David (and as for a citation, I'll
leave it to someone else to find the case law) that the FCC and only the
FCC has the power to regulate spectrum usage, pursuant to the powers
granted the Federal government under provisions of the 10th
Amendment....you know, where the powers not so enumerated fall to the
States?  Since Federal law does assign regulatory powers to the FCC, no
state can make a law which conflicts with FCC regulations....this was
decided in the early 70s, I believe, when a local municipality attempted to
prevent the installation of an FCC-licensed transmitting facility (it may
have been cellular, at that) and the Supreme Court determined that the FCC,
having decided where this site would be located, overturns any local
restriction related to the operation of that installation.

Apparently you have a transmitter that may violate the Part 15 specs for unlicensed operation. The FCC won't prosecute you because you bought this device in good faith that it was legal. The FCC won't go after the satellite radio provider because the satellite transmission is a paid subscription service not subject to the censorship laws. There may be action against the equipment manufacturer for the offending low power transmitter.

Another thing. . . If the transmitter wasn't properly installed, it may be leaking out signal beyond what is normal.

Florida cleverly gets unlicensed radio stations on a combination of zoning, lack of permits, lack of RFI studies and other issues that do not have to do with actual spectrum assignment. They lump it all in a sort of basket of public endangerment which will probably stand up in a court, as they are essentially enforcing safety and zoning rules.

And that's all perfectly fine.  That's _not_ encroaching on the FCC's mandate.
Although the lack of RFI studies might arguably be considered so, the rest
of them are just fine.  They may wind up with pirates claiming in court
that they weren't treated equivalently to other businesses, though, and
they might manage to get off on that.

Everyday I tune in to CKNW and every day it's the same tired tirade from Canada's own Rush Limbaugh, Cucklenuts Adler.

I tune in for 2 or 3 minutes - less if I am driving as you are just too terribly boring and it's actually dangerous to operate a vehicle or heavy equipment when listening to you - one could fall asleep at any given moment.

In any event, here is why your pal Harpo will NEVER be PM...

The people of Canada are not dumb, nor do they have short memories. It wasn't that long ago that the slippery tyrant cryin' Brian Mulroney - the most hated and loathed PM in the history of Canada - was in power and running a Conservative government. Unlike you Mr. Addled, Canadians remember what a Conservative government was all about: deficits, unemployment, and Irish tunes with Ronald Reagan. What fun! Especially watching Mulroney drive the Conservatives nose first into the ground a'la Payne Stewart style. I love it!

And of course we now have the mad Neo-neo-con  Harper leading a Frankenparty that was stitched together from a bunch of Albertan nutballs that no one would elect and the shredded corpse of the post-Mulroney conservatives.

Harper would have had Canadian troops in Iraq and would be standing by as they were off-loaded in rubber bags.

Ask any Canadian if what they would rather have - a sponsorship scandal, a booming economy on a strong dollar and Canadian troops at home or a bunch of dead soldiers, a deficit and a pimp named Harper lifting Canada's skirt to allow easy entry for George W. Bush?

I'll take a corrupt government over another one like Mulroney's - and believe me, Mulroney's Conservatives and the damage they did to this country will pale in comparison to what Harper has in mind. We won;t be Canada anymore - we'll be living in Jesusland North.

By his own admission, Harper consults Mulroney on a regular basis. Ya

gotta wonder why. What sweet nothings is Cryin' Brian wheazing into
Harpo's ear these days?

Do you think Canadians want another Mulroney?

Canada has already survived one Mulroney and we know all too well what that jackass was saying and thinking and doing under his breath. We don't need another moron for PM, but you certainly deserve one.

Now, why not show some balls and some guts and read THIS email on your program?

Cheers fella.

RD
voting Liberal to cancel YOUR vote.

And as for Mulroney - I hope you die soon you rotten sonofabitch.

Hello all,

The reception of my favorite FM stations has markedly degrade recently.  I've been wondering why.  Today, I realized one of my two radio receivers was receiving a different FM station at the same frequency while the other receiver was receiving my favorite station.  Both receptions were very bad (noisy). Eventually, the second receiver switched back to my favorite station and the receptions of both receivers improved.

I'm puzzled.   First of all, is the bad reception of the original station due to the second station?  If so, is there something I can do?  such as complaining to some authority?  I thought the authority takes care of the allocation of radio frequencies so that overlapping like this will never occur.  Also, is there a table showing which station has which frequency?   I live in Honolulu, Hawaii, USA.

Cheers,
Ryo

This is the FM capture phenomenon.  Whichever station is strongest
will "capture" the receiver.

>I'm puzzled.   First of all, is the bad reception of the original

The allocation is selected so that it will seldom occur, but
atmospheric conditions change a lot from day to day.

>Also, is there
>a table showing which station has which frequency?   I live
>in Honolulu, Hawaii, USA.

Yes, there a search engine on fcc.gov somewhere.  But if you tell

me what frequency you wre listening to, I could probably make a good
guess about what was going on.  What was the weather like outside
when this happened?

It sounds like your FM band got enhanced propagation and your first receiver
was picking up a station some distance away.  FM receivers have what is
called capture effect if a signal is strong enough it will capture the
receiver despite there being other signals on the same frequency.  Since
the other signal went away most likely the enhanced propagation declined
and you got your normal signals.

that sound like intermode or interference at the level of the local
occolator
>

I was think you were complaining about a torpo duct from California
but your is one of the radio's (the receivers mind you) is sending out
abit too much sugnal at the LO sage and the other is receieving it too
well

I thought the authority takes care of the allocation of radio frequencies so that overlapping like this will never occur. Also, is there a table showing which station has which frequency? I live in Honolulu, Hawaii, USA.

http://www.fcc.gov/mb/audio/fmq.html

Were you able to identify the second station? What is the original station?

Honolulu is an unusual market in that many powerful stations transmit from low sites within the city. This means that the local stations are VERY strong - and tend to overload receivers. This can cause a station to come in on a frequency it isn't actually broadcasting on.

Of course, it's also unusual in that it's a VERY long distance to any other market! I count 27 FM stations in Honolulu. 13 of them have no other station on the same frequency anywhere in Hawaii. Four have another station but it's of less than 250 watts. Seven have another station but it's in Hilo, on the opposite side of the mountain on the Big Island. That leaves five Honolulu stations that share a frequency with a station elsewhere in Hawaii where tropospheric propagation might be possible.

Propagation to the mainland *is* possible (believe it or not!) but I doubt it could be strong enough to interfere with the powerful local Honolulu stations, especially those whose transmitters are in the city. I think receiver overload is a far more likely problem.

Thanks!  My favorite station is Hawaii Public Radio (call sign KHPR)
at 88.1 MHz.  I couldn't identify the other station.  It was so noisy
and it was gone soon after I noticed its existence.

> What was the weather like outside when this happened?

Hmm.  I guess it was a bit cloudy, a lot windy (but when is
it NOT windy in Hawaii? :-), and with some rain from time
to time.

This has just occurred to me, though it may well be a stupid
question . . . is it possible that a neighbor of mine is
(illegally?) emitting FM signals?  I remember when I was a kid,
there were FM radio transmitters.  Plugged into the audio
output of your stereo, such a transmitter sends the sound
as an FM radio signal, so that you can hear the music at the
far end of your house using a plain radio.  Such transmitters
aren't sold any longer in Japan, where I'm from.  What about
the US?

Cheers,
Ryo

Thanks, Doug.  I think that explains one observation.  Before this problem started, the reception of the station (fairly good) had even improved when I touched the antenna.  I suppose that my body acts as an extention of the antenna.  But, recently, the sound (already very noisy) becomes thunderstorm-like noise when I come near the radio! Perhaps I'll test this hypothesis by moving the radio away from the window to, say, the bathroom.  (But, the second station remains a mystery.)

Cheers,
Ryo

I don't know how close you are to your neighbors.
But iPods and other audio devices now feature FM transmitters to play on
your home or car stereo.
It could be a neighbor was setting theirs up and didn't realize it defaulted
to 88.1 at the bottom of the band.

```

I'm originally from Ohio and now live 1/2 way between Atlanta and Athens, Georgia. When they assigned frequencies, this was almost literally Deliverance territory. Athens has no FM stations, save the university's public radio station, that can reach more than a few miles outside the community. In addition, the AM band during the day is virtually silent between my home and Athens where I teach at UGA.

Can someone suggest a radio that has a very, highly sensitive antenna/receiver for BOTH AM and FM radio? (I worked at WTVN-AM in Columbus, Ohio 1981-1983 and remember the station's program director had what looked like an ordinary transistor radio, especially in size, but he was picking up AM stations all over the dial *in the daytime.*

Any suggestions? Sure, I'd like it to sound, nice, too, and I couldn't mind having it for my daily walking exercise.

I know it's out there somewhere. (I don't need SW but won't be surprised if that's and add-on I can't opt out of having.)

Dr. Bruce in Dacula, GA

P.S. Yes, I have XM radio at home, but I want to be able to pull in
weak broadcast signals anyway.

Get a passive MW loop antenna, for AM (Select-a-tenna, Terk Loop, Radio Shack had one but I think no longer does), which is just a coil and variable capacitor that matches impedance so even a dead AM radio springs to life in the daytime, if you put it next to the radio and tune it to the frequency desired.

You can easily build one but the parts, if you don't have a junk box, will run you some money too, after considering all the materials, and the construction won't be as nice.

The Sangean DT200V is a pocket-sized radio that's sensitive for its size ; later models (DT300VW) are smaller but less sensitive.

The more sensitive the radio, the less a MW loop helps, by the way.  Once you're hearing ambient propagating noise above the internal noise of the receiver, you don't gain anything by making it louder.

The Sony 7600GR with a MW loop is a good daytime arrangement, and has valuable synch detection, letting you cut out interference from one adjacent channel.  It's a little insensitive without the MW loop.

Well, there are AM stations all over the dial near Columbus in
general. :D  In addition to Columbus, you can pick up AM stations from
places like Cincinnati and Cleveland on pretty much any AM radio.

Have you tried the SuperRadio?  It's in its "III" iteration right
now...about $40-50 if you can find it.

Find some junk transistor radio - the older the better, as it's probably
larger - and use its ferrite-rod loopstick antenna in place of the one you
got. You could experiment with mutual induction also with the one yoy got.
Going through a Salvation Army resale store is a good place to look.

World Music Central have featured the Sri Lanka Broadcasting Corporation(SLBC) formerly Radio Ceylon. The station ruled the airwaves in the 1950s and 1960s in South Asia. The Sri Lanka Broadcasting Corporation is the oldest in the region.

Try any of these:
1. Any automobile radio. They work very well in the home with a 12 volt power supply capable of 1.5 amps.
2. The GE Superradio. It's no longer being produced, but you may find a used one.
3. I have a Sony Walkman, about 20 years old. Its FM performance is lackluster, but it is very sensitive on the AM band. Perhaps newer Walkmans are similar.

It would be a good strategic idea:
RCI Multilingual available on Sirius and XM in the US

Broadcasting Spanish and Arabic to the US is a good idea, as is broadcasting Arabic & Persian (on Shortwave) to all of the Americas.

Just an example of interference from this wretched IBOC, listening to Imus on WFAN 660 NYC from Central Ohio, having nulled away the local WXIC 660 in Waverly Ohio, and WMIC 660 in Sandusky MI

http://rhhardin.home.mindspring.com/imuscut.iboc.ram (25 seconds)

not a sterling moment in Imus but, at 22 seconds in, WSCR _670_ Chicago
flips on IBOC for the morning at 8:15am Eastern, and that's the end of
Imus on _660_.

(The glitch at 17 before that is switching the receiver from DSB to LSB, to get
rid of the 4 Hz wobble from WXIC being 4 Hz high in frequency; me being unaware
of what is coming down the tunnel in 5 seconds.)

Not that it's news to anybody, but just a recorded example at hand.

Hi,

Please feel free to check out GROOVE, my new online remix radio
station.   We have a 7 hour playlist of Pop, R&B and Dance mixes. On
our turntable you'll find Madonna, Mariah Carey, Whitney Houston, Cher,
Tina Turner, Elton John, George Michael, Cyndi Lauper, Culture Club,
Toni Braxton, Donna Summer . . . and a cast of thousands.

If any webmaters would like to add this site to their links page and
need graphics, please let me know.

Thanks !

I second the GE Superradio for less than $50, but with a caveat.
GO to the SuperRadio Yahoo Group and carefully review the different
reception results found on different sub models.

Others

If you can find one I've been pleased with AM and FM reception of my Sangean

ATS-803A ( 1989 vintage)

Have some money to spare ? Consider the mono table top Boston Acoustics Receptor for $150 at Best Buy.

All radios above have connections for external AM and FM antennas.

Won't happen on XM. RCI is a CBC production, and CBC is in bed with Sirius Canada.

Put up a roof antenna and use your existing receiver.  I had no problem
picking up the UGA station from Chamblee, with the Winegard FM yagi
and a (pretty crappy) Citation III tuner.  And Atlanta is intermod city,
with local RF issues that are a lot worse than what you'll be dealing with.

Money spent on the antenna will probably buy you more than on the receiver.

I live in South Florida, and my favorite AM station is ZNS3 in Freeport,
Bahamas. The signal is almost as strong as a local station, and it has a
varied format of music and talk. The music is a mixture of Bahamian and
American music.

> is a link where you can browse the FCC database for FM stations.

Thanks, Greg.  I live not far from my favorite station,
which uses 88.1 MHz.  I found from the FCC site that
  1) There is another station at the same frequency on the Island
     of Hawaii (a.k.a. the Big Island);
  2) There is another transmitter of my favorite station at 88.5 MHz
     at the opposite side of the island (Oahu);
  3) 88.5 MHz is used by another station on the Island of Kauai;
  4) 88.3 MHz or 79.9 MHz isn't used in the state of Hawaii.
So, the only broadcast station which my radio _could_ catch besides
the local 88.1 MHz station is the one on the Big Island of the
same frequency.  Correct?   If so, the cause of the noise shouldn't
be the station on the Big Island because its signal should be
far far smaller than that of the local station.  That would leave
the possibility of my neighbors emitting FM signals. . .
I live in an apartment of a building, so neighbors are very close.

Ryo

Years ago, the NY area had some damn good broadcast radio.  We had 2 classic rock stations (though they swicthed; for the most part, it was WNEW, then either K-Rock, or the original WAPP, before it sold out for urban music), some pop stations that could be relied on to play some decent songs (as long as they were popular, and when we didn't have to listen to annoying hip DJ's) and some pretty good "alternative music".

Times have changed.  Z-100 jumped onto the hip-hop bandwagon, and it looks like that's not changing back anytime soon; WAXQ (104.3) has become the new WNEW (with "2 for Tuesday" and "Get the Led out, with Carole Miller); PLJ has become the new Adult CHR station, and K-Rock seems to have gone all-talk.  Except for the weekends, there doesn't seem to be any music at all being played on K-rock, not even the graying collection of "classic rock" standards that we can get from AXQ.

What hurts the most is the loss of WLIR, 92.7, which took the "alternative route" when it was really alternative.  They sold their western LI transmitter to some Spanish network.  While I couldn't stand much of what they played on LIR, it was still a reliable source of music unspoiled by top-40 play-it-to-death programming, or at least music that was really new.  Now the only way I know of to get new music in the NYC area is on AXQ on Sunday night - "The Underground Garage" followed by "Little Steven's Underground Garage".

Or am I missing something on broadcast radio?  Suggestions warmly appreciated.

I am composing a series of articles about the CBC that I intend to publish in Wikipedia, the free online encyclopedia. (http://en.wikipedia.org)  Among the articles that I am working on are one about Canada at Five and one about its successor, The World this Hour.

I know that The World this Hour superseded C5 on November 7th of last year, but I would like to also include -- in my articles --  the exact date that Canada At Five went on the air for its very first time.  I am almost certain that it was some time between the autumn of 1984 and the end of 1985, but I am not sure of a more specific date than that.

Could someone please give me the exaxct date?

Thanks in advance, Ms. Victoria Wilcox! ;)  I will be glad to acknowledge you in my article about C5, if you like!

Talk to y'all later! :)

--

Keep smiling!  Have a nice day!

Much as I am ashamed to say it, the Haitian pirates out of Brooklyn
are probably the most interesting thing on the radio in NYC.

KHPR is occasionally subject to ducting from a station in the Big
Island whose call sign I forget.   If you go to the station and look
in the public inspection file, they did a study on some of this stuff
back in the eighties.

>> What was the weather like outside when this happened?

Tropotunnelling or ducting would be my first guess.

Yes, this does happen now and then.  A lot of folks using XM or Sirius
satellite radio here on the mainland get little FM rebroadcasting boxes.
Some of them can cause external interference if they are not properly
installed.  (Are these services even available in Hawaii?)

Next time it happens see if you can catch an ID.

I've been experimenting with AM loop antennas, these are cheap to build, and can be very sensitive.

Others have suggested the FCC database, but you might find
http://radio-locator.com/ easier to navigate.

You need to get used to it. HD Radio is just getting started and it is not going to go away.

You can cry all you want, but the decision has alrady been made.

Actually, one of the major buy-out libraries _does_ offer one disk of
free music which you can use in any material.  They were giving the
things out as a promo at the AES show a couple years back.   But for
the life of me I can't remember which library it was.

> Ham radio operators have not served any useful purpose in emergency communications for a long time.  The professionals pretty much ignore them.  At most they talk to one-another in health and welfare nets and if someone actually calls in with an emergency all hell breaks loose because everyone wants to talk personally with the ham calling in.
>
> Hams have this vision of themselves as the emergency communicators who while huddled in a dark storm beaten shack will get through to the outside world and save the day by using a car battery and some jury-rigged cw setup.  And the hams on the outside see themselves as the unique link on the other end who will alert the authorities and direct them to the site before anyone else can because they alone have a connection with the emergency site.  It's little more than mental masturbation folks 'cause the real world doesn't work that way.
>

During the first few days after Hurricane Wilma in south Florida, power was down for 98 percent of the population of Dade, Broward, and Palm Beach counties. After the power went down, regular phone service in most areas died, cell phone towers were inoperable. When a medical emergency occurred, there were only two ways to get help: Physically transport the patient to the hospital, or find a ham radio operator. In retrospect, emergency services in south Florida were caught with their pants down. Police and fire departments either had generators that refused to start because of poor maintenance, or no generators at all. Bell South relied on storage batteries in remote distribution points, that were drained before the first day was finished.

Ham operators may not have the best emergency communications abilities, but when a widespread disaster occurs, they are the first ones to get a message out.

Mitt Romney is a tool. I have friends that live out there and they say both Repubs and Dems do not like him. I think he was just in a bad mood 'cause he knows he's on the way out. ;-)

The guy is a republican - and a leading republican candidate for national
office at that.  He's not even from Massachusetts.

Cmdr Buzz Corey posted:

"The state is full of simple minded dummycrat liberals."

I live in Masachusetts, and worse still, Gov. Mitt Romney is a Republican. (Our Lt. Govenor, Kerry Healey is no mental giant either.) Both are children of the idle rich, and neither has any perception of the real world in which most American's live.

What is even more frightening to me, it appears obvious to everyone in MA that Romney is posturing himself to run for President, and Healey to run for Govenor.  Brrrrr...What a chilling thought. I'm a long-time registered Republican, and quite frankly I seriously doubt that Romney and Healey combined would be qualified to run for the local position of Dog Catcher!

With respect to Ms. Jacobsen... For many years she was married to Chet Curtis, another local news anchor, a private pilot and I believe a ham radio operator as well. So it figures that she would have reacted to Romney's ill considered remarks dismissing the important role of amateur radio in disaster communications.

Harry C.

p.s., If the above predictions become reality, I will be re-registering
as a Democrat and working my arse off to defeat both of these
candidates.

At most they talk to one-another in health and welfare nets and if someone actually calls in with an emergency all hell breaks loose because everyone wants to talk personally with the ham calling in.
>
> Hams have this vision of themselves as the emergency communicators who while huddled in a dark storm beaten shack will get through to the outside world and save the day by using a car battery and some jury-rigged cw setup.  And the hams on the outside see themselves as the unique link on the other end who will alert the authorities and direct them to the site before anyone else can because they alone have a connection with the emergency site.  It's little more than mental masturbation folks 'cause the real world doesn't work that way.

I guess you missed it the first time around. Try to pay attention.

As usual, ham radio operators help sustain wide-ranging relief efforts
By Andrea Kelly
ARIZONA DAILY STAR

When all else fails, it's ham radio to the rescue. Across Arizona, ham radio operators are helping sustain Hurricane Katrina relief efforts by helping storm-torn communities communicate with rescue workers and family across the country.

This is not a first. Ham radio operators come out of the woodwork during disasters around the world, even transmitting in Morse code if language barriers pop up, said Mike Swiader, president of the amateur Superstition Radio Club in Mesa.

Ham radio operators have contributed to emergency communication efforts since World War II, Swiader said, and were crucial in post-9/11 emergency communications, as well as during the Asian tsunami last holiday season.

Ham radios work when other communication systems are down because they're powered by solar energy, batteries or generators rather than the usual power sources.

The messages are passed from radio to radio until they get to the one they are directed to, so radios don't need to be near each other to receive signals, like regular AM/FM radio signals.

"We've been involved in passing traffic to and from the Louisiana and Mississippi area," said Tom Fagan, a leader of the Arizona ham radio operators organization. "Whatever needs to come in and go out, we're doing."

When Arizona's ham operators - there are about 16,000 of them - get messages from the hurricane area, they send them along to agencies like the American Red Cross and the Salvation Army in the Southeastern region of the country.

"We're the link," Fagan said.

Because communications within a disaster area are often jumbled, Swiader said, it's frequently easier for someone there to contact an operator in someplace like Arizona, who can then relay the message back to a recipient in the disaster area.

"Sometimes it's easier to be heard that way," he said.

More than 30 ham radio operators from Arizona have already headed toward the disaster area, hoping to assist relief efforts and give emergency workers a way to communicate with each other, as well as assisting searches for missing persons.

"They're moving in when they're allowed by American Red Cross and Salvation Army," said Ned Stearns, a Phoenix ham operator and vice director of the American Radio Relay League, the national organization for ham operators.

In fact, the ham operators plan to compile a list of people they can determine as missing, deceased, alive or unknown, based on information transmitted over the ham signals.

To find out about people in the area, visit www.satern.org and fill out the health and welfare information request for the person you are trying to find. This information will be sent through the Salvation Army emergency radio network.

# Ham radio operators are helping from afar

Sunday, September 11, 2005

By DONNA FORK
For the Times dfork@knology.net

But sometimes, even the airwaves can be shut down

They also serve who listen and wait.

Huntsville amateur radio operator Douglas Hilton and other "hams" in North Alabama are helping victims of Hurricane Katrina by relaying messages between families, officials and each other.

Lately, Hilton's been spending most of his spare time in his "ham shack" listening to calls for assistance. The systems analyst for Intergraph Corp. is one of thousands of amateur radio operators who help people during emergencies.

Hilton is unusual in the ham radio world because he wears three hats: He is an amateur operator; a member of the Alabama State Defense Force, heading the Communications Platoon for North Alabama; and he's also a military communicator authorized to use the Military Affiliate Radio System.

His connection to the military (although he is a civilian) gives him access to additional radio frequencies most amateurs can't access. He has been a ham radio operator for 42 years; his father had him build a crystal radio when he was 7 years old, and he got his ham license as a teenager. But he wasn't all that active until after the terrorist attacks of Sept. 11, 2001.

"That hit me right between the eyes," he recalled, and he began to get back into "hamming."

Now Hilton averages about 100 hours a month on the airwaves and takes countless courses and certifications. He noted that amateur radio operators are "amateurs only in that we're not paid." In return for service "the government gives us frequencies."

Hilton said the North Alabama ham community is large.

"The astronauts are all ham radio operators," he said, noting that astronaut Owen Garriott "was the first ham in space."

Hilton''s "ham shack" is not really a shack at all. It is located in a formal dining room - complete with crystal chandelier. It includes six radios and two computers.

"You don't need six, but don't tell my wife, please," Hilton said as his wife, Diane, laughed. She recently obtained her "technician class" license, which is the entry-level license for ham radio operators. The next is "general class." The highest, which Hilton has, is "amateur extra." Anyone can be an amateur radio operator, Hilton said. There is no age limit: Hilton knows a local ham who is 18 and another who is 89.

It doesn't cost much to be an operator either, he said. A beginner could purchase enough equipment to get started for about $300. Courses are free through one of the local ham radio clubs, of which there are several, including the Huntsville Amateur Radio Club (the Web address is www.harc.net).

In addition to six radios, Hilton has two computers: a laptop and a desktop. "The radios are hooked into the computer." With his setup, the Hiltons can talk to other hams as far away as Japan.

But for the past two weeks there hasn't been time to chat about matters such as which antennas they like the best. There are emergency frequencies to monitor. At the moment, a critical one is the Salvation Army's emergency frequency, Hilton said.

Hilton never knows if it will be a busy night or a quiet one. Recent solar flares have added to the uncertainty because they disrupt communications. Friday, during the late afternoon and early evening, it was unusually quiet.

"I'm a little surprised," he said Friday. "I can't believe how dead these bands are."

## Solar flare

It could be a solar flare, or could be something else. "That's the problem, you never know," he said. The waiting, the listening, "it wears you out." But it's worth it when you hear a voice and "you might be the only person who can hear this guy."

On Thursday night, when Hilton was expecting problems, reception was fine. He was able to contact two operators in Louisiana. He also heard one Mississippi ham talking to another ham "so at least one is working there."

ecause of the Hurricane Katrina disaster, there are thousands of messages piling up, waiting to be delivered by ham radio operators: What will happen when all their radios start working again?

People like Hilton will be extremely busy. There are thousands of ham radio operators in Louisiana and Mississippi. When they all get back to the airwaves, it will be quite a challenge to sort out all the messages.

But meanwhile, as they waited for the deluge of messages, on Thursday night the Huntsvillians received a call for help from New Mexico.

Maura Campbell Kingston of Clovis, N.M., was trying to reach her aunt, 76-year-old Sister Joan Campbell, a nun, of Harvey, La. Kingston called the Salvation Army, which contacted a ham radio operator, who called Hilton.

Hilton tried Thursday to reach a radio operator in Louisiana to check on Campbell, but almost all of them were off the air. Finally on Friday night Hilton got through to "KG5YK," who is Robert A. Turner of Elm Grove, La.

When Turner's message came through, hams from all over the United States could be heard, eager to talk with him.

## Helping 'ham brother'

The outpouring of sympathy could not be contained: Radio operators from Texas, Indiana and elsewhere all expressed their support for their "ham brother" in Louisiana.

"I hope this never happens again," said Turner of the Katrina disaster. "It's been a tough time. ... I'm looking for the right words." He thanked the other hams for their all their help.

"You'd do the same for us," the ham from Texas said. Others echoed his sentiments.

Turner gave Hilton information about when to call with his "health and welfare message" about Kingston's aunt. Hilton vowed to keep trying to deliver the message "for as long as it takes."

But that proved to be unnecessary.

Friday night, after calling her aunt repeatedly, Kingston finally reached her by phone. She was still at her home in Harvey.

"She was OK," Kingston said in a telephone interview Saturday. "Harvey stayed dry." But the area was without power and Campbell "was sitting in the dark with her flashlight."

Later, Kingston called Hilton to thank him. She said he told her: "I'm just doing it because I want to help."

Kingston was impressed.

"I believe that thing about Southern hospitality."

## Ham radio proves to be more than a hobby

By Jeannetta Edwards

Daily Times Leader

When Hurricane Katrina hit, telephone and cell phone communication hit an impasse because of downed lines and towers. But, amateur radio operators did not miss a beat or a transmission.

"Before and after the hurricane, this has proven to be the most reliable form of communication," said Randall O'Brien, a retired highway patrolman who has been involved with ham radio operation for 35 years.

"People thought when they got cell phones, they didn't need us anymore," said O'Brien, an advanced licensed operator, who often talks to missionaries in South and Central America.

According to Denver Baker, Clay County has more than 30 amateur radio operators, but only a small fraction are active.

"It's a wonderful hobby," said Baker, whose wife recently received her technician license.

The multi-faceted operation includes digital and satellite communication and is enjoyed by all age levels.

"This is a good hobby for seniors or for young people," said Baker.

By becoming a ham radio operator, which requires taking a test to obtain a license, people can communicate with others anywhere in the world.

"The classes for the test are free," said Baker, "and we help you with everything you need to know."

According to Baker, who has been enjoying this hobby for the last 10 years, the only investment required is the fee for the test and the purchase of equipment. A handheld transmitter cost around $100.

The self-policing group ensures that everyone adheres to the rules and regulations.

"We're called amateur radio operators, but there's nothing amateur about it," said O'Brien, who first became interested in electronic at age 13.

The group, which also belongs to the American Radio Relay League, meets monthly in West Point.

"We have a good bunch of hams in this area," said Baker. "We bring food at our meetings and have a good time."

"It's nice, especially for seniors," said Baker.

For information on getting involved in ham radio operation, call O'Brien at 494-2898 or Baker at 494-9096.

## Ham Radio Operators Offer Help

By Beth Hahn
Mountain View Telegraph

Since Hurricane Katrina hit New Orleans last week, several ears in the East Mountains and Estancia Valley have been tuned to amateur short-wave radios.

McIntosh resident Ed Brooks said local Ham radio operators are willing to relay messages from the Gulf Coast if needed.

"We guys here in the Estancia Valley are just listening," he said. "We haven't had any need for what we can offer."

Although they may not be needed yet, Brooks said local Ham radio operators are still listening in to conversations taking place in Louisiana, Mississippi and Alabama.

During the interview with Brooks, his Ham radio was tuned to a conversation involving a Coast Guard helicopter that was rescuing a family from a rooftop in New Orleans with direction from another Ham radio operator.

Brooks said similar situations have been broadcast hundreds of times during the past week.

"It's been really spotty, but what we've been (hearing) is that it was good fortune that somebody down there had Ham equipment," he said.

Daryl Clutter, an Edgewood Ham operator and member of the Salvation Army's shortwave network, said he relayed a message from Ontario to U.S. Coast Guard officials in Washington, D.C., that originated in Louisiana.

"It was just the word 'help' spelled out two times," he said.

Like Brooks, Clutter said he has stayed close to his Ham radio since Aug. 29.

"There's been so much going on," he said. "Every day, something happens."

Clutter, a former truck driver who often delivered frozen food to the Gulf Coast, said radio traffic has slowed since the hurricane devastated the region.

"You just wonder who all you know, that used to be your customers down there, that are still alive or had the good sense to get out," he said.

As amateur radio operators, Clutter said, Ham enthusiasts practice for disasters "every day."

"There's only so many cell phone frequencies," he explained. "If the phone system goes down, there's no way ... (one company) could handle all the 60,000 or 70,000 phone calls."

Mountainair resident and Ham operator Bob Scupp said the Salvation Army network alone has handled more than 128,000 messages since Aug. 29.

Brooks said Ham operators have been relaying messages from residents to volunteers or emergency personnel. Since a large number of National Guard and military personnel have arrived in the area, Brooks said the messages have changed from pleas for help to questions about well-being.

Shelters for evacuees are beginning to utilize Ham radios to communicate with other shelters to help families find missing relatives, Brooks said.

Rescues are still going on.

"There's been instances where they're still finding people, trapped in houses, trapped in buildings or running out of oxygen," said Clutter. "It's just terrible what's going on down there."

Clutter and Brooks said they will not offer assistance unless someone requests contact in the Albuquerque area.

"We don't want to tie up the frequencies," Brooks said.

Clutter and Brooks said they will continue to listen to their Ham radios for messages or relay requests until communications are restored in the Gulf Coast.

"We live and breathe this," Clutter said.

Amateur radio operators provide vital communications support
By Teresa Atkerson
MCALESTER NEWS-CAPITAL (MCALESTER, Okla.)

MCALESTER, Okla. -

With more than 10,000 requests for help in finding loved ones, the amateur radio operators in Louisiana are extremely busy.

In fact, they are so busy, they have asked people to wait with their requests unless there is an extreme emergency.

Ralph Suter, with the Pittsburg County Amateur Radio Club, said they had about a half dozen requests for assistance in locating loved ones in the area devastated by Hurricane Katrina. �The Red Cross funneled the requests for health and welfare,� he explained. Now, the national traffic system is backed up with the requests, he said, because there were so many.

There are extreme problems with communications in New Orleans at the present time. Suter explained VHF radio has to have line of sight while amateur radio operators can use lower frequencies that can bounce off or curve to get the message through. �A benefit of amateur radio is you can throw a piece of wire in a tree or up a flagpole. With 12 volts of power, you can operate on a local or even worldwide basis,� he explained.

As an example, Suter said recently an amateur radio operator in Louisiana had some kind of problem that he couldn�t get help with after the hurricane. He put out the message, it went through Washington state to Texas and then into Louisiana where the right people were found to help him.

Amateur radio operators can also communicate via Morse Code, upload through television or computer or radio to satellite, Suter said. That gives them even more advantages in communication.

Jim Russell, president of the PCARC, said amateur radio has been around as long as there has been radio. Even in World War I, amateur radio operators helped with messages in Morse Code, which is something operators today still must learn as part of their licensing process.

�We look at it as a hobby,� Suter said. �It�s a resource of individuals because they have an interest to develop the skills to operate radios in various modes.

�It�s a resource for trained communicators.�

There are forms that must be used when transmitting messages. �When it goes into the system at one point and comes out at the destination, it is exactly the same information, even with the misspelled words,� Suter said. �It�s our responsibility when handling traffic that it comes out exactly as it comes in.�

Suter said many of the operators use their radios on a daily basis while others check weekly. When it comes to disasters, there is the Amateur Radio Emergency Service. �It�s not really an organization but it is organized on a national basis for community programs.

John Wright, another PCARC member, checks with the Oklahoma Sooner Net and with the Salvation Army�s network, SATERN.

After the Oklahoma City bombing in 1995 and 9/11, Russell said amateur radio was used extensively. It is also used during and after tornadoes and other natural disasters. Now, the group can work with the Automatic Position Reporting System to help more accurately report severe weather.

The group has an annual field day, which is a combination of a exercise and a contest. �We go out and set up radios under adverse conditions to simulate disaster response,� Suter said. �In the past, we�ve started with solar power, using a battery in a car or even a portable generator.

�The last time I kept count, we were able to make contacts in 47 states, the Philippines, some in South America and Puerto Rico in a 24-hour period.�

Suter pointed out that the word �amateur� is not what people interpret it as. �People interpret it to be an unprofessional group. But while it�s made up of a lot of people for a hobby, it�s not unorganized or unprofessional when dealing with disaster. We have capabilities that public agencies just don�t have,� he said.

Members also have to be licensed. The license testing can be done in McAlester now so those wishing to be licensed don�t have to go to Dallas or Oklahoma City as in the past.

Teresa Atkerson writes for the McAlester (Okla.) News-Capital.

## Old Technology Still Needed
(Page 1 of 2)

Sept. 8, 2005

Overwhelming Charity

Joe Carcia, station manager of the American Radio Relay League in Newington, Conn. helps with the disaster relief effort for Hurricane Katrina's victims along the Gulf Coast. (AP)

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

(CBS) There is a store in London dedicated to "appropriate technology." It mostly carries products designed to be used in developing countries where there is a weak communications infrastructure.

Sadly, that�s now the case for a large swath of the United States where Hurricane Katrina and its flood waters have wiped out cell phone towers, telephone switching stations, Internet routers and other ground-based communications systems. Even wireless Internet depends on nearby transmitters and receivers on the ground.

But amateur radio is working and, according to Allen Pitts of the Amateur Radio Relay League (ARRL), "ham" radio operators from throughout the country are answering the call to provide vital communications links. Satellite phones, a much newer technology, are also coming to the rescue.

Pitts acknowledges that cell phones and other technologies "work wonderfully when everything is going right," but "they are very vulnerable when everything is going wrong."

Just as with past hurricanes, earthquakes and on September 11th, the ground-based infrastructure, in many cases failed because vital parts of the system were damaged or overwhelmed during the emergency.

In other words, when you need them most, those cell phones are of no value.

Amateur radio, says Pitts, is not vulnerable to these problems "because each of the radio operators is a complete transmit and reception center unto themselves able to continue going and continue with nothing more than an electrical source, such as a battery or a generator, a radio and piece of wire for an antenna."

Listen to audio of Larry Magid's interview with ARRL's Allen Pitts.

While base-station radios are larger and require an electrical power source, there are also portable ham radios slightly larger than a pack of cigarettes with a range of about 20 miles, according to Pitts. Pitts says that the next sized radio, about the size of a paperback book, can communicate up to about 50 miles without a repeater while larger systems, "about the size of a desktop computer" can communicate globally.

Amateur radio operators are in demand. When I checked the ARRL�s Web site there was a call from the Salvation Army for "10, two-operator Amateur Radio teams for deployment in the U.S. Gulf Coast. Operators must hold at least a General class license. Teams should be fully self sufficient in terms of food, water and lodging and plan to remain in the disaster area for from one to two weeks."

Pitts said there was a "lady in Connecticut," who was listening on her amateur radio and happened to hear that there was a woman "who was trapped for four days without food and water." She was able to relay that message, by ham radio, into an operations center that dispatched the fire department. A day later she got a call from the trapped woman�s mother, thanking her for her role in the rescue.

Ironically, this comes at a time when amateur radio is struggling for respect and, to some extent, survival. What was once a popular hobby has fallen into somewhat hard times for a variety of reasons, including the fact that the Internet, cheap long distance calling, cell phones and other technologies make the ability to use these two-way radios not quite as compelling as it once was.

Also, there is a bit of a rift between some members of the amateur radio community and some parts of the Internet industry over the use of power lines to transmit Internet signals. This technology, which could put power companies into competition with cable and phone companies for broadband service, has been criticized by some ham operators because of possible interference problems.

Despite the fact that their origins go back to the early 20th century, hams are hardly low-tech. There are now bridges between ham operators and other technologies including the Internet, cellular phone systems and Internet phones. In fact, long before the Internet became popular, ham operators were using their radio gear to transmit data along with voice and morse code.

Also coming to the rescue are satellite phones. These phones - which are much more expensive to buy and use than cell phones - rely on satellites rather than ground equipment to communicate with the phone network.

Because satellites are in space, they�re not vulnerable to conditions here on earth. Also, as long as you have a view of the sky, you�re able to communicate. Iridium, which operates "66 low-earth orbiting (LEO), cross-linked satellites and 11 in-orbit spares," says it provides "complete coverage of the earth (including oceans, airways and Polar Regions)."

I carried an Iridium phone with me when I traveled to Peru a few years ago. It worked great when I was in the clear such as on a boat in the middle of the Amazon River but, because it requires a line of site view of the sky, it had problems in dense jungle and in cities with tall buildings.

Iridium spokesperson Liz DeCastro estimates that there are currently about 10,000 of Iridium's phones being used in the region with orders for about 6,000 more. The company sells through resellers so it doesn�t have exact numbers. DeCastro says that "traffic in the region increased by 3,000 percent" since the storm hit and that the number of subscribers increased by 500 percent.

Satellite phones are a lot cheaper to use then when I went to Peru, but they still cost between $1 and $1.25 per minute to use, according to DeCastro. That�s a lot more than domestic cell use, though often cheaper than using U.S. phones when roaming overseas. The phones themselves cost between $1,000 and $1,500 she says.

In addition to handling voice calls, satellite phones can also be used for messaging or data, albeit at modem rather than broadband speed.

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

That�s why some news organizations keep manual typewriters around. You never know when that old technology may suddenly become the "appropriate technology."

NYNewsday.com
Amateur radio operators head to Gulf Coast

September 6, 2005, 1:00 AM EDT

NEWINGTON, Conn. -- Oscar Fuller only became an amateur radio operator about a year ago, but he knows how valuable his equipment can be in an emergency.

So even though he has never responded to a crisis, the American Relay Radio League member is planning to head to the hurricane-ravaged Gulf Coast and see if he can help establish an emergency communication network.

"This is a tragic set of circumstances," said Fuller, who recently retired from IBM. "If I can lend a hand, I want to."

Fuller and about 14 other members of the Newington-based amateur radio operator network have signed up to join the relief efforts for Hurricane Katrina. The amateur operators _ known as hams _ can often use their equipment to communicate in difficult circumstances.

Because the radio equipment operates on many frequencies, is self-contained and portable, it can often work when other communication networks, such as telephones, aren't working. It can never be blocked, which is why operators say it is good in disasters.

"When all else fails, ham radios work," said Betsy Doane of Shelton, who oversees the 2,500 members of the league in Connecticut.

David Patton, an official with the radio group, said as many as 750 volunteers may be needed. The Connecticut volunteers are going to help provide communication support for more than 200 American Red Cross Shelters in Mississippi, Alabama and the Florida panhandle.

"There are limited resources to an overwhelming disaster," said Allen Pitts, public relations manager for the radio league. "So there is not a ham on every corner. The hams are put where they are needed most of all, in emergency traffic or for saving lives."

Dennis Motschenbacher of Colchester was among the first volunteers to say he would go. He spent Sunday shopping for supplies and getting ready for the 18-hour, 1,100 mile drive to Montgomery, Ala., where he will be dispatched to a shelter.

"Everything I need, I'm bringing," he said. "There won't be any Radio Shack to go to."

The 57-year-old has been a ham for more than 40 years. He has operated his radio from places as far as East Timor and the Balkans.

The hardest part will be "seeing people in this troubled state _ smelly, sick, depressed, angry. And no matter what any of us do, it won't be enough for all of them."

Ham Radio Operators Pitch In To Hurricane Katrina Relief Effort
General Interest
09/07/2005

With communications out all over New Orleans and the Gulf Coast, the professionals are turning to amateurs to be their ears to what's going on in the areas devastated by Hurricane Katrina.

Local operators say they've been in touch with people in and around New Orleans since the beginning of the ordeal.

Ed McLaughlin, of Kennewick, says in the days that followed the disaster, he was able to help a family in Medford, Ore., get an update on how their relatives were. He's provided similar contact for a family in Chicago.

The reason-- ham radio, which is able to get in places that have no other means for communication when land-based infrastructure fails.

Ham radio has been such a success during these recent days that FEMA and the Red Cross are now using it as their primary mode for communication until other modes of communication are restored.

Ham radio helps close communication gap

Nixa man relayed message from president to New Orleans' mayor.

Joe Hargis works on his amateur radio in his home in Nixa. Hargis helped rescue an elderly woman by notifying someone who could contact rescue workers via radio.

By Sarah Overstreet
News-Leader

If you've been unsuccessfully trying to get information about someone living in Hurricane Katrina's region of havoc, here's an avenue you may not have considered: local ham radio operators.

While cell phones rely on towers and traditional telephones rely on intact land lines, ham radios transmit from radio to radio, bouncing waves off the ionosphere in the upper atmosphere far above the Earth's tantrums. They can run off batteries, generators and sometimes even the sun.

Two Ozarks amateur ham radio groups - the Nixa Amateur Radio Club and the Christian County ARES (Amateur Radio Emergency Services) - have been relaying messages from people all over the world to those whose communication has been cut off by Katrina.

David Beckler, a ham radio operator from Nixa, even relayed a message Tuesday from the director of the Federal Emergency Management Agency in Texas to New Orleans Mayor Ray Nagin.

"He had a message from President Bush to the mayor of the city of New Orleans," says Beckler, a New Orleans native who moved to Nixa six years ago.

Since the message was an emergency communication, the dispatch needed to go through the net control station on an emergency frequency, Beckler said. He knew it was important, because the ham operator had said, "break, break, break," which requires all other communications to yield and give that one priority.

"The net control station or other stations on this frequency could not hear this message," Beckler says. Beckler contacted the net control station, and people there asked him to contact the sending ham operator and relay the message back to that operator. "That's when he told me it was from President Bush."

Joe Hargis, another Nixa ham club member, also helped with an urgent message. "I was monitoring the SATERN network (Salvation Army Team Emergency Radio Network)," said Hargis, a retired elementary schoolteacher.

"A person called in with a piece of emergency traffic and the (receiving) person could not hear him. He said, 'Is there anyone on the frequency who can copy this?' I broke in and told him I could hear it fine."

Hargis relayed the message back to SATERN, and the operator there could hear Hargis well. "It was a 90-year-old woman and her elderly neighbors. They were afraid to leave their home because of the unrest in the neighborhood, things that were going on, and they needed assistance to be evacuated. They were running low on medicine, and one was running out of her oxygen supply."

Nixa ham club member Rod Kittleman says their members helped save the lives of a couple in New Orleans.

"A weak, disabled elderly couple were trapped in their attic. Their phone worked, but they couldn't get through to local authorities," the KADI radio program manager explains.

Too weak to break through their roof so emergency personnel could find them, the couple called their daughter in this area. She contacted the Nixa club, which relayed the message to a local ham operator who is licensed to operate on emergency frequencies.

"He got through to authorities in New Orleans over the radio, and they were rescued. (The ham operator) relayed the message back to their daughter. That's the reward we live for."

## ARRL's Role In Rescue Offers Lessons For Future

Mark David
ED Online ID #11164
October 13, 2005

Investigations into the communications breakdowns in our national emergency response systems continue. Yet I'm struck by the contrast between the hue and cry for upgraded infrastructure solutions and the much quieter revelation that old-school ham radio provided the only trustworthy communication during Hurricane Katrina.

New Orleans emergency departments' radios were wiped out when broadcast towers lost backup power generators. Police and fire departments only had citizen-band radios, offering inadequate bandwidth. Emergency responders lacked coordinated frequencies.

The National Guard cited antiquated communications technology-as a contributor to its delayed response. Lt. Gen. Steven Blum told USA Today that there was a shortage of high-tech radios and satellite communications gear. "We were underequipped," Blum told USA Today. "We don't need tanks and attack helicopters... but we must have state-of-the-art radios and communications."

The Guard has historically gotten "handmedown" equipment from active-duty military. It now uses "Vietnam-era radios while it needs 37,000 newer radios," according to Guard budget briefings.

Meanwhile, ham radio operators proved that older technology can be the most reliable technology. Our EDA Editor (and ham) David Maliniak wrote an online column on the subject, pointing out that sometimes "old works when new doesn't." (Read it and add your comments at ED Online 11136.) During and after Katrina, hams running on generators (sometimes with makeshift antennas) worked throughout the hurricane zone to put emergency stations on the air. They guided rescuers to stranded victims and updated weather services via the Hurricane Watch Net.

Amateur radio was the primary means of contact with the outside world for many shelters. It's estimated that some 1000 amateur radio volunteers helped serve the hurricane-ravaged communities and shelters, even providing communications for the Red Cross.

Still, the real lesson of the ham radio successes isn't that old sometimes trumps new. Upgraded, reliable hardware is vital for adequate emergency response. Amateur radio has continued to upgrade too. Hams use satellites, digital systems, cross-band repeaters, and more. As the American Radio Relay League (ARRL) puts it, the Morse code key may still be on the desk, but generally it's next to a modern system operable under extreme emergency conditions.

DISTRIBUTED NETWORKS

Katrina taught two key lessons. First, the Amateur Radio Emergency Service (ARES) organization proved effective because hams don't depend on a centralized infrastructure. When cell towers, phone switching centers, or other central communicationsnetworks are down, hams aren't. Many operators have their own generators and are ready to fire them up to get on the air when there's no power. National disaster response plans must assume that the centralized communications infrastructure likely will be crippled, so the emergency system must include a distributed or "mesh" networking scheme.

Second, ARRL succeeded because operators subscribe to a mission that comes with their licenses-to be ready to provide emergency communications whenever and wherever they're needed. ARES has a well-conceived action plan coordinated through the Radio Amateur Civil Emergency Service (RACES). ARES is part of the ARRL, and RACES is coordinated through the Federal Emergency Management Agency (FEMA). But like the broacast system, the emergency plan is decentralized. Radio operators can work independently to serve their community as circumstances require.

A decentralized emergency plan requires deputized people who truly understand and care about their responsibilities. The best emergency response relies on distributed manpower, with first responders empowered to make decisions at the scene of the crisis.

It doesn't take a federal investigation to realize that the government's emergency-response debacle was caused by centralizing the decision-making with politically appointed bureaucrats who didn't have a personal mission or a true sense of ownership in ensuring preparedness. The fiasco with now-deposed FEMA leader Michael Brown exemplifies the folly of appointments based on cronyism, rather than the recruitment of people who have a passion, understanding, and commitment for the responsibilities they shoulder.

In this issue's cover story, Ron Schneiderman looks at government programs and the new technologies tackling our homeland security problems. But will the right people get those technologies? Too often, homeland security appointments and dollars are doled out according to political favoritism. As we saw in the recent emergency response, technologies are only effective when managed by people-like the hams-who take their responsibilities to heart.

Hats off to all of you who care about the quality of the security and emergency communications technologies you're engineering. Let's hope they end up controlled by people who care just as much.

A few months ago, NBC's Tonight Show staged a race between a pair of ham-radio operators with Morse-code keys and a couple of kids with text-messaging cellphones to see who could communicate faster. The hams won hands down, proving, in the minds of some, that old technology could hold its own against new. In recent days, ham radio was put to the test again by Hurricane Katrina. This time, however, lives were at stake.

In the world of design engineers and electronics in general, change is essential. Designers work diligently to make the fruits of their labors obsolete almost before they see daylight. The turnover in technology is sometimes like a flood, with old being washed away by new over and over. Often, the new beats the heck out of the old. But there are times when old isn't necessarily bad; in fact, sometimes old works when new doesn't. And then we're glad that old is still around, or at least we should be.

Wireless technology, while relatively new to many consumers, is of course not new at all. A few (very) old-timers remember the original "wireless" of radio. The revolution wrought by the pioneers of wireless changed the world then, and the technology behind that revolution has been re-invented and re-applied time and again. Its pre-eminent incarnation today is our near-ubiquitous wireless communications infrastructure, which has freed us from the shackles of landlines and made our mobile lifestyles possible. Technology truly is great stuff.

Until, of course, a monster hurricane comes along to render it nearly useless. Here we see a scenario in which a flood literally swept away the new. As Hurricane Katrina's fury hammered the Gulf states on August 29, the communications infrastructure took a devastating hit. Telephone service, including wireless, became at first intermittent and then unusable in many localities. Where there was phone service, 911 switchboards were often unreachable due to the massive volume of calls. The response of local authorities, now termed "confused" by deposed FEMA chief Michael Brown, wasn't helping much. The Gulf Coast was about to descend into darkness, chaos, and, worst of all for many, silence.

But proponents of the old were at the ready. The "old," in this case, is ham radio. In the eyes of the "man on the street," ham radio has a pretty stodgy reputation. Aren't hams still using Morse code? Don't some of them use radios with tubes, for goodness sake? What the "man in the street" probably doesn't know is that it was amateurs who advanced the radio arts early in the 20th century. Down through the decades, amateurs have embraced (and often driven) all of the innovations in wireless technology, up to and including all digital modes and the Internet. But many have stayed in touch with their roots, which is good old-fashioned analog HF operation. And while amateurs have a longstanding tradition as innovators and experimenters, they also have a mandate that comes with their licenses: to be ready, willing, and able to provide emergency communications whenever and wherever they're needed.

As Katrina bore down on the Gulf region, amateur radio operators, under the aegis of the American Radio Relay League's (ARRL's) Amateur Radio Emergency Service (ARES), prepared to swing into action with emergency networks that would run health-and-welfare traffic into and out of the disaster zone. As early as the Monday following the storm, hams throughout the hurricane zone were putting emergency stations on the air. In one instance, hams were instrumental in the rescue of 15 people clinging for life to a New Orleans rooftop. Meanwhile, in Alabama, amateur SKYWARN weather nets kept the National Weather Service apprised of conditions throughout the state. In hard-hit sections of Mississippi, hams running off generators and with makeshift antennas were the only means of communication, getting word to out-of-state friends and relatives concerning their loved ones.

There were numerous other instances of hams helping those who were not simply inconvenienced by the storm, but whose lives were in imminent danger. Now that things have calmed down in the Gulf region, many of the emergency nets have stood down. But hams continue to serve the public in the many areas that are still without power or phone service.

As our nation collects itself in the aftermath of the Katrina disaster, President Bush has promised federal reviews of what went right and what went wrong. One of the findings of those inquiries should be that the federally-instituted Amateur Radio Service, which functions under the licensing authority of the FCC, stood tall when the country needed it.

Amateur radio currently faces various threats to its existence. Chief among those is the advent of broadband-over-powerline (BPL) technology, which, if broadly adopted, has the potential to cause widespread interference to HF communications, not just for amateurs but for other services that use the HF spectrum.

Amateurs and the ARRL have made a lot of noise about BPL, asserting that it could seriously hamper their efforts and those of relief agencies such as the Red Cross and Salvation Army, in the event of a disaster such as Katrina. It's rumored, though, that the same FCC commissioners who have given their blessing to BPL field trials will now take a much harder look at the technical issues concerning BPL and its interference potential in the HF spectrum. Let's face it: The federal government didn't handle the emergency in the Gulf very well; it'd be prudent for it not to sanction a technology that could impede one of the few things that actually worked.

Many readers of this newsletter are amateur radio enthusiasts. If you are, and if you haven't already done so, consider writing your congressman to express your concern about the future of the Amateur Radio Service, especially in light of its outstanding efforts in recent days. Remind your elected representatives that a vibrant and unimpeded Amateur service can and will be a lifesaver when disaster strikes. Also, consider how you yourself might help. What if a hurricane, tornado, or earthquake ravages your area? Are you prepared to get on the air without relying on the mains to handle emergency traffic? Get in touch with your local amateur-radio club and find out how you can pitch in.

Your cell phones and wireless routers are indeed great stuff, but so is a good old HF transceiver. We shouldn't always be in such a hurry to let the flood of new technology wash away the old. The geek down the block with all the antennas on his property could turn out to be your best friend someday. Because sometimes, old trumps new.

Florida passed a law making it a third degree felony to transmit any signal without a license. The American Radio Relay League (ARRL), the national organization representing amateur radio operators saw this law as too broad and vague and a threat to ham radio operators, since a portion of the law also makes it a third degree felony to cause interference to any broadcast station, even from a licensed ham transmitter.

So the ARRL filed a Request for Declaratory Ruling asking that the FCC void the Florida law. The FCC is studying the matter and may void the Florida law. When is anybody's guess. You can call the FCC Wireless Telecommunications Bureau (WTB), who is handling this matter, and voice your support of the ARRL petition to void the Florida interference law by calling 202-418-0638. Please pass this on to other parties who wish to register their support of the ARRL petition to void the ill-conceived Florida interference law. Basically, states cannot legislate in the area of radio interference, since this is solely reserved to the FCC.

You can read the ARRL Request for Declaratory Ruling here...
http://www.arrl.org/news/stories/2005/03/01/4/?nc=1

That's the wrong reason to change parties.  First of all, look at your values and compare them to the values & policies of the various parties. Join that party whatever it may be and whoever may be the leaders.  Then if you don't like the leaders, work your arse off to get different leaders within the party. What good does it do you to joint a party which may be diametrically opposed to your points of view !?

Better yet, opt out of the sheeple-orientated party system and vote for the CANDIDATE who best matches your politics.  Urge your friends and family to do the same.  Only then will we get candidates who listen to PEOPLE, not to moneyed interests.

Beep          beep

```

Dee, it's too me that the fundamental principles of the Republican and Democratic parties don't vary much, extreme in the fringe edges.

On the other hand, when you have candidate of either parties who are total incompetent, such as Mitt Romney and Kerry Healey who not only are incompetent and also don't have a hint of a clue, it is critical to limit or inhibit their aspirations by whatever means is needed.  The same can be said about John Kerry, in the last election. Kerry is a total and demonstrated dumb ass, who is only in politics to advance his rather egotistical ambitions.  I would rather vote for his wife than him, in future senatorial contests.

By contrast, I rather like what Ted Kennedy does in the senate, even
though I am a conservative Republican.

Perhaps I'm strange, but I would rather vote on a candidate based upon
their past performance and voting record  in the job, than then their
party affiliation. What they professs to believe doesn't really do much
for me.

Party loyalty also doesn't do much for me.

Harry C.

I'm not pushing through any more of this off-topic discussion to
rec.radio.broadcasting. Take it somewhere where Republicrat bashing is
on-topic. Thanks.

Hello...

My Name is Long John, I have not been here for quite some time.

I'm keeping the spirit of the late KFAT-Gilroy alive and well
with my TUBBY TUNES Radio Show...on KMUD-fm...(no longer on KZYX or
KRCB)

I'm a gonzo radio guy, music guy, television guy, a/v production guy...

I'm one of those rarest of Californians: A genuione native...to steal
a quote from Willie Nelson = "I didn't COME here, and I ain't LEAVING"

If you Google  "Highwaymen Email List Web Site" you'll find more info
and a greeting from Willie Nelson.

I'm a mountain man with Dishnet living off the pavement in northern
Mendocino County (the part that gets snow in winter)...very rugged,
yet with access to satellite TV, 2m ham, broadcast fm...and by golly,
I just got a land line installed to my property after a 6 year period
of jonesing for dialtone...cell phone service out here is variable with

mostly basic analog voice; not at all like what city folks have
available.
I have both grid power and solar power...

We do however have a shared T1 line at KMUD I can plug into for major
stuff...

I'm into collecting and broadcasting strange music: novelty songs (NOT

punk rock)
goofy, campy, funny odd ball type of tunes.

My usual mix includes Rock, Country, Folk, Comedy, Parodies, Swing, Blues,
Western, Rockabilly, Zydeco, etc...it's a "progressive format" that draws on the
past mojo of KMPX, KSAN, KFAT, KVRE, KTIM...these stations were very instrumental
in the formation of what radio is today...

I started out as a school DJ in the S.F. Bay Area about 1959-1960 or so...
so I have alot of tunes I can draw on when inspired

I still do old fashioned local radio where I play what I want (my audience
*usually* approves)..!

I NEED YOUR HELP FOLKS:

Have you ever spend YEARS trying to chase down a particular cut..?

A great song called "SILVER AND GOLD" done in a zydeco style was played on KFAT
about 25 years ago...

I recently found a version of the same song by Johnny Strummer (The Clash), but
this zydeco-ish version still eludes me (and my audience)

And for all the other truely GONZO DJ's out there, lets make contact to help the cause...

I welcome folks to tune in WW.KMUD.ORG on Mondays  1:oo PM to 3:oo PM PACIFIC time zone.

It's either myself, or my radio partner Weird Harold...either way we hope you enjoy it..!

My Contact Info:

Long John
TUBBY TUNES Radio Show
Po Box 1238
Laytonville,
CA 95454

Y'all enjoy yerselves..!

Florida passed a law making it a third degree felony to transmit any
signal without a license.

If it's truely "ANY" signal it won't stand up to the FCC policy of
allowing TRUE EMERGENCY
traffic to be xmitted by anyone...while this does NOT appear to be a
situation that would affect the bcast bands,
but if I'm genuinely in deep doo doo and need to xmit an SOS, I'll use
a spark gap if that's all I can do...

However I do have VHF and UHF public service capability, and I used to
be with CDF, so I already know the
Freqs & pl's to program. I've never had to do this since retiring, and
I doubt I will EVER have to. There is usually an op on duty for a 2
meter ham repeater within radio range of me for me to try contacting...

Such as when heavy show collapsed my porch and I couldn't get out...trapped in a 1959 Airstream I had just brought up to my remote property...I *DID* have a 12 volt DC line feeding the Airstream from my Jeep Wagoneer that was a deep cycle battery and a grill plug (all my cars are set up this way)...I got ahold of the duty op on the repaeter, she relayed traffic to CDF,. but the local fire dept snow cat broke down, the chopper hade to low of a ceiling to fly...a neighbor heard the CFD rescue dispatch via the VHF scanner, called another neighbor, and  I was rescued by local mountain neighbors within an hour.

Was I about to go to normally unauthorized radio bands and emit an emergency call..?

Not at that point...but perhaps later if no other means of contact worked...

While the Florida law is aimed at bcast pirates, we run the risk of not only over-regulation, but of far reaching effects not yet anticipated.

What OTHER states have similar laws on the books..?

What would Chief Wiggams (The Simpsons) do..?

73's   KE6VGA

Of Course, everything here hinges on beine a bona fide emergency for no federal sanctions / liabilities

This looks to be as enforceable as the "Low  Voltage Electrician's License" BS they pulled a few years ago. The way it was worded, it was illegal to do anything involving wire or electronic components without a license they wouldn't issue without a long involved test on workman's comp law.  You couldn't install phone jacks, CATV or SAT TV, computer networking or manufacture electronic equipment. It was intended to "Protect" the state's biggest electrical contractors who had decided that were going to take over all burglar and fire alarm work.  They were "grand fathered" even if they had never done the work, but everyone else had to stop all work and wait for the testing to begin, a full year later.  there were no study guides and if you failed the test you had to

wait six months to take it again. I have never heard of anyone being charged under this sham of a law, and it was passed over ten years ago.

Hi all,

You may be interested to know that NEW episodes of my radio cartoon series "Willoughby and the Professor" are currently airing on XM Satellite Radio's Sonic Theater Channel (163), and 43 public radio stations nationwide!

If you would like to hear a PREVIEW of episode sixteen, check it out on-line at:

http://www.comedyorama.com/incoming/wp/wp-16-a-master-02.ram

This one is a spoof of the great 1960s TV show: "The Prisoner".

It is also the very first "Willoughby" since I began voicing them in 1972, that includes a real women's voice, and an actor other than myself: none other than the great MARGARET JUNTWAIT, my good friend and colleague from WNYC!!!

It is entitled: "Say Jacques!" or "She's Got Kneepads" and was written by myself along with Robert J. Cirasa, and produced and directed yours-truly.

The cast of players are as follows:

Joe Bevilacqua as:
Willoughby, the Professor, A. Bysshe Sysiphus (narrator), Mother Terrorista, and Number 6 (aka Patrick McGoohan).

Margaret Junwait as:
Number 2, 36, 37, and 38.

Sounds effects were done my me, as well.

Thanks to Margaret, who made this episode my best radio theater work yet! (She's in the NEXT one too!")

Take a listen, y'all! And let me know what you think! And ask your local NPR station to run "Willoughby" and the entire series of "The Comedy-O-Rama Hour"!

Peace, man!

Joe Bev.

Protest to Libya after satellites jammed
David Hencke and Owen Gibson, The Guardian
December 3, 2005

Article originally posted at:
http://www.guardian.co.uk/libya/story/0,14139,1656914,00.html

British and US diplomats have protested to the Libyan government after two international satellites were illegally jammed, knocking off air dozens of TV and radio stations serving Britain and Europe and disrupting American diplomatic, military and FBI communications.
Among stations hit were digital broadcasts by Five, BBC World, CNN International, US sports channels, cable TV networks and 23 radio stations. According to an email sent by one of the satellite owners, Loral Skynet, the US state department said it "would take it into their own hands" unless the interference stopped.

Last night the Foreign Office confirmed it had raised the issue in talks between the British embassy in Tripoli and the Libyan government.

Ofcom, the telecoms regulator, said it was considering taking a complaint to the International Telecoms Union.

The jamming started on September 19 after the launch in London of a small British and Arab-owned commercial radio station broadcasting on human rights and freedom of speech issues to Libya.

Ten minutes after the station - initially known as Sout Libya - went on air a transponder carrying the station was jammed for 50 minutes along with other stations.

The jamming stopped when Sout Libya stopped broadcasting.

The station relaunched as Sowt Alamel, this time through a new satellite called Telstar 12. As a precaution, the broadcasts were sent to the US first, and then beamed up to Telstar, making it impossible for anybody to jam it, except from America.

Yet the moment it went on air, the jamming started again, knocking out the other stations without affecting Sowt Alamel.

An anonymous email sent to a company which helped the station said: "We can tell you we know the reason for these problems, it is the presence of the so called 'ALAMAL' radio Audio channel on your satellite. This channel broadcasts terrorist propaganda, intended to spread terrorist ideas amongst the listeners mindes [sic]."

The station has now voluntarily agreed to suspend its service. Its director, Jalal Elgiathi, said: "Our radio station had commercial advertising and altogether we have lost �250,000."

Last night 10 parliamentary questions were tabled by Andrew Mackinlay, Labour MP for Thurrock and a member of the Commons foreign affairs committee. "We need a full explanation of what has happened and whether Britain has insisted as part of its trade talks with the Libyans that it respected international law."

Industry sources confirmed that Five had lost its signal from the satellite, but said that the situation had been "quite quickly resolved". Other broadcasters were unaware their channels were affected. A BBC World spokeswoman said: "We're consulting with our cable and satellite partners in the region to clarify the situation."

## Libya Engages in Jamming War

December 4, 2005

Article originally posted at:
http://www.menewsline.com/stories/2005/december/12_05_4.html

LONDON [MENL] -- Libya has waged a jamming war against the West in a successful effort to stop an opposition radio station.

So far, British and U.S. officials said, Libya has succeeded in disrupting U.S. military communications in the Mediterranean Sea. The jamming also blocked dozens of television and radio stations in Europe.

Officials said the confrontation began in September when a British-based opposition radio station began to broadcast to Libya. The station, Voice of Libya, was meant to be a commercial enterprise that reported human rights violations by the regime of Col. Moammar Khaddafy.

Within minutes of its launch, the radio station as well as other broadcast networks were jammed. Officials said the jamming ended when the Voice of Libya went off the air.

## Libya Jams Western Broadasts
December 5, 2005

Article originally posted at:
http://www.worldtribune.com/worldtribune/05/front2453709.9972222224.html

LONDON - Libya has waged a jamming war against the West in a successful effort to stop an opposition radio station.

So far, British and U.S. officials said, Libya has succeeded in disrupting U.S. military communications in the Mediterranean Sea.

The jamming also blocked dozens of television and radio stations in Europe, Middle East Newsline reported.

"We need a full explanation of what has happened and whether Britain has insisted as part of its trade talks with the Libyans that it respected international law," British parliamentarian Andrew Mackinlay, a member of the Foreign Affairs Committee, told the House of Commons on Dec. 2.

Officials said the confrontation began in September when a British-based opposition radio station began to broadcast to Libya. The station, Voice of Libya, was meant to be a commercial enterprise that reported human rights violations by the regime of Col. Moammar Khaddafy.

Within minutes of its launch, the radio station as well as other broadcast networks were jammed. Officials said the jamming ended when the Voice of Libya went off the air.

Weeks later, the Libyan opposition reappeared with Sawt Al Amal, or the Voice of Hope. The station was broadcast through the Telstar-12 satellite, operated in the United States.

Officials said Libya again sought to jam the opposition station. The effort failed, but other European-based stations were disrupted. They included BBC, CNN and at least 23 radio stations.

The British Foreign Office has confirmed the jamming. Officials said both London and Washington have discussed the issue with the Libyan government.

At one point, an anonymous e-mail was sent to Sawt Al Amal's satellite provider. The e-mail said the disruption of satellite service stemmed from the opposition broadcasts.

"This channel broadcasts terrorist propaganda, intended to spread terrorist ideas amongst the listeners minds," the e-mail read.

In November, Sawt Al Amal agreed to suspend service. The station's director told the Guardian newspaper that the company has lost about $500,000 in advertising revenues.

The Libyan jamming effort, which has not been acknowledged by Tripoli, represents the latest tiff between Washington and the Khaddafy regime. Over the last few months, U.S. officials said Tripoli has reduced cooperation with the United States regarding intelligence on insurgency movements and nonproliferation of weapons of mass destruction.

.....

I�ll voice my concern about the ARRL, not the law.

I was once on a plane landing at the Miami International Airport, which had to abort a landing approach. The pilot explained that there was a Haitian radio signal interfering with the communications frequencies used by the plane to get landing instructions. He was referring to a pirate in Kreyol that had an emission right in the aircraft band.

All the passengers of this and other flights sere endangered by this prorate.

The law may need revision, but endangerment of public safety and interference with licensed communications channels is not something to be quibbled with.

Theoretically it would imply that, of course theoretically someone with a lawful part 15 FM radiator also would be subject to the same law.

Keep an ear out for the premier of PDFCast : a really funny, stupid and possibly weird show, made in Cardiff, Wales and hosted by the three strangest hosts in the world! But more to the point, the show examines news, stories and anything funny and odd. Episode 1 on iTunes from monday. For more info visit the cast's official page at pdfcast.uni.cc

This is true.  But we already have plenty of federal laws to deal with
that.  The solution is not to enact more laws, and cause federal and
state organizations to start fighting with one another over jurisdiction.

The solution is to enforce the laws that already exist.

However, the US laws extend only to US borders, which is why Haitian FM pirates, Brazillian shortwave broadcasters, and Chinese touch lamp manufacturers will continue to be a problem until we sit down with other governments and work them out (as we did with megawatt Mexican AM broadcast issues in the past).

Do you truly believe that local or state police will act swiftly enough to prevent such things given authorization by said law?  Unless the police are well versed in what is authorized to emit and what is not, the situation is not going to be cured by a poorly crafted state law.

No argument there. However, heavy-handed legislation doesn't help matters.

David Eduardo wrote:
> I=B4ll voice my concern about the ARRL, not the law.

I would suggest the League's valid concern is largely over the fear of=20
local law-enforcement officers, not trained in electronics, hassling=20
legal radio amateurs.

It is not difficult to imagine this law causing problems for licensed=20
broadcasters.  In cases of front-end overload of police receivers, or of=20
wired-remote equipment being installed too close to an AM transmitter.

Really the problem lies with ineffective enforcement by the FCC.

Florida has already moved against several of the more egregious pirates,
including one with an illegal tower install that was a danger of itself.
They have the advice of engineers.

The FM pirates in South Florida, the Boston area and others are Haitian immigrants broadcasting locally and illegally. there is no way a station form Haiti could interfere on the FM band with any US station. Haiti is over the horizon... way over it.

The problem in FL is that there are so many pirates, they endanger lives in many ways, including unsafe towers, electrical hazards, RFI hazards and interference to other services, like airports. If the FCC can not act fast enough, then local authorities are required to look at other aspects and act. The FCC laws basically cover spectrum use, not endangerment.

105.3 Free Radio's Afternoon shock jock Russ Martin has turned to a new low for ratings. His rival, cancer survivor Tony "Magoo" Mirusso of KZPS has had his family attacked in recent weeks.

The latest stunt pulled by Martin was having people show up with a Christmas tree filled with Dead Fish, Alcohol and Cigarettes at a Charity outing hosted by Tony Magoo Mirusso on Friday Dec 9th. He has also asked listeners to try and grab Magoo's throat to "see if it feels like crushed tomatoes"

Russ Martin has stated that Cancer patients "have it coming from booze and smokes"

This is sick and I am asking those reading this (and yes I will be cross posting) to write, phone and or Fax the people at Infinity Radio and at 105.3 Free Radio and let them know that this treatment of Cancer patients is UNACCEPTABLE!

I urge you to also contact show sponsors as well.

D&M Auto Leasing    817 or  972.35.LEASE
 or visit their website:   www.dmautoleasing.com

When you're at 40,000 feet, the horizon is a long way away.  That is
the real problem with dumping trash into the aviation nav/comm bands....
listeners at high altitude may have line of sight from a long way away.

I have heard Haitian FM pirates in NYC, though. And I would not be surprised to see the same thing in other cities. And I am surprised they aren't shut down, since anything that is easily audible on an FM radio in a taxicab shouldn't be too hard to DF, even in an urban area where multipath makes DF harder.

>The problem in FL is that there are so many pirates, they endanger lives in
>many ways, including unsafe towers, electrical hazards, RFI hazards and
>interference to other services, like airports. If the FCC can not act fast
>enough, then local authorities are required to look at other aspects and

That still doesn't give them jurisdiction. Just because the FCC is totally ineffective at enforcing their own rules doesn't allow anyone else to enforce them.

In the case of endangerment to aviation channels, the FAA is also empowered to enforce them. A call to the Frequency Management Officer at the Atlantic City International Airport is apt to get a truck out within a few days. They are also pretty overworked, but a lot more responsive than the FCC.

I think a better thing to do would be for the individual state governments to start beating on the FCC. Although perhaps this law is intended as a step toward that.

I would like to buy a decent "boatanchor"
communications receiver.

Favorites:

Collins 75A-4. Prefer serial number 4000 or higher.

TMC GPR-90.

Hallicrappers SX-115.

-----------------------------------------------------------------

Examples of receivers I won't take if sent for free!

Hallicrappers S-38.

National HRO xxxxxx.

National NC-57.

ARC-5.

BC-348.

You must be willing to ship to Macon, Georgia, USA.

Please do not "ebay me" HI! In short, if the asking
price approaches that of a condo in Ft. Lauderdale on
the beach I am not interested! Hi Hi!

Tel: (478)741-1710.

73,

Meyer Gottesman, W6GIV

Florida can get them on zoning, electrical code violations, endangerment of
health, lack of business licenses and a bunch of other things. And they can
move faster.

This is a foolish post by an uninformed individual.

Lets start at the beginning. Magoo made a comment that he was going to beat Russ Martin, Dallas' number 1 afternoon show in the ratings. When last I heard Martin had an unprecedented 14 share during his show and number 1 in the 12+ (ie, everyone demographic). Magoo commented that when he beat the Russ Martin Show he would be sending Russ a dead fish.

For those who don't know, Russ is a sarcastic and at times abrasive humorist, but at the same time he's a generous and warm hearted average guy's guy - though he'd never admit that. Alot of us listeners are fans of his show because of this - though some of us would never admit that. Russ gives his time and money generously to his Heroes Foundation honoring the families of Fire Fighters and Police Officers who fall in the line of duty and to Operation Kindness a Dallas area no-kill animal shelter. Also recently he's taken it upon himself to see that a less-then-fortunate family will have a Merry Christmas this year.

Because of Magoo's comments, Russ didn't pull any punches when it came to Magoo and did make some comments on the air about him. Russ Martin, in fact, never said that listeners should try to grab Magoo's throat. Russ has also never stated that Cancer patients have it coming from booze and smokes as though it's deserved. Russ is a drinker, and a fan of drinking, even a casual listener has heard his Gentleman Jack Cork Pop several times. Further disproving the theory that Russ has a cold heart towards those with cancer is the story of Dallas Morning News Radio Critic and close personal friend of Russ and the Russ Martin Show Cast; Al Brumley. Al died in Oct 2003 after a long and crippling fight with brain cancer - to this day he is still memorialized on the Russ Martin Show website (www.russmartin.com) in a presentation that still brings this 28 year old male to tears when I click on it.

After Russ understandably taking a defensive position to Magoo's OUTLANDISH claims that he would possibly compete and even beat Russ' ratings, a LISTENER called in with the idea to make a delivery of a dead fish with a cigarette in it's mouth to Magoo.  These deliveries have been a running joke on the show, still being performed by an unpaid LISTENER of the show until recently when Magoo savagely attacked the listener who is currently undergoing medical treatment for his injuries, has filed assault charges, and will most certainly file civil charges.  For this, all KZPS felt inclined to do was suspend Magoo for a day or two...

I would also remind you, as one who is obviously a Magoo and KZPS supporter, to cross check your request stop supporting advertisers on 105.3 because many of those same companies run spots on KZPS also.  I mean hell... If they can afford 1 spot during the Russ Martin Show they can probably buy every other spot in a 24hr period on KZPS for the same price.

I have a satellite radio that has a transmitter that plays through the FM radio in my car, but guess what? I can also pick up the station 100+ feet away on my home stereo through the same FM channel. I assume my neighbors can pick it up too if they channel surfed. So if I have an R-rated show on and the kid next door hears it, how's this different than regular FM that the FCC can enforce? Will the Christian right use this angle to try to shut satellite radio down?

Got to admit that the BC-348 is really ancient (late 1930s), but I worked
well over 100 countries with it in the 1950s as a young teenager. [I paid
about $10 for it, then.]

They are 3 class A FMs, with one smack dab in the middle of the OC (Fountain Valley), another in Ventura County (with essentially no city grade in the San Fernando Valley), and the crippled high desert station that they moved as far out as they could so that the former Avalon station could move to Orange County. There are no repeaters.

Rather than be the umpteenth person to tell you that you don't need an FCC license for internet broadcasting...  ;-)

....I'll tell you a quick and easy way to get around the *other* licensing issue.

You could simply go to Live 365  (live365.com) and sign up there.  You will be given a blanket license that should keep you covered legally.

Also, you *might* be think about having a link that only connects for people "on campus" (using your servers, etc.) that might allow you to broadcast on your INTRAnet (as opposed to the whole internet).  That might keep you in the clear.

You might also have to watch out for any prerecorded spots that have agency or union talent on them. (Although, sine you are a non-comm, this is practically a non-issue.)  If you have PSA's from the ad-council, they should be covered by the ad-council.

David Eduardo wrote:

> They are 3 class A FMs,

Eh? Yeah, I guess so. Rather weak signals, though, all 6Kw or less.

I am looking at the FCC database and I see the license for Avalon. Rather oddly, all I see for Adelanto is a CP. KELT *appears* to be licensed to Riverside. I'm probably misreading...

What I don't understand is the use of the licenses outside Ventura County when they apparently have no intention of selling ads outside that area. Infinity runs a country station, "K-FROG" - licensed somewhere in the Inland Empire (don't ask me where, I am not even sure which calls the station uses) and they have a K-FROG station in Victorville (KVFG/103.1), but they actually have a sales office here, and they broadcast at least some local content. (For example, they do the weekly Victor Valley High School football games.) The licensee for KELT has no local office and no local content. I wish I had enough money to buy the station so I could put something local on it. :)

Podcasting is the best way for a college radio station to increase it's listenership. There, you face only two hurdles:

1. Permission from the bands and labels
2. ASCAP and BMI fees

Tables Turned is helping college radio stations with both problems by hosting a music clearance license for any band that wants to give you permission and waive public performance fees.

We're currently circulating a college radio petition to increase awareness of podcasting from within the indie record industry. Please have a look, and spread the word:

http://tablesturned.com/pages/collegeradiopetition

In solidarity,
Marcus Estes
Tables Turned

And that is the definition of an A... 6 kw at 100 meters. In large metros, a
number of operators have tried teaming them up as simulcast networks, but
each is a "real" station on its own.

It has been in Fountain Valley for about 2 years. No longer on Santa
Catalina

I think that they have set this up to sell it.

There are actually three KFROG's
KFRG 95.1 FM Colton (btw. Riverside and San Bernardino)
KXFG 92.9 FM/Sun City (btw. Riverside and Temecula)
KVFG 103.1 Victorville

I don't know off hand if they're simulcast or programmed independently....

Hello I'm Nick from Apple Valley, Cali. I think 927 JILL-FM is a great station for the ladies that love that type of music. That makes me think about launching NICK-FM for the guys. LOL.. It's a thought right? I agree with everyone I think they should reach out to some local businesses outside Ventura, the 805/818 and maybe look into providing commerials for the IE, Antelope Valley, Victor Valley, And other areas where they are heared.

I've been trying to get an AM signal at my job which is in a large steel factory. Today I heard about HD radio and naturally I wonder if this is still an AM signal that will not penetrate a metal building or is an HD signal a more easily recievable signal that we are used to in AM?

I'm curious to see how the Christian station is going to "serve the public".

My guess is that they won't.

Does anyone have the pinouts and jumper settings for the Conex DS-25
decoder? I don't have a manual for mine.

Jon

I sincerely doubt the signal to noise ratio will improve sufficiently inside a steel factory for AM.  If an FM signal won't suffice, IBOC sure won't do much for you.

General Manager/WILL AM-FM-TV
Director, Division of Broadcasting
College of Communications
University of Illinois at Urbana-Champaign

The University of Illinois is where it all began.  Educational broadcasters met here at mid-century to lay the cornerstone of public broadcasting, NPR, and PBS. Now, WILL AM-FM-TV seeks a General Manager to lead the way in the digital age.

The WILL stations are looking for an industry professional who will provide creative leadership and administrative management of the Division of Broadcasting.  He/she will lead the stations in strategic planning, budget development and control, and human resource management.  Duties and responsibilities include active participation in fundraising and in partnership building within the university and the communities served by WILL.  They also include participation in state and national public broadcasting organizations and the development of new technology standards and services including digital broadcasting and on-line media.

Qualifications:
�    Minimum of ten years management experience, including at least five years in public broadcasting
�    Baccalaureate degree in communications or business-related discipline; graduate degree preferred

� Strong leaderships skills, including proven ability in planning, problem solving, conflict resolution, staff evaluation and mentoring
� Ability to articulate the vision and mission of WILL AM-FM-TV
� Excellent communication skills
� Demonstrated commitment to diversity in the workplace
� Working knowledge of emerging technologies and latest on-line program delivery systems

Starting salary is dependent on qualifications and experience. The university offers a generous benefits package.

To apply, send a complete resume, cover letter, and the names of three professional references. Applications must be received by November 30, 2005, for full consideration. Receipt will be acknowledged. Interviews may begin before November 30. Position is available January 3, 2006, and will remain open until filled. Complete position notice is available at http://will.uiuc.edu/about/jobs.htm. Applicants are encouraged to request a packet containing additional information before applying. The packet is available from and applications should be sent to:

Elizabeth Weathers, Division Secretary
eweather@uiuc.edu
217/244-2625
www.will.uiuc.edu

The University of Illinois is an affirmative action/equal opportunity employer.

Denise Perry

>From what I have seen, the IBOC FM signal is maybe a little bit more
robust than the analogue signal.  So if the FM reception is a little
marginal, you may still be able to get the HD broadcast from that station.

On the other hand, IBOC AM is less robust than the analogue signal, so
if the AM station is marginal, you probably won't be able to get the IBOC
AM signal from it at all.

Remember the IBOC signals are basically "bags on the side" of the existing
analogue channels, so the propagation characteristics and interference
issues will tend to be more or less the same as the signal they are hanging
off of.

Sure. I didn't mean to imply that it had no appeal, just that I don't like it.

>That makes me
> think about launching NICK-FM for the guys. LOL.. It's a thought right?

Not necessary. We now have JACK FM and JILL FM in Southern California.
Jack's in LA and San Diego.

Cue joke about Jack and Jill going up the hill...

> I agree with everyone I think they should reach out to some local
> businesses outside Ventura, the 805/818 and maybe look into providing
> commerials for the IE, Antelope Valley, Victor Valley, And other areas
> where they are heared.

They can't be heard in the IE, unless there is a station in Riverside that I don't know about. The Riverside license is for KELT-FM which actually serves the Victor Valley. I still don't get how they have the license for Riverside and just a construction permit for Adelanto but still operate out of this area (perhaps one of the people that actually works in radio can answer that).

Unless KELT can be heard in the Antelope Valley (which is possible, given where they broadcast from), Jill isn't there either.

The HD signal associated with an AM station is transmitted with much
less power than the station's ordinary analog signal.   OTOH, the
design of the HD signal is such that it is immune to  ___some___
kinds of interference or electrical noise.. I don't think AM HD will
help unless you can hear AM in your workplace, even though it's too
noisy for acceptable listening.  AM HD won't create a signal if
ordinary analog AM is completely inaudible.

It's still on the same signal, just modulated onto the sidebands, thus, if
you can't get it with a normal receiver, you won't get it with an HD
receiver either.

Our experience at KTNQ is the oppostite. Many places where the analog signal
is noisy have HD reception that is pristine.

HD expands the coverage area of KTNQ due to the high noise level on the
analog signals in LA.

My experience is entirely in rural areas where most of the issue is QRM
from power lines and other local sources, but where adjacent-channel

interference in the daytime is nonexistent.  Where does the high noise
level in LA come from?

IBOC doesn't seem to improve weak signal coverage, especially not within a steel frame bldg.  Indeed, someone in a car listening a signal wiped out by power lines might get an improvement if the IBOC signal is strong enough, but weak signal usually switches to analog reception which leaves the listener in the same position as before, no available signal.

Computers, traffic light controllers, leaky power lines, ignitions,
diathermy equipment, dimmers, fluorescent lights, motors, etc., etc. It
takes at least a 15 mv/m signal to overcome it consistently in LA.

No HD Radio will not work any better than AM.
And the audio quality sucks..

How is the law regarding this in US?
Looked FCC site but couldn't find specific info except for things like
one can't broadcast indecent language etc.  I am interested to find out
about political news in particular.  Thanks.

Trust the FCC site.  FM's are as free as anybody else to broadcast
politics.

Can someone please email me the lyrics to the song "Milkman's Matinee,"
the theme song of a show that was on WNEW years ago?  I'd truly
appreciate it.

AJ

I assure you that if you could actually get a solid list of guidelines of
what was and what was not acceptable that every broadcaster in the country
would pay very good money to buy a copy off of you.

How many times have you listened? I find the quality excellent, less
fatiguing than analog AM, and quite a significant improvement. I actually
have an HD radio, too.

The problem has been major across the upper midwest with these.

R B Schools ('radio broadcast') is by far the most active, with applications in Michigan, Indiana, Illinois, and most recently, Utah. They are trying to get share-time agreements forced on small high school stations. They are from the Fort Worth area, and are said to have strong religious ties.

The other one is Hoosier Public Radio. They are trying to hijack seven or more stations near Indianapolis. It's well-known they are involved with religious broadcasting.

Some of the better school stations are actually managed by veteran broadcasters who help the students learn the ins and outs of running a station. At one of the two left in Utah, they have had graduates go on to get work at major group owners in the area. In fact, I heard that one of them got a really decent job at KENZ 107.5 (now 101.9) a well-known alternative station in Utah.

Living Proof owns their own stations, and is said to have just signed on a Phoenix rimshotter, KCOO 89.9 Coolidge. Haven't confirmed it yet, but it could be an Air1 station. As far as I know they are not even remotely involved in the share-time hijack cases at all.

You mean it doesn't regulate all content.  I suggest you review George Carlin's seven dirty words. I admit that almost nothing to the right will be the cause of license regulation but there are limits on content.

Actually, they skirt that concept.

1. Indecency and obscenity are prohibited.
2. There are specific rules about political advertisements and the usage of same by candidates.
3. There is a requirement to provide programming, a tthe licensee's determination, to serve the community.

No wonder. You hash the analog signal and adjacent channels with
sideband noise and cut off anything above 4 kHz to do HD. "Let's trash
the analog so we can sell digital receivers is your mantra."

Wow.  That's horrifying to even imagine... but that noise is mostly QRM
rather than adjacent channel trash?

You might want to revisit that statement. Indecency and obscenity are
heavily regulated. On behalf of Howard Stern, Infinity has paid a
couple million in fines.

The Superbowl cost CBS about $500,000 for the clothing malfunction.

They certainly do regulate content.

Rich

OTHER than obscenity and indecency.  I am not sure why this is considered acceptable and other regulation is not.

I miss the Fairness Doctrine.

Yes, the reason why such an intense signal is needed on AM in most metros is the noise level from man made interference, not adjacent channel interference... Since very little rated market listening is done to signals below 70 dbu on FM and 10 to 12 mv/m on AM, adjacent channel stuff is a moot point as FCC protections are far more rigid than the actual listenable signal areas.

I am in a small island (outside the continental U.S.)...U.S. territory...and I would like to operate a radio station through the internet....

My question to this group...is : can anyone point me to the right direction how to take off in this project....any advise,

recommendation, etc.
thanks
chris

As long as it's legal, it's ok.  The problem in the NYC area is pirate stations broadcasting on 87.7.  I doubt these pirates are interfering with any legitimate service.  However, they are illegal, unlcensed broadcasters nontheless.

Evan

Well, now I guess any pirates on 87.7 would be interfering with WNYZ...

-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

It's getting a bit tiresome seeing one misguided American after another with
their cutsie little yellow or red-white-blue ribbons on their outsized SUVs.

Yeah, I guess it's the thing to do; maybe part of that whole soccer-mom culture. Unfortunately, the only thing they demonstrate is that the person behind the wheel is a clueless, gullible, misguided, nitwit.

If foreign invaders landed on our soil, as we have done in Iraq, I would be the first one to take up arms and repel them. (I suppose that would make me an 'insurgent' by OUR logic.) This, and other aggressive governments have always done their utmost to make it APPEAR as if committing yourself to kill in feuds on distant shores that have nothing to do with the welfare of the citizenry is somehow patriotic.

It is not.

Enlisting in the armed forces, in the absence of a real and impending foreign threat, is no different that hiring yourself as a paid assassin . . the only difference is, you're not getting paid enough. But let's take a realistic look at exactly WHO joins up in an all-volunteer army.

The first group are those who join (during peacetime) for the benefits: to get an education, or because it seems a reasonable career path. Consider carefully! Realize that you are gambling with your humanity. Once you sign that form, you sign away your right to say: "No, that is an atrocity." You put your abilities, including the ability to kill, at the disposal of proven liars, psychopaths . . . enemies of humanity. Do you think that every German soldier in World War II who helped load Jews into cattle cars was a cold-blooded killer? Most were poor kids, just like you, who got caught up in the patriotic frenzy. Once you're in, you're IN. You lose the ability to stop killing until they tell you so. This not only makes you less than human, it makes you less than an animal, for even the animals retain their freedom of self determination.

The second group are the simple minded, who fall for patriotic entreaties about defending democracy, Mom, apple pie; in other words, all the traditional government propaganda. Do you think Soviet lads subjugated their neighbors throughout the world because they thought the Soviet Union was an EVIL empire? No, they were fighting for MOM, and whatever passes for apple pie in Russia. Step back and examine the lies your government is handing you, and ask yourself if they have the ring of truth. Do you want to be one of the murderers in uniform who opened up on their fellow citizens at Kent State? When you put on that uniform, you give up all autonomy, and become nothing more than a weapon, to be used for whatever evil purposes the scoundrels in government demand (and, if you look carefully, you will discover that the only interests THEY serve are those of the big businesses that own them.)

Finally, you have the hard-core psychopaths. These are the people who WANT to kill. Murder, torture, rape; THESE are the American values upon which THIS group is focused. The cause doesn't matter, they're after the thrill that only warfare can provide.

Just remember: killing for George W. Bush, or for George H.W. Bush, or for Lyndon B. Johnson, or for Richard M. Nixon is not the same as defending yourself, your family, your friends, or your country. Don't be a dupe. Don't

Enlist!

Remember -- supporting the troops means supporting Bush aggression, profiteering, and war crimes. Here's an idea: why not take those ribbons, dip them in blood, and mail them to the White House?

 Why is this posted here? Wouldn't
moveon.org be a better place to send moronic
crap like this??

 We like to talk about radio here...go away.

Because it's spam; the guy forged an Approved header to bypass moderation
requirements, and I guarantee he's not listening now, so

>  We like to talk about radio here...go away.

while I share this sentiment, expressing it is pointless.

Responding to a cross-posted message by a troll is a sure way to encourage a troll. If you look at the headers, you'll note that it bypassed the moderation process entirely because the troll's server was improperly configured.

Want to listen to a song by Jimi Hendrix?

Not anymore.

You'll have to subscribe to a music server and download songs by the late Jimi Hendrix, Robert Plant, Steve Winwood,  or other classic rock or, jazz, or blues artists.

Now that corporate companies have captured radio stations, it is very hard to get your request played unless it is a current artist or if the corporate company has approved of your request as being "important" enough to be fit in during the day, evening, or weekend playlist.

If you want to hear Avril Lavigne, Coldplay or some other current artists, then you will get your song played.

If you want to hear the Stones, LeD Zeppelin, or Hendrix, then hold the phone away from your ear when  you get disconnected.

DISCRIMINATION against listeners!

"Criminization" - that hidden fine-text in that word DISCRIMINATION because of society's over rated music with little respect of other listeners.

You don't want to hear Avril Lavigne on your classic rock station - but you will have to "Get Over It"! (Why don't you like Avril Lavigne, yo?)

An Avril Lavigne listener doesn't want to hear Rolling Stones - their request is fully granted. No questions asked.

See the difference in how one is treated in today's society where corporate america has killed the radio stars that once poured out of our speakers.

Yep, you're right & I should have thought about
that crosspost before responding. Guess I just flipped
about someone soiling the place like that.

Fine, thanks. Worked in sales for am/fm duo
in the early seventies while going thru college;
then had to leave & turn to first job skill, aviation,
to handle growing family.
 Got mandatory retirement in four years; plan to
get back to radio after. Still have many contacts
in the biz. Loved that sales job!
 Love radio; I keep a CC radio in my flight bag....

Cheers,

---Bob S.

Just what is a "corporate company?" A company, by definition, is a corporation and most radio stations have been incorporated since the idea of a proprietorship became legally so risky back 50 or so years ago.

> it is very hard
> to get your request played unless it is a current artist or if the

Since Mr. Marconi was in radio, very few stations have taken requests. Usually, and this goes back to music stations in the 50's, the playlist is predefined and preprogrammed. No self respecting PD is going to let one listener whose only qualification is owning a phone tell him what to play. It may come as a surprise, but most "requests" are recorded and played as part of a preprogrammed song when it is time to play it.

>
> If you want to hear Avril Lavigne, Coldplay or some other current artists,
> then you will get your song played.

Nope. Those get played anyway, so the station records a listener requesting thesong, and drops the recording over the intro when it comes time to spin that tune.

>
> If you want to hear the Stones, LeD Zeppelin, or Hendrix, then hold the
> phone away from your ear when  you get disconnected.

If you call a station that plays Coldplay or Avril, you will not get them to play Zeppelin and friends... two different formats, two different demos. You are obviously calling the wrong stations.

>
> DISCRIMINATION against listeners!

Requests are not required by law, and are bad programming.

A company, by definition, is not a corporation. Just because the corporation
is a popular legal entity doesn't make your generalization true in all cases.

First, there are other legal entities like LLP, LLC and certain types of partnerships; LLC's, for example, offer the protection of a corporation without a lot of the paperwork. Second, there are still people that choose the riskier forms of business, like sole proprietorships and general partnerships, where the individuals bear all of the liability incurred by the company.

I believe you interpreted the word "corporate" too literally.

OTOH, right now WWL is absolutely priceless -- and its current
programming is a refreshing change from what we get on most stations.
Right now, "United Radio Broadcasters of New Orleans" are doing the
broadcast community a service by reminding us what radio is supposed to
be about: operating in the public interest instead of just generating a

return-on-investment.

Why do all theese radio stations that brocast over the internet have to put theese banners up? They drive a screen reader crazy. I can get an .asx or .asf file, then run it in the older windows media player, and it works just fine. I guess they are stupid and realize there aren't blind p people trying to listen.

Not to quibble over details in such a truly fine posting -- but I do have one comment. WBCN has actually been in existence for well over 25 years. On air broadcasting commenced in 1958 as a classical station and

in 1968 the first AOR format was adopted. Since my first listening
experience dates to September of 1968, I prefer to recall that as
WBCN's birthdate -- applying my convoluted logic, the station is 37
years old. A great synopsis of WBCN's history is posted at
www.bostonradio.org/stations/26897.html . CCR's "Suzie Q" is the first
tune I enjoyed on 'BCN in 1968, those raucus days when FM radio was
still novel for the masses.

It's more like 47 years. It was originally licensed in 1958.

"Meyer Gottesman" <wrecktech@yahoo.com> wrote in message
news:deq606$di9$1@xuxa.iecc.com...

| The Radio Crazy is NOT in a huff! Hi!

| Again, all may rest assured that I am not going to
| post any media properties for sale nor will I solicit
| investors to help buy said properties.

Meyer...as the primary instigator of this thread (or its precursor, at least) I don't have any problem with you posting "opportunities" such as the ones you've been posting...but, as Steve suggested, once, maybe even twice.  My objection was more along the lines of the (nearly) constant get-it-while-it's-hot come-ons for the Rehoboth property...proving only that there was no interest in this property.

Beyond the one posting, all that these "opportunities" prove to me is just how dead the industry really is.  And, based on that judgement, I'd stay away, as apparently are so many others.

Sorry.
